*Manufacturing Babies and Public Consent* Jose Van Dijck, 1995 On Christmas day 1993 a 59 year old British woman gave birth to healthy twins In Italy the very same week a black woman bore a white baby produced from the semen of her white husband and an egg donated by a white woman Heated debates ensued across the United States and Europe Fifteen years ago the very idea of conception outside a woman's womb triggered science fiction fantasies and alarmist speculations Today thousands of babies are manufactured with the help of in vitro fertilization and related technologies each year The application of these procedures has continuously shifted the boundaries of conception and reproduction In the public debate on new reproductive technologies many voices have been heard medical scientists hailing the new technologies as an unprecedented advance feminists raising apprehensions about the way in which these technologies might rob a woman of her reproductive autonomy and bodily integrity and ethicists religious groups and politicians expressing concerns about the social and moral implications of the new technologies Mapping out the public debate in the three discourses which play the most significant role in the distribution of public meanings science journalism and fiction Jos Van Dyck here traces the ways in which this public consent has been manufactured This book examines important questions about the relationship between science technology and popular culture

**Legitimizing Life** Sonja van Wichelen, 2018-11-14 The phenomenon of transnational adoption is changing in the age of globalization and biotechnology In *Legitimizing Life* Sonja van Wichelen boldly describes how contemporary justifications of cross border adoption navigate between child welfare humanitarianism family making capitalism science and health Focusing on contemporary institutional practices of adoption in the United States and the Netherlands she traces how professionals bureaucrats lawyers politicians social workers and experts legitimate a practice that became progressively controversial Throughout the past few decades transnational adoption transformed from a humanitarian response to a means of making family In this new manifestation life becomes necessarily economized While push and pull factors demand and supply dynamics and competition between agencies set the stage for the globalization of adoption international conventions scientific knowledge and the language of human rights universalized the phenomenon Van Wichelen argues that such technoscientific legitimations of a globalizing practice are rearticulating colonial logics of race and civilization Yet she also lets us see beyond the biopolitical project and into alternative ways of making kin

**Pandora's Box** Nancy Lublin, 1998 This is the fourth lesson in the series *Little Music Lessons for Kids* where you can help your child to learn the space musical notes fast and easy Four musical notes like to meet in a beauty salon every day Day by day these musical notes spend their time painting their eyelashes lips cheeks and eyebrows Suddenly one of the notes reads an ad on a truck From this ad she finds out about free apartments available in the musical house The beauty note jumps out of the salon and runs to the treble staff the other three musical notes follow her But here is the bad news All the apartments are already full The beauty notes come up with an original idea and finally get their new apartments Your child

must hear this story      Quest for the Unity of Knowledge David Lowenthal, 2018-11-01 Is unity of knowledge possible Is it desirable Two rival visions clash One seeks a single way of explaining everything known and knowable about ourselves and the universe The other champions diverse modes of understanding served by disparate kinds of evidence Contrary views pit science against the arts and humanities Scientists generally laud and seek convergence Artists and humanists deplore amalgamation as a threat to humane values These opposing perspectives flamed into hostility in the 1950s Two Cultures clash They culminate today in new efforts to conjoin insights into physical nature and human culture and new fears lest such syntheses submerge what the arts and humanities most value This book stemming from David Lowenthal's inaugural Stockholm Archipelago Lectures explores the Two Cultures quarrels underlying ideologies Lowenthal shows how ingrained bias toward unity or diversity shapes major issues in education religion genetics race relations heritage governance and environmental policy Aimed at a general academic audience *Quest for the Unity of Knowledge* especially targets those in conservation ecology history of ideas museology and heritage studies      *International Bibliography of Sociology* 1995 ,1996 The IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences      Translation and Social Media Communication in the Age of the Pandemic Tong King Lee, Dingkun Wang, 2022-02-23 This collection of essays represents the first of its kind in exploring the conjunction of translation and social media communication with a focus on how these practices intersect and transform each other against the backdrop of the cascading COVID 19 crisis The contributions in the book offer empirical case studies as well as personal reflections on the topic illuminating a broad range of themes such as knowledge translation crisis communications language policies cyberpolitics and digital platformization Together they demonstrate the vital role of translation in the trust based construction of global public health discourses while accounting for the new medialities that are reshaping the conception experience and critique of translation in response to the cultural political and ecological challenges in the post pandemic world Written by leading scholars in translation studies media studies and literary studies this volume sets to open up new conversations among these fields in relation to the global pandemic and its aftermath The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license      **Prosthetic Bodies** I. van der Ploeg, 2013-04-17 Among the vast literature on contemporary reproductive technologies *Prosthetic Bodies* stands out in its effective combination of insights methods and theories from the history of medicine constructivist science and technology studies and feminist theory The double focus on IVF and related techniques and fetal treatment and surgery enables the identification of debatable tendencies within today's reproductive medicine the translation of ever more medical problems basically unrelated to women's own reproductive health and in the case of fetal diagnosis and treatment sometimes formerly even unrelated to reproduction as such into medical indications for invasive often highly experimental interventions in

women's bodies The analyses show how through the operations and workings of reproductive technologies themselves as well as a variety of discursive mechanisms within scientific language today's recasting of men's fertility problems and children's congenital anomalies as women's reproductive problems comes to appear inevitable The book challenges the ability of traditional forms of medical ethics and law to adequately identify this incremental process The careful analyses and arguments in *Prosthetic Bodies* will be relevant to students of science and technology gender studies philosophy medical ethics and law and others interested in the cultural ethical and political ramifications of contemporary reproductive technologies

