Many Many Things That Go:

Makers of Many Things Eva March Tappan, 2020-09-28 I remember being once upon a time ten miles from a store and one mile from a neighbor the fire had gone out in the night and the last match failed to blaze We had no flint and steel We were neither Indians nor Boy Scouts and we did not know how to make a fire by twirling a stick There was nothing to do but to trudge off through the snow to the neighbor a mile away and beg some matches Then was the time when we appreciated the little match and thought with profound respect of the men who invented and perfected it It is a long way from the safe and reliable match of to day back to the splinters that were soaked in chemicals and sold together with little bottles of sulphuric acid The splinter was expected to blaze when dipped into the acid Sometimes it did blaze and sometimes it did not but it was reasonably certain how the acid would behave for it would always sputter and do its best to spoil some one's clothes Nevertheless even such matches as these were regarded as a wonderful convenience and were sold at five dollars a hundred With the next kind of match that appeared a piece of folded sandpaper was sold and the buyer was told to pinch it hard and draw the match through the fold These matches were amazingly cheap eighty four of them for only twenty five cents There have been all sorts of odd matches One kind actually had a tiny glass ball at the end full of sulphuric acid To light this you had to pinch the ball and the acid that was thus let out acted upon the other chemicals on the match and kindled it or was expected to kindle it which was not always the same thing Making matches is a big business even if one hundred of them are sold for a cent It is estimated that on an average each person uses seven matches every day To provide so many would require some seven hundred million matches a day in this country alone It seems like a very simple matter to cut a splinter of wood dip it into some chemicals and pack it into a box for sale and it would be simple if it were all done by hand but the matches would also be irregular and extremely expensive The way to make anything cheap and uniform is to manufacture it by machinery

Jim Freeman, 2021-04-15 More than fifty years after the civil rights movement there are still glaring racial inequities all across the United States In **Rich Thanks to Racism** Jim Freeman one of the country s leading civil rights lawyers explains why as he reveals the hidden strategy behind systemic racism He details how the driving force behind the public policies that continue to devastate communities of color across the United States is a small group of ultra wealthy individuals who profit mightily from racial inequality In this groundbreaking examination of strategic racism Freeman carefully dissects the cruel and deeply harmful policies within the education criminal justice and immigration systems to discover their origins and why they persist He uncovers billions of dollars in aligned investments by Bill Gates Charles Koch Mark Zuckerberg and a handful of other billionaires that are dismantling public school systems across the United States He exposes how the greed of prominent US corporations and Wall Street banks was instrumental in creating the world s largest prison population and our most extreme anti immigrant policies Freeman also demonstrates how these racism profiteers prevent flagrant injustices from being addressed by pitting white communities against communities of color obscuring the fact that the struggles faced by white people are deeply connected with those faced by people of color **Rich Thanks to Racism** is an invaluable road map for all those who recognize that the key to unlocking the United States full potential is for more people of all races and
