ISBN 978 65 00 98107 0      **Everything, Briefly** Thomas O. Scarborough, 2022-06-14 As a man thinks so is he Personally and socially so is he Yet if this is true then as a man thinks has led us into the thick of global crisis What exactly is it about our thinking that fails us What has gone so wrong There are firm reasons why we may hope for new direction Firstly we have a new view of the connectedness of all things Never before has this encompassed so much It makes a crucial difference to philosophy Secondly when we recast philosophy s high level concepts in more concrete terms it becomes possible to discuss them without confusion This is the method of this book There is much of interest for the theologian too Legendary film director Ingmar Bergman once wrote What will happen to us who want to believe but can not His can not had to do with what Professor Karen Barad calls the hegemony of physics Everything Briefly details why it is impossible in fact to believe in a closed universe of cause and effect      *Fuzzy TOPSIS* Mohamed El Alaoui, 2021-05-26 This book aims to justify the use of fuzzy logic as a logic and as an uncertainty theory in the decision making context It also discusses the development of the TOPSIS method Technique for Order of Preference by Similarity to Ideal Solution with related examples and MATLAB codes This is the first book devoted to TOPSIS and its fuzzy versions It presents the use of fuzzy logic as a logic and as an uncertainty theory in the decision making content and discusses the development of the TOPSIS method in classical and fuzzy context The book justifies the use of fuzzy logic as an uncertainty theory and provides illustrative examples for each fuzzy TOPSIS extension along with related MATLAB codes and case studies This book is for industrial engineers operations research engineers systems engineers and production engineers working in the areas of decision analysis multi criteria decision making and multiple objective optimization      *Applying Algebra to Everyday Life* Erik Richardson, 2016-07-15 Much more than finding x algebra forms the basis to describe any process that has variation Everyday numbers like money and time are common variables In this book key concepts from algebra such as lines polynomials and the quadratic formula are shown at work in surprising applications including industrial baking robotics and the natural world      Surfing through Hyperspace Clifford A. Pickover, 2001-05-17 Do a little armchair time travel rub elbows with a four dimensional intelligent life form or stretch your mind to the furthest corner of an uncharted universe With this astonishing guidebook Surfing Through Hyperspace you need not be a mathematician or an astrophysicist to explore the all but unfathomable concepts of hyperspace and higher dimensional geometry No subject in mathematics has intrigued both children and adults as much as the idea of a fourth dimension Philosophers and parapsychologists have meditated on this mysterious space that no one can point to but may be all around us Yet this extra dimension has a very real practical value to mathematicians and physicists who use it every day in their calculations In the tradition of Flatland and with an infectious enthusiasm Clifford Pickover tackles the problems inherent in our 3 D brains trying to visualize a 4 D world muses on the religious implications of the existence of higher dimensional consciousness and urges all curious readers to venture into the unexplored territory lying beyond the prison of the obvious Pickover alternates sections that explain the science of hyperspace with sections that dramatize mind

expanding concepts through a fictional dialogue between two futuristic FBI agents who dabble in the fourth dimension as a matter of national security This highly accessible and entertaining approach turns an intimidating subject into a scientific game open to all dreamers *Surfing Through Hyperspace* concludes with a number of puzzles computer experiments and formulas for further exploration inviting readers to extend their minds across this inexhaustibly intriguing scientific terrain
