Manufacturing Religion The Discourse On Sui Generis Religion And The Politics Of Nostalgia:

Manufacturing Religion Russell T. McCutcheon, 1997-06-19 In this new book author Russell McCutcheon offers a powerful critique of traditional scholarship on religion focusing on multiple interrelated targets Most prominent among these are the History of Religions as a discipline Mircea Eliade one of the founders of the modern discipline recent scholarship on Eliade's life and politics contemporary textbooks on world religions and the oft repeated bromide that religion is a sui generis phenomenon McCutcheon skillfully analyzes the ideological basis for and service of the sui generis argument demonstrating that it has been used to constitute the field's object of study in a form that is ahistoric apolitical fetishized and sacrosanct As such he charges it has helped to create departments jobs and publication outlets for those who are comfortable with such a suspect construction while establishing a disciplinary ethos of astounding theoretical naivete and a body of scholarship to match Surveying the textbooks available for introductory courses in comparative religion the author finds that they uniformly adopt the sui generis line and all that comes with it As a result he argues they are not just uncritical which helps keep them popular among the audiences for which they are intended but badly disserve but actively inhibit the emergence of critical perspectives and capacities And on the geo political scale he contends the study of religion as an ahistorical category participates in a larger system of political domination and economic and cultural imperialism

Failure and Nerve in the Academic Study of Religion William E. Arnal,Willi Braun,Russell T. McCutcheon,2014-09-11 Failure and Nerve in the Academic Study of Religion presents a provocative critique of the unwillingness of modern scholars to publically distinguish research into comparative religion from confessional studies written within denominationally affiliated institutions The book offers the 19th Century founders of the study of religion as a bracing corrective to contemporary timidity The issue was analysed and documented by Wiebe a quarter of a century ago Here marking Wiebe s work a wide range of contributors reassess the methodology and ambition of contemporary religious research The book argues that conceptualizing religion as part of the world of human action and experience is the first requirement of the study of religion

Modern Religion, Modern Race Theodore M. Vial,2016 Religion is a racialized category even when race is not explicitly mentioned In *Modern Religion Modern Race* Theodore Vial argues that because the categories of religion and race are rooted in the post Enlightenment project of reimagining what it means to be human we cannot simply will ourselves to stop using them Only by acknowledging that religion is already racialized can we begin to understand how the two concepts are intertwined and how they operate in our modern world It has become common to argue that the category religion is not universal or even very old but is a product of Europe s Enlightenment modernization Equally common is the argument that religion is not an innocent category of analysis but is implicated in colonial regimes of control and as such plays a role in Europe s process of identity construction of itself and of non European others Current debates about race follow an eerily similar trajectory race is not an ancient but a modern construction It is part of the project of colonialism and race discourse forms one of the cornerstones of modern

European identity making Why can't we stop using them or re-construct them in less toxic ways By examining the theories of Kant Herder and Schleiermacher among others Vial uncovers the constitutive nature of race and religion describes how they became building blocks of the modern world and shows how the two concepts continue to be used today to form identity and to make sense of the world He shows that while we disdain the racist language of some of the founders of religious studies the continued influence of the modern worldview they helped create leads us often unwittingly to reiterate many of the same distinctions and hierarchies Although it may not be time to abandon the very category of religion with all its attendant baggage *Modern Religion Modern Race* calls for us to examine that baggage critically and to be fully conscious of the ways in which religion always carries with it dangerous ideas of race *New Approaches to the Study of Religion: Regional, critical, and historical approaches* Peter Antes, Armin W. Geertz, Randi Ruth Warne, 2004 Internationally recognized scholars from many parts of the world provide a critical survey of recent developments and achievements in the global field of religious studies The work follows in the footsteps of two former publications *Classical Approaches to the Study of Religion* edited by Jacques Waardenburg 1973 and *Contemporary Approaches to the Study of Religion* edited by Frank Whaling 1984 85 *New Approaches to the Study of Religion* completes the survey of the comparative study of religion in the twentieth century by focussing on the past two decades Many of the chapters however are also pathbreaking and point the way to future approaches

Why Study Religion? Richard B. Miller, 2021-12-10 Can the study of religion be justified Scholarship in religion especially work in theory and method is preoccupied with matters of research procedure and thus inarticulate about the goals that motivate scholarship in the field For that reason the field suffers from a crisis of rationale Richard B Miller identifies six prevailing methodologies in the field and then offers an alternative framework for thinking about the purposes of the discipline Shadowing these various methodologies he notes is a Weberian scientific ideal for studying religion one that aspires to value neutrality This ideal fortifies a regime of truth that undercuts efforts to think normatively and teleologically about the field's purpose and value Miller's alternative framework Critical Humanism theorizes about the ends rather than the means of humanistic scholarship Why Study Religion offers an account of humanistic inquiry that is held together by four values Post critical Reasoning Social Criticism Cross cultural Fluency and Environmental Responsibility Ordered to such purposes Miller argues scholars of religion can relax their commitment to matters of methodological procedure and advocate for the value of studying religion The future of religious studies will depend on how well it can articulate its goals as a basis for motivating scholarship in the field

