Mathematical Science Technology And Economic Competition:

Mathematical Sciences, Technology, and Economic Competitiveness National Research Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Board on Mathematical Sciences, 1991-02-01 This book describes the contributions of mathematics to the nation's advanced technology and to economic competitiveness. Examples from five industries: aircraft, petroleum, automotive, semiconductor, and telecommunications illustrate how mathematics enters into and improves industry. Mathematical Sciences Technology and Economic Competitiveness addresses these high technology industries and breadth of mathematical endeavors in the United States as they materially contribute to the technology base from which innovation in these industries flows. The book represents a serious attempt by the mathematics community to bring about an awareness by policymakers of the pervasive influence of mathematics in everyday life. *Science, Technology, and Global Economic Competitiveness* United States. SBIR Program Diversity and Assessment Challenges National Research Council, Policy and Global Affairs, Committee on Capitalizing on Science, Technology, and Innovation: An Assessment of the Small Business Innovation Research Program, 2004-10-20 In response to a Congressional mandate the National Research Council conducted a review of the Small Business Innovation Research Program (SBIR) at the five federal agencies with SBIR programs with budgets in excess of 100 million: DOD, NIH, NASA, DOE, and NSF. The project was designed to answer questions of program operation and effectiveness including the quality of the research projects being conducted under the SBIR program, the commercialization of the research, and the program's contribution to accomplishing agency missions. The first in a series to be published in response to the Congressional request, this report summarizes the presentations at a symposium convened at the beginning of the project. The report provides a comprehensive overview of the SBIR program's operations at the five agencies responsible for 96 percent of the program's operations. *Summary of Activities of the Committee on Science and Technology, U.S. House of Representatives, for the One Hundred Tenth Congress* United States. An Assessment of the SBIR Program at the National Institutes of Health National Research Council, Policy and Global Affairs, Committee for Capitalizing on Science, Technology, and Innovation: An Assessment of the Small Business Innovation Research Program, 2009-03-02 The SBIR program allocates 2.5 percent of 11 federal agencies' extramural R & D budgets to fund R & D projects by small businesses providing approximately 2 billion annually in competitive awards. At the request of Congress, the National Academies conducted a comprehensive study of how the SBIR program has stimulated technological innovation and used small businesses to meet federal research and development needs. Drawing substantially on new data collection, this book examines the SBIR program at the National Institutes of Health and makes recommendations for improvements. Separate reports will assess the SBIR program at DOD, NSF, DOE, and NASA respectively, along with a comprehensive report on the entire program.

An Assessment of the SBIR Program at the Department of Energy National Research Council, Policy and Global Affairs, Committee for Capitalizing on Science, Technology, and Innovation: An Assessment of the Small Business Innovation Research Program, 2008-09-26 The Small Business Innovation Research SBIR program is one of the largest examples of U S public private partnerships Founded in 1982 SBIR was designed to encourage small business to develop new processes and products and to provide quality research in support of the many missions of the U S government including health energy the environment and national defense In response to a request from the U S Congress the National Research Council assessed SBIR as administered by the five federal agencies that together make up 96 percent of program expenditures This book one of six in the series reports on the SBIR program at the Department of Energy It finds that in spite of resource constraints the DoE has made significant progress in meeting the legislative objectives of SBIR and that the program is effectively addressing the mission of the Department of Energy The book documents the achievements and challenges of the program and recommends programmatic changes to make the SBIR program even more effective in achieving its legislative goals

An Assessment of the SBIR Program at the National Aeronautics and Space Administration National Research Council, Policy and Global Affairs, Committee for Capitalizing on Science, Technology, and Innovation: An Assessment of the Small Business Innovation Research Program, 2009-03-27 The Small Business Innovation Research SBIR program is one of the largest examples of U S public private partnerships Founded in 1982 SBIR was designed to encourage small business to develop new processes and products and to provide quality research in support of the many missions of the U S government including health energy the environment and national defense In response to a request from the U S Congress the National Research Council assessed SBIR as administered by the five federal agencies that together make up 96 percent of program expenditures This book one of six in the series reports on the SBIR program at the National Aeronautics and Space Administration and finds that the program is making significant progress in achieving the Congressional goals for the program Keeping in mind NASA s unique mission and the recent significant changes to the program the committee found the SBIR program to be sound in concept and effective in practice at NASA The book recommends programmatic changes that should make the SBIR program even more effective in achieving its legislative goals **SBIR at the National Science**

Foundation National Academies of Sciences, Engineering, and Medicine, Policy and Global Affairs, Board on Science, Technology, and Economic Policy, Committee on Capitalizing on Science, Technology, and Innovation: An Assessment of the Small Business Innovation Research Programâ–Phase II, 2016-01-17 The Small Business Innovation Research SBIR program is one of the largest examples of U S public private partnerships and was established in 1982 to encourage small businesses to develop new processes and products and to provide quality research in support of the U S government s many missions The U S Congress tasked the National Research Council with undertaking a comprehensive study of how the SBIR program has stimulated technological innovation and used small businesses to meet federal research and development needs and with

recommending further improvements to the program In the first round of this study an ad hoc committee prepared a series of reports from 2004 to 2009 on the SBIR program at the five agencies responsible for 96 percent of the program s operations including the National Science Foundation NSF Building on the outcomes from the first round this second round presents the committee s second review of the NSF SBIR program s operations Public private partnerships like SBIR are particularly important since today s knowledge economy is driven in large part by the nation s capacity to innovate One of the defining features of the U S economy is a high level of entrepreneurial activity Entrepreneurs in the United States see opportunities and are willing and able to assume risk to bring new welfare enhancing wealth generating technologies to the market Yet although discoveries in areas such as genomics bioinformatics and nanotechnology present new opportunities converting these discoveries into innovations for the market involves substantial challenges The American capacity for innovation can be strengthened by addressing the challenges faced by entrepreneurs