The Embryo Research Debate Michael Joseph Mulkey, 1997-02-13 Scientific research involving human embryos was a major topic of public debate in Britain during the 1980s Despite strong support from the scientific community embryo research was initially condemned by many ordinary people as well as by special interest groups and came close to being banned by Act of Parliament Michael Mulkey describes the dynamics of the parliamentary struggle over the future of embryo research focusing on such issues as the clash between the anti abortion and pro research lobbies the tactics of the Government political ideology the media's role the importance of gender religion the impact of science fiction the lure of medical advance and the difficulty of maintaining ethical control He explains how the advocates of embryo research eventually triumphed and ends with an examination of the cultural tensions which linger after the debate

### **Imagination**

José Van Dijck, 1998-01-31 Genetics seems more popular than ever DNA technology not only sustains large areas of biomedicine and business but also prevails in social and legal practices and takes root in cultural products Since the late 1950s the public image of genetics metamorphosed from a suspect branch of research into a thriving well funded field of biomedicine Images and imaginations have played a crucial role in the popularization of genetic knowledge The media played up images of engineered bugs scientists promoted images of selfish genes and science fiction writers infested the imagination with stories of cloned monsters *Imagination* examines the role of science journalism and fiction in the popularization of genetics

**Cultural Conceptions** Valerie Hartouni, 1997 Examines the meaning of life in an era of emerging biotechnology What happens to prevailing beliefs about the uniqueness of individual life when life can be cloned Or to traditional understandings of family relationships when a child can have up to five parents These are some of the questions addressed by Valerie Hartouni in her consideration of the cultural effects of new reproductive technologies as reflected in video images popular journalism scientific debates legal briefs and policy decisions In *Cultural Conceptions* Hartouni tracks the circulation and communication of various myths images and stories pertaining to new reproductive technologies and their effects both imagined and real during the past two decades While addressing topics ranging from surrogacy and cloning to adoption ultrasound imaging and abortion Hartouni looks to American popular culture for clues to what these new and not so new reproductive practices tell us about issues of personhood Hartouni investigates the emergence of new anxieties about the nature of selfhood as well as the recurrence of age old myths regarding individuality sexuality property and family She

argues that both are being played out in cultural contests over the meaning and organization of women's reproductive capacity. In her discussion of provocative issues such as The Bell Curve controversy and the Baby M case, Hartouni traces the dialectic of crisis and containment unleashed by reproductive technologies. Ultimately, however, *Cultural Conceptions* argues that the anxieties that surround new reproductive technologies provide openings for alternative understandings and practices of life to emerge and challenge those currently in place. A thoughtful, daring, and original look at this complex set of issues, *Cultural Conceptions* provides a much needed guide to our nation's psyche as we approach the new millennium.

*Regulating Reproduction* Melanie Latham, 2002 *Regulating Reproduction* examines the genesis of reproductive rights in Britain and France over the course of the 20th Century. Melanie Latham concentrates on the role played by the various interest groups involved in the area of reproduction, namely medical professionals, religious groups, and feminists, using the Policy Network Theory on interest group behavior. Latham combines legal analysis with political analysis and offers a cross-cultural perspective.

Mediated Memories in the Digital Age José van Dijck, 2007 This book studies how our personal memory is transformed as a result of technological and cultural transformations: digital photo cameras, camcorders, and multimedia computers inevitably change the way we remember and affect conventional forms of recollection.

**Women's Studies** Linda Krikos, Cindy Ingold, 2004-08-30 This truly monumental work maps the literature of women's studies, covering thousands of titles and Web sites in 19 subject areas published between 1985 and 1999. Intended as a reference and collection development tool, this bibliography provides a guide for women's studies information for each title along with a detailed, often evaluative review. The annotations summarize each work's content, its importance or contribution to women's studies, and its relationship to other titles on the subject. Core titles and titles that are out of print are noted, and reviews indicate which titles are appropriate as texts or supplemental texts. This definitive guide to the literature of women's studies is a must purchase for academic libraries that support women's studies programs, and it is a useful addition to any academic or public library that endeavors to represent the field. A team of subject specialists has taken on the immense task of documenting publications in the area of women's studies in the last decades of the 20th century. The result is this truly monumental work, which maps the field, covering thousands of titles and Web sites in 19 subject areas published between 1985 and 1999. Intended as a reference and collection development tool, this bibliography provides a guide for women's studies information for each title along with a detailed, often evaluative review. The annotations summarize each work's content, its importance or contribution to women's studies, and its relationship to other titles on the subject. Most reviews cite and describe similar and contrasting titles, substantially extending the coverage. Core titles and titles that are out of print are noted, and reviews indicate which titles are appropriate as texts or supplemental texts. Taking up where the previous volume by Loeb, Searing, and Stineman left off, this is the definitive guide to the literature of women's studies. It is a must purchase for academic libraries that support women's studies programs and a welcome addition to any academic or public library that

