Maps of Time David Christian, **Teaching Big History** Richard B. Simon, Mojgan Behmand, Thomas Burke, 2015 Big History is a new field on a grand scale it tells the story of the universe over time through a diverse range of disciplines that spans cosmology physics chemistry astronomy geology evolutionary biology anthropology and archaeology thereby reconciling traditional human history with environmental geography and natural history Weaving the myriad threads of evidence based human knowledge into a master narrative that stretches from the beginning of the universe to the present the Big History framework helps students make sense of their studies in all disciplines by illuminating the structures that underlie the universe and the connections among them Teaching Big History is a powerful analytic and pedagogical resource and serves as a comprehensive guide for teaching Big History as well for sharing ideas about the subject and planning a curriculum around it Readers are also given helpful advice about the administrative and organizational challenges of instituting a general education program constructed around Big History The book includes teaching materials examples and detailed sample exercises This book is also an engaging first hand account of how a group of professors built an entire Big History general education curriculum for first year students demonstrating how this thoughtful integration of disciplines exemplifies liberal education at its best and illustrating how teaching and learning this incredible story can be transformative for professors and students alike

Globalization and Global Citizenship Irene Langran, Tammy Birk, 2016-06-10 Globalization and Global Citizenship examines the meaning and realities of global citizenship as a manifestation of recent trends in globalization In an interdisciplinary approach the chapters outline and

analyse the most significant dimensions of global citizenship including transnational historical and cultural variations in its practice foreign and domestic policy influences and its impact on personal identities The contributions ask and explore questions that are of immediate relevance for today's scholars including How does globalization in its current form present a new set of challenges for states non state actors and individual citizens How has globalization diminished expanded or complicated notions of citizenship What rights could exist outside the context of state sovereignty How can social accountability be imagined beyond the borders of towns cities or states What forms of political representational legitimacy could be productive on the global level When is it useful possible or desirable for individuals to identify with global political communities Drawing together a broad range of contributors and cutting edge research the volume offers chapters that seek to reflect the full spectrum of approaches and topics providing a valuable resource which highlights the value of an extended and thoughtful study of the idea and practice of global citizenship within a broader consideration of the processes of globalization It will be of great use to graduates and scholars of international relations sociology and global studies affairs as well as globalization

Talking Back to the Bible Edward G. Simmons, 2016-02-25 Talking Back to the Bible by Dr Edward G Simmons In a fascinating rumination Edward G Simmons combines a lifetime's experiences and biblical research in a voice that is as comfortable and welcoming as if one was seated in an easy chair in his study With his fierce intellect and honesty Simmons layers his philosophical lessons with personal insights and the latest discoveries of science The audience I hope will be anyone who enjoys studying the Bible and prefers seeking new and challenging insights rather than devotional rehashing of traditional messages Pastors scholars students and anyone in quest of spiritual insight through Bible study should find these conversations entertaining challenging and inspirational My hopes would be met if such readers found the insights presented here did indeed promote a stronger sense of relationship with God Edward G Simmons

Making Sense in History Andrew Szanajda, 2007 Making Sense in History provides a guide for history students and teachers This work provides descriptions and analysis of several approaches for writing history While the focus is on how history has been written the methods that are researched in the book are suitable as a reference work for college level history students and teachers It provides an overview of how research has been undertaken and how authors throughout history have written history Most works of this type deal with either the philosophy of history methodology for writing history or historiography This work combines

The Routledge Companion to Big History Craig Benjamin, Esther Quaedackers, David Baker, 2019-08-01 The Routledge Companion to Big History guides readers through the variety of themes and concepts that structure contemporary scholarship in the field of big history The volume is divided into five parts each representing current and evolving areas of interest to the community including big history's relationship to science social science the humanities and the future as well as teaching big history and little big histories Considering an ever expanding range of theoretical pedagogical and research topics the book addresses such questions as what is the relationship between big history and

scientific research how are big historians working with philosophers and religious thinkers to help construct meaning how are leading theoreticians making sense of big history and its relationship to other creation narratives and paradigms what is little big history and how does big history impact on thinking about the future The book highlights the place of big history in historiographical traditions and the ways in which it can be used in education and public discourse across disciplines and at all levels A timely collection with contributions from leading proponents in the field it is the ideal guide for those wanting to engage with the theories and concepts behind big history

