**Pioneering Conservation in Alaska** Ken Ross, 2017-10-01 A companion volume to *Environmental Conflict in Alaska* *Pioneering Conservation in Alaska* chronicles the central land and wildlife issues and the growth of environmental conservation in Alaska during its Russian and territorial eras The Alaskan frontier tempted fur traders whalers salmon fishers gold miners hunters and oilmen to take what they could without regard for long term consequences Wildlife species ecosystems and Native cultures suffered sometimes irreparably Damage to wildlife and lands drew the attention of environmentalists including John Muir who applied their influence to enact wildlife protection laws and set aside lands for conservation Alaska served as a testing ground for emergent national resource policy in the United States as environmental values of species and ecosystem sustainability replaced the unrestrained exploitation of Alaska's early frontier days Efforts of conservation leaders and the territory's isolation small human population and late development prevented widespread destruction and gave Americans a unique opportunity to protect some of the world's most pristine wilderness Enhanced by more than 100 photographs *Pioneering Conservation in Alaska* illustrates the historical precedents for current natural resource disputes in Alaska and will fascinate readers interested in wildlife and conservation

**The Dawn of Conservation Diplomacy** Kurkpatrick Dorsey, 2009-11-17 In the first decades of the twentieth century fish in the Great Lakes and Puget Sound seals in the North Pacific and birds across North America faced a common threat over harvesting that threatened extinction for many species Progressive era conservationists saw a need for government

intervention to protect threatened animals And because so many species migrated across international political boundaries their protectors saw the necessity of international conservation agreements In *The Dawn of Conservation Diplomacy* Kurkpatrick Dorsey examines the first three comprehensive wildlife conservation treaties in history all between the United States and Canada the Inland Fisheries Treaty of 1908 the North Pacific Fur Seal Convention of 1911 and the Migratory Bird Treaty of 1916 In his highly readable text Dorsey argues that successful conservation treaties came only after conservationists learned to marshal scientific evidence public sentiment and economic incentives in their campaigns for protective legislation The first treaty intended to rescue the overfished boundary waters failed to gain the necessary support and never became law Despite scientific evidence of the need for conservation politicians and the general public were unable to counter the vocal opposition of fishermen across the continent A few years later conservationists successfully rallied popular sympathy for fur seals threatened with slaughter and the North Pacific Fur Seal Convention was adopted By the time of the Migratory Bird Treaty of 1916 the importance of aesthetic appeal was clear North American citizens were joining chapters of the Audubon Society in efforts to protect beautiful songbirds Conservationists also presented economic evidence to support their efforts as they argued that threatened bird species provided invaluable service to farmers Dorsey recounts the story of each of these early treaties examining the scientific research that provided the basis for each effort acknowledging the complexity of the issues and presenting the personalities behind the politics He argues that these decades old treaties both directly affect us today and offer lessons for future conservation efforts