Metamodernism Jason Ananda Josephson Storm, 2021-07-20 For decades scholars have been calling into question the universality of disciplinary objects and categories The coherence of defined autonomous categories such as religion science and art has collapsed under the weight of postmodern critiques calling into question the possibility of progress and even the value of knowledge Jason nanda Josephson Storm aims to radicalize and move beyond these deconstructive projects to offer a path forward for the humanities and social sciences using a new model for theory he calls metamodernism Metamodernism works through the postmodern critiques and uncovers the mechanisms that produce and maintain concepts and social categories In so doing Storm provides a new radical account of society s ever changing nature what he calls a Process Social Ontology and its materialization in temporary zones of stability or social kinds Storm then formulates a fresh approach to philosophy of language by looking beyond the typical theorizing that focuses solely on human language production showing us instead how our own sign making is actually on a continuum with animal and plant communication Storm also considers fundamental issues of the relationship between knowledge and value promoting a turn toward humble emancipatory knowledge that recognizes the existence of multiple modes of the real Metamodernism is a revolutionary manifesto for research in the human sciences that offers a new way through postmodern skepticism to envision a more inclusive future of theory in which new forms of both progress and knowledge can be realized

The Appropriation of Religion in Southeast Asia and Beyond Michel Picard, 2017-08-11 This volume investigates various processes by which world religions become localized as well as how local traditions in Southeast Asia and Melanesia become universalized In the name of modernity and progress the contemporary Southeast Asian states tend to press their populations to have a religion claiming that their local indigenous practices and traditions do not constitute religion Authors analyze this religionization addressing how local people appropriate religion as a category to define some of their practices as differentiated from others whether they want to have a religion or are constrained to demonstrate that they profess one Thus religion is what is regarded as such by these local actors which might not correspond to what counts as religion for the observer Furthermore local actors do not always concur regarding what their religion is about as religion is a contested issue In consequence each of the case studies in this volume purposes to elucidate what gets identified and legitimized as religion by whom for what purpose and under what political conditions

Confucianism as a World Religion Anna Sun, 2013-04-21 Is Confucianism a religion If so why do most Chinese think it isn t From ancient Confucian temples to nineteenth century archives to the testimony of people interviewed by the author throughout China over a period of more than a decade this book traces the birth and growth of the idea of Confucianism as a world religion The book begins at Oxford in the late nineteenth century when

Friedrich Max Müller and James Legge classified Confucianism as a world religion in the new discourse of world religions and the emerging discipline of comparative religion. Anna Sun shows how that decisive moment continues to influence the understanding of Confucianism in the contemporary world not only in the West but also in China where the politics of Confucianism has become important to the present regime in a time of transition. Contested histories of Confucianism are vital signs of social and political change. Sun also examines the revival of Confucianism in contemporary China and the social significance of the ritual practice of Confucian temples. While the Chinese government turns to Confucianism to justify its political agenda, Confucian activists have started a movement to turn Confucianism into a religion. Confucianism as a world religion might have begun as a scholarly construction but are we witnessing its transformation into a social and political reality? With historical analysis, extensive research, and thoughtful reflection, *Confucianism as a World Religion* will engage all those interested in religion and global politics at the beginning of the Chinese century.

Religion and Violence in South Asia John Hinnells, Richard King, 2007-01-24 Do religions justify and cause violence or are they more appropriately seen as forces for peace and tolerance? Featuring contributions from international experts in the field, this book explores the debate that has emerged in the context of secular modernity about whether religion is a primary cause of social division, conflict, and war or whether this is simply a distortion of the true significance of religion and that if properly followed it promotes peace, harmony, goodwill, and social cohesion. Focusing on how this debate is played out in the South Asian context, the book engages with issues relating to religion and violence in both its classical and contemporary formations. The collection is designed to look beyond the stereotypical images and idealized portrayals of the peaceful South Asian religious traditions, especially Hindu, Buddhist, Jain, and Sufi, which can occlude their own violent histories and to analyze the diverse attitudes towards and manifestations of violence within the major religious traditions of South Asia. Divided into three sections, the book also discusses globalization and the theoretical issues that inform contemporary discussions of the relationship between religion and violence.
