International Handbook of Mathematics Education Alan J.

Bishop, 1996 This Handbook presents an overview and analysis of the international state of the field of mathematics education at the end of the 20th century The more than 150 authors editors and chapter reviewers involved in its production come from a range of countries and cultures They have created a book of 36 original chapters in four sections surveying the variety of practices and the range of disciplinary interconnections which characterise the field today and providing perspectives on the study of mathematics education for the 21st century It is first and foremost a reference work and will appeal to anyone seeking up to date knowledge about the main developments in mathematics education These will include teachers student teachers and student researchers starting out on a serious study of the subject as well as experienced researchers teacher educators educational policy makers and curriculum developers who need to be aware of the latest areas of knowledge development

Handbook of Research on Mathematics Teaching and Learning Douglas Grouws, 2006-11-01

Sponsored by the National Council of Teachers of Mathematics and written by leading experts in the field of mathematics education the Handbook is specifically designed to make important vital scholarship accessible to mathematics education professors graduate students educational researchers staff development directors curriculum supervisors and teachers The Handbook provides a framework for understanding the evolution of the mathematics education research field against the backdrop of well established conceptual historical theoretical and methodological perspectives It is an indispensable working tool for everyone interested in pursuing research in mathematics education as the references for each of the Handbook's twenty nine chapters are complete resources for both current and past work in that particular area

The Handbook of Mathematics Teacher Education: Volume 2, 2008-01-01 The Handbook of Mathematics Teacher Education the first of its kind addresses the learning of mathematics teachers at all levels of schooling to teach mathematics and the provision of activity and programmes in which this learning can take place It consists of four volumes Volume 2 Tools and Processes in Mathematics Teacher Education focuses on the how of mathematics teacher education In this volume the authors share with the readers their invaluable experience in employing different tools in mathematics teacher education This accumulated experience could assist teacher educators researchers in mathematics education and those involved in policy decisions on teacher education in making decisions about both the tools and the processes to be used for various purposes in mathematics teacher education There are four sections The first describes and discusses four successful ways of using cases in mathematics teacher education including narratives mathematics case discussions video recordings and lesson studies The second presents predominant tools that are used in mathematics teacher education two textual tools written tasks and examples and two physical tools manipulatives and machines The third section suggests ways in which the accumulated research on common students ways of thinking contributes to the development of tools and processes in mathematics teacher

education The last section provides critical response and general perspective raising questions such as How can the teaching of mathematics be used as a tool to promote general educational values What are the dimensions of proficient teaching The concluding chapter offers a provisional framework consisting of a set of seven dimensions of proficiency for teaching mathematics Together the chapters provide various promising tools and processes for facilitating the acquisition of major proficiencies needed for teaching mathematics and principles that could guide the selection and use of such tools

International Handbook of Mathematical Learning

Difficulties Annemarie Fritz,Vitor Geraldi Haase,Pekka Räsänen,2019-01-30 This comprehensive volume provides teachers researchers and education professionals with cutting edge knowledge developed in the last decades by the educational behavioural and neurosciences integrating cognitive developmental and socioeconomic approaches to deal with the problems children face in learning mathematics The neurocognitive mechanisms and the cognitive processes underlying acquisition of arithmetic abilities and their significance for education have been the subject of intense research in the last few decades but the most part of this research has been conducted in non applied settings and there s still a deep discrepancy between the level of scientific knowledge and its implementation into actual educational settings Now it s time to bring the results from the laboratory to the classroom Apart from bringing the theoretical discussions to educational settings the volume presents a wide range of methods for early detection of children with risks in mathematics learning and strategies to develop effective interventions based on innovative cognitive test instruments It also provides insights to translate research knowledge into public policies in order to address socioeconomic issues And it does so from an international perspective dedicating a whole section to the cultural diversity of mathematics learning difficulties in different parts of the world All of this makes the International Handbook of Mathematical Learning Difficulties an essential tool for those involved in the daily struggle to prepare the future generations to succeed in the global knowledge society

Educational Research in the Asia-Pacific Region J.P. Keeves,Ryo Watanabe,2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of

the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region
