Manuel De Photogrammetrie Principes Et Procédés Fondamentaux:

Manuel de photogrammétrie Karl Kraus, Peter Waldhäusl, 1998 *Digital Photogrammetry* Yves Egels, 2001-11-08
Photogrammetry is the use of photography for surveying primarily and is used for the production of maps from aerial photographs. Along with remote sensing it represents the primary means of generating data for Geographic Information Systems (GIS). As technology develops it is becoming easier to gain access to it. The cost of digital photogrammetry is decreasing. *Building Information Modeling for a Smart and Sustainable Urban Space* Rafika Hajji, Hassane Jarar Oulidi, 2022-01-26
Urban spaces are being called upon to develop a capacity for resilience and sustainability in order to meet the major challenges they face. To achieve such a goal a practical development framework must be implemented in order to take advantage of the technological innovations that characterize the field of construction and urban engineering. Today multi-scale BIM is bringing about significant changes that are redefining the paradigms of urban management. It facilitates simulations of the sustainability of urban spaces with respect to several criteria most notably relating to energy, the economy and the environment. Building Information Modeling for a Smart and Sustainable Urban Space proposes a theoretical and practical framework for implementing BIM models for the creation of sustainable and intelligent urban spaces. It addresses the issues of acquisition, modeling, interoperability and BIM and GIS integration for the production of BIM models. Case studies are presented providing a practical dimension that demonstrates the production process of the urban model and its contribution to multiscale simulations particularly in real estate evaluation and urban renewal. *Image Beyond the Screen* Daniel Schmitt, Marine Thébaud, Ludovic Burczykowski, 2020-02-19
Videomapping with its use of digital images is an audiovisual format that has gained traction with the creative industries. It consists of projecting images onto diverse surfaces according to their geometric characteristics. It is also synonymous with spatial augmented reality, projection mapping and spatial correspondence. Image Beyond the Screen lays the foundations for a field of interdisciplinary study encompassing the audiovisual humanities and digital creation and technologies. It brings together contributions from researchers and testimonials from some of the creators, technicians and organizers who now make up the many faceted community of videomapping. Live entertainment, museum, urban or event planning, cultural heritage, marketing industry and the medical field are just a few examples of the applications of this media. *Advances in sensor technology for sustainable crop production* Dr Craig Lobsey, Professor Asim Biswas, 2023-02-21
Assesses key developments in sensor technology to improve monitoring and management of complex agricultural systems. Considers the growing influence of proximal crop sensors in assessing monitoring and measuring the health of agricultural soils. Explores the potential of remote and aerial sensing towards achieving sustainable crop production through more targeted irrigation management, site specific nutrient management and weed management. *Précis de télédétection - Volume 3* Régis Caloz, Claude Collet, 2001-12-11
