The Self, Relational Sociology, and Morality in Practice Owen Abbott, 2019-10-21 Winner of the 2020 British Sociological Association Philip Abrams Prize Providing a theory of moral practice for a contemporary sociological audience Owen Abbott shows that morality is a relational practice achieved by people in their everyday lives He moves beyond old dualisms society versus the individual social structure versus agency body versus mind to offer a sociologically rigorous and coherent theory of the relational constitution of the self and moral practice which is both shared and yet enacted from an individualized perspective In so doing *The Self Relational Sociology and Morality in Practice* not only offers an urgently needed account of moral practice and its integral role in the emergence of the self but also examines morality itself within and through social relations and practices Abbott s conclusions will be of interest to social scientists and philosophers of morality those working with pragmatic and interactionist approaches and those involved with relational sociology and social theory

What distinguishes evils from ordinary wrongs Is hatred a necessarily evil Are some evils unforgivable Are there evils we should tolerate What can make evils hard to recognize Are evils inevitable How can we best respond to and live with evils Claudia Card offers a secular theory of evil that responds to these questions and more Evils according to her theory have two fundamental components One component is reasonably foreseeable intolerable harm harm that makes a life indecent and impossible or that makes a death indecent The other component is culpable wrongdoing Atrocities such as genocides slavery war rape torture and severe child abuse are Card s paradigms because in them these key elements are writ large Atrocities deserve more attention than secular philosophers have so far paid them They are distinguished from ordinary wrongs not by the psychological states of evildoers but by the seriousness of the harm that is done Evildoers need not be sadistic they may simply be negligent or unscrupulous in pursuing their goals Card s theory represents a compromise between classic utilitarian and stoic alternatives including Kant s theory of radical evil Utilitarians tend to reduce evils to their harms Stoics tend to reduce evils to the wickedness of perpetrators Card accepts neither reduction She also responds to Nietzsche s challenges about the worth of the concept of evil and she uses her theory to argue that evils are more important than merely unjust inequalities She applies the theory in explorations of war rape and violence against intimates She also takes up what Primo Levi called the gray zone where victims become complicit in perpetrating on others evils that threaten to engulf themselves While most past accounts of evil have focused on perpetrators Card begins instead from the position of the victims but then considers more generally how to respond to and live with evils as victims as perpetrators and as those who have become both Spirituality in Clinical Practice Len Sperry,2012-01-26 Spirituality in Clinical Practice is light years beyond books that emphasizes developing therapist awareness of spirituality instead it emphasizes the effective integration of spirituality in all dimension of psychotherapy process therapeutic alliance assessment case conceptualization intervention and termination *Offending Behaviour* Emma J Palmer,2013-05-24 This book provides a comprehensive and up to date review of the relationship between psychology moral reasoning theory and offending behaviour It sets out the theory and research which has been carried out in the field and examines the ways in which this knowledge has been used in practice to inform treatment programmes for offenders This book pays particular attention to Kohlberg s theory of moral reasoning providing a link between this theory and developmental psychology along with a review of more recent critiques of this theory and an analysis of the difficulties of accurately assessing moral reasoning The book goes on to assess moral reasoning as an explanation of offending behaviour looking at how moral reasoning interacts with child rearing and family factors social factors and social cognition Offending is therefore presented as a complex phenomenon caused by an interaction of variables that are internal and external to the individual The book concludes with a consideration of how knowledge and research in the area of moral reasoning and offending has been used in practice to inform treatment programmes for offenders looking at

