This is the second in a series of comprehensive annual reference guides to the use of computers in all the disciplines of the humanities Like its predecessor this volume provides a taxonomy of the field and an annotated survey of publications research centers text archives and termbanks electronic communications software and hardware relevant to the humanities It also includes special larger entries for important software that offer up to date information and practical help in applying that information to research projects and instruction in colleges and universities For the 1989 1990 edition Lancashire has for the first time appointed an international advisory board of specialists to assist in discovering assembling and evaluating materials for inclusion and to keep up with the rapidly developing nature of the field and its international constituency Lancashire has included many completely new or revised sections including a major new chapter on computing in Law A monumental work of current and enduring value The Humanities Computing Yearbook will prove invaluable to a wide range of students teachers and researchers in humanities and social sciences computational linguistics and related fields in computer science

Atomic Bomb Cinema Jerome F. Shapiro,2013-05-13 Unfathomably merciless and powerful the atomic bomb has left its indelible mark on film In *Atomic Bomb Cinema* Jerome F Shapiro unearths the unspoken legacy of the bombing of Nagasaki and Hiroshima and its complex aftermath in American and Japanese cinema According to Shapiro a Bomb film is never simply an exercise in ideology or paranoia He examines hundreds of films like *Godzilla* *Dr Strangelove* and *The Terminator* as a body of work held together by ancient narrative and symbolic traditions that extol survival under devastating conditions Drawing extensively on both English language and Japanese language sources Shapiro argues that such films not only grapple with our nuclear anxieties but also offer signs of hope that humanity is capable of repairing a damaged and divided world [www atomicbombcinema com](http://www.atomicbombcinema.com)

Antiquarian Book Monthly Review ,1988 **Official Gazette of the United States Patent and Trademark Office** ,1990 **Artbibliographies Modern** ,1988 Abstracts of journal articles books essays exhibition catalogs dissertations and exhibition reviews The scope of ARTbibliographies Modern extends from artists and movements beginning with Impressionism in the late 19th century up to the most recent works and trends in the late 20th century Photography is covered from its invention in 1839 to the present A particular emphasis is placed upon adding new and lesser known artists and on the coverage of foreign language literature Approximately 13 000 new entries are added each year Published with title LOMA from 1969 1971 Energy Research Abstracts ,1989 The Facial Nerve E. Stennert,O. Michel,2012-12-06 The intention of the VIIth International Symposium on the Facial Nerve was to create a platform for an extensive exchange of knowledge and scientific information between clinicians and basic research

workers This aim could only be realized on the basis of a common interest in the facial nerve which unites the interdisciplinary scientific efforts of otologists neurosurgeons facial plastic surgeons neurologists neurophysiologists and neuroanatomists Therefore a meeting of this kind remains in its aim to exchange ideas over scientific disciplines which do not come unique together normal conditions The symposium has been held every four years since 1966 The VIIth symposium was preceded by symposia in Stockholm 1966 Osaka 1970 Zurich 1976 Los Angeles 1980 Bordeaux 1984 and Rio de Janeiro 1988 and marked an important milestone in the continuously developing knowledge about the facial nerve its physiology disorders diagnostics and treatment In contrast to the previous meetings this symposium extended in invitations to both clinicians and basic research workers More than 350 scientists from 25 different nations met in Cologne Germany in June 1992 and their high level presentations contributed to the overwhelming success of this international meeting The symposium took place in the vicinity of the old cathedral of Cologne itself a vivid symbol of never ending efforts to create something perfect and lasting

Transplantation into the Mammalian CNS, 1988-12-01 Transplantation into the Mammalian CNS *Laminins* Peter Ekblom, R. Timpl, 1996-09-01 This work provides detailed knowledge about the molecular features of the laminins and describes the structure function relationships and interactions that define their biologically active domains Many of the discoveries concerning the tissue specific laminins and the role of different laminins are addressed By covering topics such as gene coding for laminins genetic diseases affecting laminins evolutionary aspects embryonic development apoptosis neurite outgrowth and cancer this study provides a basis for understanding the role of laminins in development and disease

Low Temperature Molecular Spectroscopy Rui Fausto, 2013-11-11 Molecular spectroscopy has achieved rapid and significant progress in recent years the low temperature techniques in particular having proved very useful for the study of reactive species phase transitions molecular clusters and crystals superconductors and semiconductors biochemical systems astrophysical problems etc The widening range of applications has been accompanied by significant improvements in experimental methods and low temperature molecular spectroscopy has been revealed as the best technique in many cases to establish the connection between experiment and theoretical calculations This in turn has led to a rapidly increasing ability to predict molecular spectroscopic properties The combination of an advanced tutorial standpoint with an emphasis on recent advances and new perspectives in both experimental and theoretical molecular spectroscopy contained in this book offers the reader insight into a wide range of techniques particular emphasis being given to supersonic jet and matrix isolation techniques spectroscopy in cryogenic solutions including liquid noble gases and in both crystalline and amorphous states Suitable quantum chemical methods are also considered as are empirically based force field methods for calculating spectra of large molecular systems The wide range of topics covered includes molecular dynamics and reactivity time resolved and high resolution spectroscopy conformational analysis hydrogen bonding and solvent effects structure and dynamics of weakly bound complexes transition metal and organic photochemistry spectroscopy of excited states ab initio
