## **Marconis Atlantic Leap:**

**Marconi's Atlantic Leap** Gordon Bussey, 2000 The year 2001 is the centenary year of the first wireless signal in Morse code to be transmitted across the Atlantic This work provides an account of how Marconi proved to the scientists that the curvature of the earth was not an obstacle for telegraphy over great distances

**Marconi My Beloved** Maria Cristina Marconi, 2002-04 When in 1895 twenty one year old Guglielmo Marconi made his first wireless transmission over land he became the boy wonder of the world When subsequently he made similar transmissions across the Atlantic Ocean thus proving to the world that his radio related inventions had immediate and wide spread applications for all of humanity young Marconi ushered in the Age of Communication The life the works the character of one of the greatest scientists of this Century Guglielmo Marconi the inventor of the Radio are described in this carefully documented impassioned and deeply involved book by an exceptional witness his wife Maria Cristina He was called The genius who gave a voice to silence Acclaimed by the whole world the recipient of the most prestigious honours and decorations he never lost his innate modesty and discretion even at the height of his success

**Thunderstruck** Erik Larson, 2006-10-24 A true story of love murder and the end of the world s great hush In Thunderstruck Erik Larson tells the interwoven stories of two men Hawley Crippen a very unlikely murderer and Guglielmo Marconi the obsessive creator of a seemingly supernatural means of communication whose lives intersect during one of the greatest criminal chases of all time Set in Edwardian London and on the stormy coasts of Cornwall Cape Cod and Nova Scotia Thunderstruck evokes the dynamism of those years when great shipping companies competed to build the biggest fastest ocean liners scientific advances dazzled the public with visions of a world transformed and the rich outdid one another with ostentatious displays of wealth Against this background Marconi races against incredible odds and relentless skepticism to perfect his invention the wireless a prime catalyst for the emergence of the world we know today Meanwhile Crippen the kindest of men nearly commits the perfect murder With his unparalleled narrative skills Erik Larson guides us through a relentlessly suspenseful chase over the waters of the North Atlantic Along the way he tells of a sad and tragic love affair that was described on the front pages of newspapers around the world a chief inspector who found himself strangely sympathetic to the killer and his lover and a driven and compelling inventor who transformed the way we communicate

The Oxford Handbook of Industrial Archaeology Eleanor Casella, Michael Nevell, Hanna Steyne, 2022 Through international and multi period chapters this volume explores the origins and development of industrialization from its emergence in 18th century Europe to its contemporary ubiquity It interrogates the widespread exploitation of natural resources that forged industrialization and its environmental and social legacy in our globalized world

**Marconi** Marc Raboy, 2016-06-28 A little over a century ago the world went wireless Cables and all their limiting inefficiencies gave way to a revolutionary means of transmitting news and information almost everywhere instantaneously By means of Hertzian waves as radio waves were initially known ships could now make contact with other

ships saving lives such as on the doomed S S Titanic financial markets could coordinate with other financial markets establishing the price of commodities and fixing exchange rates military commanders could connect with the front lines positioning artillery and directing troop movements Suddenly and irrevocably time and space telescoped beyond what had been thought imaginable Someone had not only imagined this networked world but realized it Guglielmo Marconi As Marc Raboy shows us in this enthralling and comprehensive biography Marconi was the first truly global figure in modern communications Born to an Italian father and an Irish mother he was in many ways stateless working his cosmopolitanism to advantage Through a combination of skill tenacity luck vision and timing Marconi popularized and more critically patented the use of radio waves Soon after he burst into public view at the age of 22 with a demonstration of his wireless apparatus in London 1896 he established his Wireless Telegraph Signal Company and seemed unstoppable He was decorated by the Czar of Russia named an Italian Senator knighted by King George V of England and awarded the Nobel Prize for Physics all before the age of 40 Until his death in 1937 Marconi was at the heart of every major innovation in electronic communication courted by powerful scientific political and financial interests He established stations and transmitters in every corner of the globe from Newfoundland to Buenos Aires Hawaii to Saint Petersburg Based on original research and unpublished archival materials in four countries and several languages Raboy s book is the first to connect significant parts of Marconi s story from his early days in Italy to his groundbreaking experiments to his protean role in world affairs Raboy also explores Marconi s relationships with his wives mistresses and children and examines in unsparing detail the last ten years of the inventor s life when he returned to Italy and became a pillar of Benito Mussolini s fascist regime Raboy s engrossing biography which will stand as the authoritative work of its subject proves that we still live in the world Marconi created

*Probing the Sky with Radio Waves* Chen-Pang Yeang, 2013-07-02 By the late nineteenth century engineers and experimental scientists generally knew how radio waves behaved and by 1901 scientists were able to manipulate them to transmit messages across long distances What no one could understand however was why radio waves followed the curvature of the Earth Theorists puzzled over this for nearly twenty years before physicists confirmed the zig zag theory a solution that led to the discovery of a layer in the Earth s upper atmosphere that bounces radio waves earthward the ionosphere In *Probing the Sky with Radio Waves* Chen Pang Yeang documents this monumental discovery and the advances in radio ionospheric propagation research that occurred in its aftermath Yeang illustrates how the discovery of the ionosphere transformed atmospheric science from what had been primarily an observational endeavor into an experimental science It also gave researchers a host of new theories experiments and instruments with which to better understand the atmosphere s constitution the origin of atmospheric electricity and how the sun and geomagnetism shape the Earth s atmosphere This book will be warmly welcomed by scholars of astronomy atmospheric science geoscience military and institutional history and the history and philosophy of science and technology as well as by radio amateurs and electrical

engineers interested in historical perspectives on their craft     **It's Part of What We Are - Volumes 1 and 2 - Volume 1: Richard Boyle (1566-1643) to John Tyndall (1820-1893); Volume 2: Samuel Haughton (18210-1897) to John Stewart Bell (1928-1990)** Charles Mollan, 2007-11-15 Biographies of more than 100 Irish scientists or those with strong Irish connections in the disciplines of Chemistry and Physics including Astronomy Mathematics etc describing them in their Irish and international scientific social educational and political context Written in an attractive informal style for the hypothetical educated layman who does not need to have studied science Well received in Irish and international reviews

**The Network** Scott Woolley, 2016-04-26 The astonishing story of America's airwaves the two friends one a media mogul the other a famous inventor who made them available to us and the government which figured out how to put a price on air This is the origin story of the airwaves the foundational technology of the communications age as told through the forty year friendship of an entrepreneurial industrialist and a brilliant inventor David Sarnoff the head of RCA and equal parts Steve Jobs Jack Welch and William Randolph Hearst was the greatest supporter of his friend Edwin Armstrong developer of the first amplifier the modern radio transmitter and FM radio Sarnoff was convinced that Armstrong's inventions had the power to change the way societies communicated with each other forever He would become a visionary captain of the media industry even predicting the advent of the Internet In the mid 1930s however

when Armstrong suspected Sarnoff of orchestrating a cadre of government officials to seize control of the FM airwaves he committed suicide Sarnoff had a very different view of who his friend's enemies were Many corrupt politicians and corporations saw in Armstrong's inventions the opportunity to commodify our most ubiquitous natural resource the air This early alliance between high tech and business set the precedent for countless legal and industrial battles over broadband and licensing bandwidth many of which continue to influence policy and debate today **My Father, Marconi** Degna
