Epistemic Foundations of Fuzziness Kofi Kissi Dompere,2009-07-22 It is necessary to practice methodological doubt like Descartes in der to loosen the hold of mental habits and it is necessary to cultivate logical imagination in order to have a number of hypotheses at c mand and not to be the slave of the one which common sense has r dered easy to imagine These two processes of doubting the familiar and imagining the unfamiliar are corrective and form the chief part of the mental training required for a philosopher Bertrand Russell At every stage and in all circumstances knowledge is incomplete and provisional conditioned and limited by the historical circumstances under which it was acquired including the means and methods used for gaining it and the historically conditioned assumptions and categories used in the formulation of ideas and conclusions Maurice Cornforth This monograph is the second in the series of meta theoretic analysis of fuzzy paradigm and its contribution and possible contribution to formal reasoning in order to free the knowledge production process from the ridge frame of the classical paradigm that makes its application to soft and inexact sciences d ficult or irrelevant The work in the previous monograph was strictly devoted to problems of theory of knowledge and critique of classical bounded and other rationalities in decision choice processes regarding the principles of verification falsification or corroboration in knowledge production This monograph deals mostly with epistemic decision choice models and theories and how they are related to both the classical and fuzzy paradigms

Fuzziness and Approximate Reasoning Kofi Kissi Dompere,2009-07-28 We do not perceive the present as it is and in totality nor do we infer the future from the present with any high degree of dependability nor yet do we accurately know the consequences of our own actions In addition there is a fourth source of error to be taken into account for we do not execute actions in the precise form in which they are imaged and willed Frank H Knight R4 34 p 202 The degree of certainty of confidence felt in the conclusion after it is reached cannot be ignored for it is of the greatest practical signi cance

The action which follows upon an opinion depends as much upon the amount of confidence in that opinion as it does upon favourableness of the opinion itself The ultimate logic or psychology of these deliberations is obscure a part of the scientifically unfathomable mystery of life and mind Frank H Knight R4 34 p 226 227 With some inaccuracy description of uncertain consequences can be classified into two categories those which use exclusively the language of probability distributions and those which call for some other principle either to replace or supplement Fuzzy Rationality Kofi Kissi

Dompere,2009-03-20 Philosophy involves a criticism of scientific knowledge not from a point of view ultimately different from that of science but from a point of view less concerned with details and more concerned with the harmony of the body of special sciences Here as elsewhere while the older logic shut out possibilities and imprisoned imagination within the walls of the familiar the newer logic shows rather what may happen and refuses to decide as to what must happen Bertrand Russell At any particular stage in the development of humanity knowledge comes up against limits set by the necessarily limited character of the experience available and the existing means of obtaining knowledge But humanity advances by overcoming such limits New experience throws down the limits of old experience new techniques new means of obtaining knowledge throw down the limits of old techniques and old means of obtaining knowledge New limits then once again appear But there is no more reason to suppose these new limits absolute and final than there was to suppose the old ones absolute and final

Manufacturing Cost Policy Deployment (MCPD) Profitability Scenarios Alin Posteuca, 2018-10-09 This book shows how to consistently obtain annual and multiannual manufacturing target profit regardless of the evolution of sales volumes increasing or decreasing using the Manufacturing Cost Policy Deployment MCPD system Managers and practitioners within the manufacturing companies will discover a practical approach within the MCPD system that will help them develop and support their long term medium term and short term profitability and productivity strategy The book presents both the basic concepts of MCPD and the key elements of transforming manufacturing companies through MCPD system as well as supporting the consistent growth of external and internal profit by directing all systematic and systemic improvements based on meeting the annual and multiannual Manufacturing Cost Improvement MCI targets and means for each Product Family Cost PFC This book is unique because it presents two types of systematic and systemic improvement projects for MCI that have been applied over the years in various multinational manufacturing companies operating in highly competitive markets in order to address the consistent reduction of unit manufacturing costs by improving the Cost of Losses and Waste CLW Readers will discover the practical approach of MCI based on a structured approach to MCPD system beyond the traditional approach to manufacturing improvements based mainly on improved time and quality Therefore from the perspective of the MCPD system the multiannual manufacturing target profits are met while the annual and multiannual manufacturing target costs are a predetermined stake and not a result of the improvements already made
