Frameworks: Mastery, Logic and Reasoning in the Classroom Linda (Yuqian) Wang, Jeremy Dawson, Chris Brown, 2023-11-24

This book highlights the essential relationship between lesson planning and key mathematical elements such as mastery and reasoning. The exemplification of ideas through useful classroom strategies gives the book a practical basis as well as theoretical. I have no doubt that even experienced teachers will find this book enlightening and encourage them to re-evaluate elements of their practice.

Hayley Hands, Secondary PGCE Mathematics Lead, Newcastle University, UK.

Developing Maths Lesson Planning and Frameworks provides much food for thought and includes many immediate take-aways to reflect on or try out. This book will help enhance any maths teacher's lesson planning from the trainee teacher to the experienced practitioner.

Rose Marie Rochester, Archimedes NE Maths Hub Lead, BHCET Director of Maths, UK.

Addressing the maths skills gap

Wang et al propose a new method for maths lesson planning that harnesses the power of reasoning in mathematics teaching. Using a pedagogical approach called the Causal Connectivity Framework (CCF), this book helps teachers to support students in actively discovering the logical foundations upon which classroom activities are linked together. The authors have diverse expertise and experiences as maths teachers, teacher educators and researchers, and this alternative approach is the result of long-term collaboration aimed at building up successful maths lessons from the very first steps of lesson planning.

Developing Maths Lesson Planning and Frameworks Offers practical advice within a theoretical framework. Ties in with UK National Curriculum requirements. Contains detailed practical examples and visual aids throughout.

Reasoning is a critical component of maths learning, making this essential reading for maths teachers and teacher trainees as they help students to achieve maths mastery.

Linda Wang is Assistant Professor and PGCE secondary maths Lead at Durham University, UK. She is particularly interested in curriculum design at both secondary and lower primary level mathematics and developing the educational impact partnership model to deliver Continuing Professional Development (CPD) to future orientate Mathematics education.