a variety of different settings prison residential settings and in the community **Earthcare** David Clowney, Patricia Mosto, 2009-11-16 This anthology designed for use in undergraduate courses in environmental ethics includes new and classic readings by leading writers in the field full length case studies and many short discussion cases Introductions and discussion questions are provided for all the essays with each chapter introduced by a summary of the issues and appropriate philosophic historical and scientific background Exploring ethical theory environmental ethics science and the environmental movement Earthcare also offers suggestions for students on how to think about ethics and the environment Through many worldviews religions and philosophical perspectives this collection grapples with environmental ethics issues from valuing nature concerns about the atmosphere water land animals and human population as well as the interlocking and often problematic interests of business consumption energy and sustainability This book also features examples of a wide variety of environmentally engaged individuals giving students a way of seeing the connections between the material studied and what they themselves might accomplish **Postmodern Management and Organization Theory** David Boje, 1996 This thought provoking critique of postmodern theory provides an overview of issues as they relate to management and organization theory and its history and assembles a variety of important works on postmodern philosophy including feminist and cultural postmodern philosophies Addressing the future of the postmodern influence on management and organization theory and method the book also establishes an agenda for future research **The Miseducation of Women** James Tooley, 2003-07-21 Girls and boys are different So why do our schools insist on treating them as identical Could this misguided equality have anything to do with the increasing dissatisfaction among women that is revealed in survey after survey Do gender blind educational policies in fact work to women s disadvantage Bringing together many women s voices from Bridget Jones to Simone de Beauvoir Betty Friedan to Germaine Greer James Tooley challenges education s sacred cows demanding a radical rethinking of sexual politics and a fairer way forward for women The Miseducation of Women landed like a bombshell when it was published in England a few months ago but Mr Tooley s book replete with examples and anecdotes from the United States as well as Great Britain has equal application to the gender arguments on this side of the Atlantic **Natural Moralities** David B Wong, 2009-03-03 In this book David B Wong defends an ambitious and important new version of moral relativism He does not espouse the type of relativism that says anything goes but he does start with a relativist stance against alternative theories such that there need not be only one universal truth Wong proposes that there can be a plurality of true moralities existing across different traditions and cultures all with one core human question as to how we can all live together Natural Moralities : A Defense of Pluralistic Relativism Department of Philosophy Duke University David B. Wong Professor and Chair, 2006-09-07 David B Wong proposes that there can be a plurality of true moralities moralities that exist across different traditions and cultures all of which address facets of the same problem how we are to live well together Wong examines a wide array of positions and texts within the Western canon as well as in Chinese philosophy and draws on

philosophy psychology evolutionary theory history and literature to make a case for the importance of pluralism in moral life and to establish the virtues of acceptance and accommodation Wong's point is that there is no single value or principle or ordering of values and principles that offers a uniquely true path for human living but variations according to different contexts that carry within them a common core of human values We should thus be modest about our own morality learn from other approaches and accommodate different practices in our pluralistic society *The Education Feminism Reader* Lynda Stone, Gail Masuchika Boldt, 1994 This anthology includes some of the most important and influential essays in feminist education theory since the late 70s Contributors are drawn from traditional liberal feminists radical postmodern theorists and those with psychological philosophical and political agendas **Educational Leadership** Alexander W. Handbook of Counselor Preparation Karen Eriksen, 2011-12 Published in cooperation with the Association for Counselor Education and Supervision ACES **Line Drawings** Cressida J. Heyes, 2000 At the heart of feminist theory lies the seemingly intractable issue of essentialism Feminism has thus far failed to transcend critiques of essentialism and currently offers only two inadequate positions against it One response reifies the category women representing the experience of oppression of privileged women as archetypal for feminism and the other denies the category because it unjustly overgeneralizes thus undercutting the possibility of a robust theory of gender oppression To spur anti essentialist methods and practice around such issues as sexual violence feminist theory crucially needs a constructive and politically powerful strategy for defining women Cressida J Heyes deftly elucidates and then travels beyond the essentialism debates to rescue the efficacy of feminist theory for activism and research She offers a genealogy of essentialism specifically as it applies to the work of Carol Gilligan and Catharine MacKinnon and employs a Wittgensteinian approach to feminism that understands similarities between women as family resemblances and political decisions about inclusion and exclusion as contextual and purposive Line Drawings argues for an anti essentialist method that enables generalizing feminist discourse but insists on paying close attention to the operations of power in constructing claims about women This is a fresh and vitally important step past stymied debate on what is arguably the most pressing issue in cross disciplinary feminist theory