Global Brain Singularity Cadell Last, 2020-07-30 This book introduces readers to global brain singularity through a logical meditation on the temporal dynamics of the universal process Global brain singularity is conceived of as a future metasystem of human civilization that represents a qualitatively higher coherence of order To better understand the potential of this phenomenon the book begins with an overview of universal history The focus then shifts to the structure of human systems and the notion that contemporary global civilization must mediate the emergence of a commons that will transform the future of politics economics and psychosocial life in general In this context the book presents our species as biocultural evolutionary agents attempting to create a novel and independent domain of technocultural evolution that affords us new levels of freedom Lastly the book underscores the internal depths of the present moment structured by a division between subject and object The nature of the interaction between subject and object would appear to govern the mechanics of a spiritual process that is key to understanding the meaning of singularity inclusive of observers Given its scope the book will appeal to readers interested

in systems approaches to the emerging world society especially historians philosophers and social scientists *Future Primal* Louis G. Herman, 2013 To address global political unrest and ecological collapse political science professor Herman presents ways to incorporate the wisdom of the hunter gatherer culture of the San Bushmen of southern Africa into modern Western culture *Kondratieff waves* Brian J. L. Berry, Leonid E. Grinin, Andrey V. Korotayev, Philippe Jourdon, Lucas Bernard, Aleksandr V. Gevorkyan, Tom Palley, Willi Semmler, William R. Thompson, Arno Tausch, Denis J. Dean, Euel Elliott, Jonas Van Vossle, Peter Herrmann, Stephen I. Ternyik, Leo Nefiodow, Simone Nefiodow, Anton L. Grinin, Valentina M. Bondarenko, Nikolai D. Kondratieff, Barry K. Gills, Robert A. Denemark, 2015-05-29 In the period from the 1920s to 1930s the theory of economic cycles underwent dramatic changes Due to the research of such famous economists as Nikolay Kondratieff Joseph Kitchin Wesley Mitchell Simon Kuznets and Joseph Schumpeter the idea of a whole system of economic cycles with characteristic periods between two and sixty years was developed The idea of a system of intertwined economic cycles is nowadays paramount to the school of evolutionary economics and its development promises rather interesting future outcomes That is why this issue of our Kondratieff Waves Yearbook is devoted to the interconnections between various economic cycles As to the subtitle of this volume one should note that many of the contributors refer to the system of cycles and the fact that real economic cycles make up a system whereas among different types of cycles the Juglar Kuznets and Kondratieff cycles are the most important ones for the present day economic dynamics Although Kondratieff himself considered long waves as above all an economic phenomenon the theory of the long waves became however very actively developed in connection with their political and geopolitical aspects In this Yearbook the political aspect of Kondratieff waves is the subject of several articles in the second section The last section of this Yearbook is devoted to the heritage of Kondratieff and other prominent economists The year 2015 marks the 150th anniversary of the outstanding Russian economist one of the most prominent researchers of medium term economic cycles Mikhail Tugan Baranovsky and the volume is concluded with Kondratieff's article about him Concerning 2015 we should mention another anniversary namely 30 years since the death of Simon Kuznets 1901-1985 This edition will be useful for economists social scientists as well as for a wide range of those interested in the problems of the past present and future of global economy and globalization To Explain It All Chris Edwards, 2020-02-21 World history is not a subject it is all the subjects Because of this world history as a discipline has never fit well with the traditional definition of historical research H G Wells wrote the first true book of world history in 1920 and only a few authors have made the attempt to explain it all since Wells In that time world history has become the chosen subject of polymaths and possesses the most potential to unite all of the fields of knowledge The subject of world history has developed several approaches with Big History being the most modern and flawed of its variants **The History Manifesto** Joanna Guldi, David Armitage, 2014-10-02 A call to arms to historians and everyone interested in history in contemporary society This title is also available as Open Access *Architects of World History* Kenneth R. Curtis, Jerry H.

Bentley,2014-02-05 Architects of World History presents an innovative collection of original essays by leading scholars associated with World History exploring through intellectual autobiography the ideas challenges and inspirations that are shaping the field Features original accessible contributions from pioneering scholars in the field Offers insights into the process of developing a workable world history research topic and the experience of professional life as a world historian Points to methodological challenges the scholar s current research agenda in relation to the development of world history and future directions anticipated for key areas within world history **Methods for Human History** Patrick

Manning,2020-09-28 This book presents a concise yet comprehensive survey of methods used in the expanding studies of human evolution paying particular attention to new work on social evolution The first part of the book presents principal methods for the study of biological cultural and social evolution plus migration group behavior institutions politics and environment The second part provides a chronological and analytical account of the development of these methods from 1850 to the present showing how multidisciplinary rose to link physical biological ecological and social sciences The work is especially relevant for readers in history and social sciences but will be of interest to readers in biological and ecological fields who are interested in exploring a wide range of evolutionary studies Big History Cynthia Stokes Brown,2012-11-06 This exciting saga crosses space and time to illustrate how humans born of stardust were shaped and how they in turn shaped the world we know today Publishers Weekly This book offers world history on a grand scale pulling back for a wider view and putting the relatively brief time span of human history in context After all our five thousand years of recorded civilization account for only about one millionth of the lifetime of our planet Kirkus Reviews Big History interweaves different disciplines of knowledge drawing on both the natural sciences and the human sciences to offer an all encompassing account of history on Earth This new edition is more relevant than ever before as we increasingly grapple with accelerating rates of change and ultimately the legacy we will bequeath to future generations Here is a path breaking portrait of our world from the birth of the universe from a single point the size of an atom to life on a twenty first century planet inhabited by seven billion people