endeavors to represent the field      Pain: Management, Expression, Interpretation ,2020-05-06      **Surrogate Motherhood and the Politics of Reproduction** Susan Markens,2007-09-04 Susan Markens takes on one of the hottest issues on the fertility front surrogate motherhood in a book that illuminates the culture wars that have erupted over new reproductive technologies in the United States In an innovative analysis of legislative responses to surrogacy in the bellwether states of New York and California Markens explores how discourses about gender family race genetics rights and choice have shaped policies aimed at this issue She examines the views of key players including legislators women s organizations religious groups the media and others In a study that finds surprising ideological agreement among those with opposing views of surrogate motherhood Markens challenges common assumptions about our responses to reproductive technologies and at the same time offers a fascinating picture of how reproductive politics shape social policy      **Regulation of the Pharmaceutical Industry** J. Abraham,H. Lawton Smith,2003-06-10 How are pharmaceutical technologies developed and controlled in our societies To what extent should the availability of these technologies be determined by scientific experts a democratic state the interests of final users or ethical principles This unique collection brings together the work of social scientists ethicists lawyers and policy analysts on regulation ethics and innovation in the pharmaceutical industry Regulatory systems and their implications for public health in North America Europe and developing countries are discussed including case studies of norplant interferon and anti fertility vaccines      Anatomy Live Maaïke Bleeker,2008 Gross anatomy the study of anatomical structures that can be seen by unassisted vision has long been a subject of fascination for artists For most modern viewers however the anatomy lesson the technically precise province of clinical surgeons and medical faculties hardly seems the proper breeding ground for the hybrid workings of art and theory We forget that in its early stages anatomy pursued the highly theatrical spirit of Renaissance science as painters such as Rembrandt and Da Vinci and medical instructors like Fabricius of Aquapendente shared audiences devoted to the workings of the human body Anatomy Live Performance and the Operating Theatre a remarkable consideration of new developments on the stage as well as in contemporary writings of theorists such as Donna Haraway and Brian Massumi turns our modern notions of the dissecting table on its head using anatomical theatre as a means of obtaining a fresh perspective on representations of the body conceptions of subjectivity and own knowledge about science and the stage Critically dissecting well known exhibitions like Body Worlds and The Visible Human Project and featuring contributions from a number of diverse scholars on such subjects as the construction of spectatorship and the implications of anatomical history Anatomy Live is not to be missed by anyone with an interest in this engaging intersection of science and artistic practice      **Books in Print** ,1991      *Disputes and Dilemmas in Health Law* Ian R. Freckelton,2006 This book replaces the successful *Controversies in Health Law* Under the same editorship and much the same authorship it is substantially larger 30 chapters instead of 18 and correspondingly more comprehensive It retains the lively analysis and the focus on controversial and cutting edge problems The chapters are

broken up into parts covering Litigation and Liability Reproductive Technologies The Sequelae of the End of Life Public Health Ethical Frameworks and Dilemmas Regulation Human Rights and Therapeutic Jurisprudence Research and Vulnerability and Information Privacy and Confidentiality They consider issues raised by new technologies changing legislation and altering community expectations by new regulatory processes for medicine and all of the health professions by the fundamental changes to civil liability for medical negligence by the fierce debate over the role of coroners Disputes and Dilemmas in Health Law covers questions on property in human tissue and on the ethical and legal aspects of the genetics revolution provides a modern take on old issues such as reproductive law takes account of changes relating to expert evidence and discusses how difficult cases in relation to psychiatric injury and wrongful life are pushing compensability to its edges      *Local Babies, Global Science* Marcia C. Inhorn, 2012-11-12 In the late 1990s Egypt experienced a boom period in in vitro fertilization IVF technology and now boasts more IVF clinics than neighboring Israel In this book Marcia Inhorn writes of her fieldwork among affluent elite couples who sought in vitro fertilization in Egypt a country which is not only at the forefront of IVF technology in the Middle East but also a center of Islamic education in the region Inhorn examines the gender scientific religious and cultural ramifications of the transfer of IVF technology from Euro American points of origin to Egypt showing how cultural ideas reshape the use of this technology and in turn how the technology is reshaping cultural ideas in Egypt
