**Resources in Education**, 2001-10    **Attitude Structure and Function** Anthony R. Pratkanis, Steven J.

Breckler, Anthony G. Greenwald, 2014-03-18 Utilizing new wave research including new psychological theories new statistical techniques and a stronger methodology this collection unites a diversity of recent research perspectives on attitudes and the psychological functions of an attitude The objective of the editors was to bring together the bits and pieces of validated data into one systematic and adequate set of general principles leading to the view of attitudes as predictions As the volume reformulates old concepts explores new angles and seeks a relationship among various sub areas it also shows improvements in the sophistication of research designs and methodologies the specifications of variables and the precision in defining concepts    **Subject Guide to Books in Print**, 1993    *Educational Resources for Microcomputers*, 1986    **Verbal**

**Protocols of Reading** Michael Pressley, Peter Afflerbach, 2012-12-06 Researchers from a variety of disciplines have collected verbal protocols of reading as a window on conscious reading processes Because such work has occurred in different disciplines many who have conducted verbal protocol analyses have been unaware of the research of others This volume brings together the existing literature from the various fields in which verbal protocols of reading have been generated In so doing the authors provide an organized catalog of all conscious verbal processes reported in studies to date the most complete analysis of conscious reading now available in the literature When the results of all of the studies are considered there is clear support for a number of models of reading comprehension including reader response theories schema perspectives executive processing models and bottom up approaches such as the one proposed by van Dijk and Kintsch The summary of results also demonstrates that none of the existing models goes far enough Thus a new framework constructively responsive reading is described This new model encompasses reader response schematic and executive processing and induction from word and phrase level comprehension to higher order meaning The important concept in this new model is that readers respond to bits and pieces of text as they are encountered all as part of the overarching goal of constructing meaning from text This volume also includes a critical review of the thinking aloud methodology as it has been used thus far This examination suggests that it continues to be an immature methodology and that much work is needed if a complete theory of conscious processing during reading is to be developed via verbal protocol analysis Finally after reviewing what has been accomplished to date the authors provide extensive discussion of the work that remains to be done and the adequacy of the verbal protocol methodology for permitting telling conclusions about text processing    National Assessment of
