Production Studies is the first volume to bring together a star studded cast of interdisciplinary media scholars to examine the unique cultural practices of media production The all new essays collected here combine ethnographic sociological critical material and political economic methods to explore a wide range of topics from contemporary industrial trends such as new media and niche markets to gender and workplace hierarchies Together the contributors seek to understand how the entire span of media producers ranging from high profile producers and directors to anonymous stagehands and costume designers work through professional organizations and informal networks to form communities of shared practices languages and cultural understandings of the world The Washington Reporters Stephen Hess,2010-12-01

In the vast literature on the way democratic governments work the role of the press is often overlooked Yet the press no less than the formal branches of government is a public policy institution and deserves to be included in explanations of the governmental process In The Washington Reporters Stephen Hess focuses on those who cover the U S government for the American commercial news media His book is based on interviews with reporters and editors and on responses to questionnaires from nearly half of the over 1 200 American reporters in Washington Analysis of these responses and comparison with the content and placement of over 2 000 of these reporters news stories permit an unusual and sometimes startling perspective on Washington newswork Mr Hess demonstrates for instance how information in the news regularly comes from the legislative branch of the government despite the greater number of stories on the presidency and he shows that Washington news dominates the front pages of daily newspapers across the country no matter how little may be going on in the nation s capital The author concludes that Washington news gathering fragments media power while at the same time it shifts decisions on what is news and how it should be covered to the reporters The import of this impression is that reporters are not simply passing along information they are choosing within certain limits what most people will know about government The freedom given and assumed by these news workers affects the shape of national affairs Language Lessons Ruth Spack,2008

In today s linguistically diverse classrooms it is essential for teachers to understand the needs of students who are acquiring English as an additional language A firm knowledge of theoretical and practical issues must be paired with a deep understanding of the human side of language learning Language Lessons Stories for Teaching and Learning English is a short story anthology that offers valuable insight into the inner lives of language learners A wide variety of linguistic backgrounds is represented in the collection and the stories examine language learning issues over a broad range of time highlighting cultural political and social realities that can shape the language learning experiences of children and adults This volume can be used in a variety of education settings including undergraduate and graduate courses in TESOL Literacy Studies and Language Arts and faculty development workshops Suggestions for guiding written responses to the material are given and questions encourage readers to reflect on each story and to explore the multifaceted connections among stories **Encyclopedia of American**
