to see it instead as a dynamic space where people worked to harmonize the core traditions of America's agrarian character with the more abstract forms of twentieth century modernity In the maps and aerial survey photography of the Midwest as well as the painting cinema animation and suburban landscapes that arose through flight Weems also finds a different and provocative view of modernity in the making In representations of the Midwest from Grant Wood's iconic images to the Prairie style of Frank Lloyd Wright to the design of greenbelt suburbs Weems reveals aerial vision's fundamental contribution to regional identity to Midwesternness as we understand it Reading comparatively across these images Weems explores how the cognitive and perceptual practices of aerial vision helped to resymbolize the Midwestern landscape amid the technological change and social uncertainty of the early twentieth century

The Frontier Army in the Settlement of the West Michael L. Tate, 2001-10-01 A reassessment of the military's role in developing the Western territories moves beyond combat stories and stereotypes to focus on more non martial accomplishments such as exploration gathering scientific data and building towns

Peacekeepers and Conquerors Samuel J. Watson, 2013-04-23 In Jackson's Sword Samuel Watson showed how the U S Army officer corps played a crucial role in stabilizing the frontiers of a rapidly expanding nation In this sequel volume he chronicles how the corps responsibilities and leadership along the young nation's borders continued to grow In the process he shows officers reflected an increasing commitment to professionalism insulation from partisanship and deference to civilian authority all tempered in the forge of frustrating politically complex operations and diplomacy along the nation's frontiers Watson now focuses on the quarter century between the Army's reduction in force in 1821 and the Mexican War He examines a broad swath of military activity beginning with campaigns against southeastern Indians notably the dispossession of the Creeks remaining in Georgia and Alabama from 1825 to 1834 the expropriation of the Cherokee between 1836 and 1838 and the Second Seminole War He also explores peacekeeping on the Canadian border which exploded in rebellion against British rule at the end of 1837 prompting British officials to applaud the U S Army for calming tensions and demonstrating its government's support for the international state system He then follows the gradual extension of U S sovereignty in the Southwest through military operations west of the Missouri River and along the Louisiana Texas border from 1821 to 1838 and through dragoon expeditions onto the central and southern Plains between 1834 and 1845 Throughout his account Watson shows how military professionalism did not develop independent of civilian society nor was it simply a matter of growing expertise in the art of conventional warfare Indeed the government trusted career army officers to serve as federal international and interethnic mediators national law enforcers and de facto intercultural and international peacekeepers He also explores officers attitudes toward Britain Oregon Texas and Mexico to assess their values and priorities on the eve of the first conventional war the United States had fought in more than three decades Watson's detailed study delves deeply into sources that reveal what officers actually thought wrote and did in the frontier and border regions By examining the range of operations over the course of this quarter century he shows that the processes of

peacekeeping coercive diplomacy and conquest were intricately and inextricably woven together Atlas of Nebraska J. Clark Archer, Richard Edwards, Leslie M. Howard, Fred M. Shelley, Donald A. Raymond Wood, 2005-04-01 To follow the journeys made by Mackay and Evans up the Missouri and across the plains in 1795-97 is to begin to appreciate the kind of world Lewis and Clark found when they voyaged up the river in 1804 Of all those waterways none has captured the American imagination more than the Missouri It is a river of promise of dreams and of dreams denied James P Ronda from the Foreword When Mackay and Evans returned to Spanish St Louis in 1797 they were hailed as the two most illustrious travelers in the northern parts of this continent Ironically though the findings of Mackay and Evans were responsible for much of the early success of Lewis and Clark in their expedition the adulation that followed Lewis and Clark's successful

return completely eclipsed Mackay and Evans's reputations. In Prologue to Lewis and Clark W. Raymond Wood narrates the history of this long forgotten but important expedition up the Missouri River. The Mackay and Evans expedition was more than an exploratory mission. It was the last effort by Spain to gain control over the Missouri River basin in the decade before the United States purchased the Louisiana territory. In that respect it failed. But the expedition was successful as a journey of exploration. The maps and documents they created later provided the Lewis and Clark expedition with invaluable information for its first full year. Consolidating a collection of eighteen contemporary documents relating to the Mackay and Evans expedition as well as his own research and analysis, Wood provides an in-depth examination of the expedition's background, execution, and final results. Volume 79 in the American Exploration and Travel Series. Indigenous Knowledge and the Environment in Africa and North America David M. Gordon, Shepard Krech III, 2012-03-01. Indigenous knowledge has become a catchphrase in global struggles for environmental justice. Yet indigenous knowledges are often viewed incorrectly as pure and primordial cultural artifacts. This collection draws from African and North American cases to argue that the forms of knowledge identified as indigenous resulted from strategies to control environmental resources during and after colonial encounters. At times indigenous knowledges represented a middle ground of intellectual exchanges between colonizers and colonized elsewhere; indigenous knowledges were defined through conflict and struggle. The authors demonstrate how people claimed that their hybrid forms of knowledge were communal, religious, and traditional as opposed to individualist, secular, and scientific, which they associated with European colonialism. Indigenous Knowledge and the Environment offers comparative and transnational insights that disturb romantic views of unchanging indigenous knowledges in harmony with the environment. The result is a book that informs and complicates how indigenous knowledges can and should relate to environmental policy making. Contributors: David Bernstein, Derick Fay, Andrew H. Fisher, Karen Flint, David M. Gordon, Paul Kelton, Shepard Krech III, Joshua Reid, Parker Shipton, Lance van Sittert, Jacob Tropp, James L. A. Webb Jr., Marsha Weisiger.
