Mathematics Plus Physics Lectures On Recent Results:

Tropical and Idempotent Mathematics Grigoriĭ Lazarevich Litvinov, S. N. Sergeev, 2009 This volume is a collection of papers from the International Conference on Tropical and Idempotent Mathematics held in Moscow Russia in August 2007 This is a relatively new branch of mathematical sciences that has been rapidly developing and gaining popularity over the last decade Tropical mathematics can be viewed as a result of the Maslov dequantization applied to traditional mathematics over fields Importantly applications in econophysics and statistical mechanics lead to an explanation of the nature of financial crises Another original application provides an analysis of instabilities in electrical power networks Idempotent analysis tropical algebra and tropical geometry are the building blocks of the subject Contributions to idempotent analysis are focused on the Hamilton Jacobi semigroup the max plus finite element method and on the representations of eigenfunctions of idempotent linear operators Tropical algebras consisting of plurisubharmonic functions and their germs are examined The volume also contains important surveys and research papers on tropical linear algebra and tropical convex geometry

Scientific & Mathematical Bodies SungWon Hwang, Wolff-Michael Roth, 2011-11-19 This book is about the sensuous living body without which individual knowing and learning is impossible It is the interface between the individual and culture Recent scholarship has moved from investigated knowing and learning as something in the mind or brain to understanding these phenomena in terms of the body embodiment literature or culture social constructivism These two literatures have expanded the understanding of cognition to include the role of the body in shaping the mind and to recognize the tight relation between mind and culture However there are numerous problems arising from ways in which the body and culture are thought in these separate research domains In this book the authors present an interdisciplinary scientific initiative that brings together the concerns for body and for culture to develop a single theory of cognition centered on the living and lived body This book thereby contributes to bridging the gap that currently exists between theory knowing that and praxis

knowing how that is apparent in the existing science and mathematics education literatures **Subject Guide to Books in Print**, 1993 Books in Print Supplement, 1994 Books in Print, 1991 Resources in Education, 2001-10 **Applied Mechanics Reviews**, 1966 **New Scientist**, 1969 **The American Mathematical Monthly**, 1922 Includes section Recent publications *A Functional Description of the Edvac [an Automatically-sequence Serial Binary Electronic Digital Computer]* Moore School of Electrical Engineering, 1949 **High Energy Physics Index**, 1969 Which Degree?, 1977 Which University, 1973 Notices of the American Mathematical Society American Mathematical Society, 1993
