Making Software Teams Effective Chaehan So, 2010 How does good teamwork emerge Can we control mechanisms of teamwork The author has analyzed these questions in a study involving 227 participants of 55 software development teams First he empirically confirmed his teamwork model based on innovation research goal setting and control theory Second he measured the impact of a wide selection of agile practices on these teamwork mechanisms Third he explained these impacts based on a thorough review of current psychological research This book is intended for people working in agile contexts as they will gain insight into the complexity of how good teamwork emerges This insight on team dynamics may also prove valuable for upper management for calibrating agile practices and soft factors thus increasing the effectiveness of software teams **Fast Software Encryption** Orr Dunkelman, 2009-07-13 FastSoftwareEncryption2009 was the 16th in a series of workshops on symmetric key cryptography Starting from 2002 it is sponsored by the International Association for Cryptologic Research IACR FSE 2009 was held in Leuven Belgium after previous venues held in Cambridge UK 1993 1996 Leuven Belgium 1994 2002 Haifa Israel 1997 Paris France 1998 2005 Rome Italy 1999 New York USA 2000 Yokohama Japan 2001 Lund Sweden 2003 New Delhi India 2004 Graz Austria 2006 Luxembourg Luxembourg 2007 and Lausanne Switzerland 2008 The workshop's main topic is symmetric key cryptography including the design of fast and secure symmetric key primitives such as block ciphers stream ciphers hash functions message authentication codes modes of operation and iteration as well as the theoretical foundations of these primitives This year 76 papers were submitted to FSE including a large portion of papers on hash functions following the NIST SHA 3 competition whose workshop was held just after FSE in the same location From the 76 papers 24 were accepted for presentation It is my pleasure to thank all the authors of all submissions for the high quality research which is the base for the scientific value of the workshop The review process was thorough each submission received the attention of at least three reviewers and at the end besides the accepted papers the Committee decided that the merits of the paper Blockcipher Based Hashing Revisited entitled the authors to receive the best paper award I wish to thank all Committee members and the referees for their hard and dedicated work Encyclopaedia of Mathematics Michiel Hazewinkel, 2013-12-01 This ENCYCLOPAEDIA OF MATHEMATICS aims to be a reference work for all parts of mathematics

It is a translation with updates and editorial comments of the Soviet Mathematical Encyclopaedia published by Soviet Encyclopaedia Publishing House in five volumes in 1977 1985 The annotated translation consists of ten volumes including a special index volume There are three kinds of articles in this ENCYCLOPAEDIA First of all there are survey type articles dealing with the various main directions in mathematics where a rather fine subdivision has been used The main requirement for these articles has been that they should give a reasonably complete up to date account of the current state of affairs in these areas and that they should be maximally accessible On the whole these articles should be understandable to mathematics students in their first specialization years to graduates from other mathematical areas and depending on the specific subject to specialists in other domains of science engineers and teachers of mathematics These articles treat their material at a fairly general level and aim to give an idea of the kind of problems techniques and concepts involved in the area in question They also contain background and motivation rather than precise statements of precise theorems with detailed definitions and technical details on how to carry out proofs and constructions The second kind of article of medium length contains more detailed concrete problems results and techniques
