Hailed recently as the greatest translator of Asian Literature ever to have lived Arthur Waley 1889 1966 had an immeasurable influence on Western perceptions of Asia and on the development of Asian studies in the West Waley was the single most important force in creating what the English speaking public understood to be Japanese literature with his popular and critically acclaimed translations of Japanese poetry no plays and the celebrated 11th century court romance *The Tale of Genji* This study of Waley and his Japanese translations provides a provocative examination of Waley's contribution to 20th century English literature and culture top graduate of Rugby and Cambridge and a younger member of the Bloomsbury Group He examines how the social contexts influenced Waley's work and he further locates Waley's Japanese translations within the political contexts of the Japonism movement British socialism and imperialism and the development of Japanese studies in England How a cult of things Japanese in the early modern period in Britain led to the emergence of one of the 20th century's most important translators is an interesting story in itself      *Classical Chinese Literature: From antiquity to the Tang dynasty* John Minford, Joseph S. **Literacy in the Persianate World** Brian Spooner, William L. Hanaway, 2012-03-19 Persian has been a written language since the sixth century B.C. Only Chinese Greek and Latin have comparable histories of literacy Although Persian script changed first from cuneiform to a modified Aramaic then to Arabic from the ninth to the nineteenth centuries it served a broader geographical area than any language in world history It was the primary language of administration and belles lettres from the Balkans under the earlier Ottoman Empire to Central China under the Mongols and from the northern branches of the Silk Road in Central Asia to southern India under the Mughal Empire Its history is therefore crucial for understanding the function of writing in world history Each of the chapters of *Literacy in the Persianate World* opens a

window onto a particular stage of this history starting from the reemergence of Persian in the Arabic script after the Arab Islamic conquest in the seventh century A D through the establishment of its administrative vocabulary its literary tradition its expansion as the language of trade in the thirteenth century and its adoption by the British imperial administration in India before being reduced to the modern role of national language in three countries Afghanistan Iran and Tajikistan in the twentieth century Two concluding chapters compare the history of written Persian with the parallel histories of Chinese and Latin with special attention to the way its use was restricted and channeled by social practice This is the first comparative study of the historical role of writing in three languages including two in non Roman scripts over a period of two and a half millennia providing an opportunity for reassessment of the work on literacy in English that has accumulated over the past half century The editors take full advantage of this opportunity in their introductory essay PMIRC volume 4
