The Matrix Larry Wachowski, 2001 Stranger Than Fiction Zach Helm, 2006-11-10 In this strange and delightful tale an IRS agent named Harold Crick suddenly finds himself the subject of a narration only he can hear narration that soon affects everything from his work to his love life to his death Starring Will Ferrell Maggie Gyllenhaal Dustin Hoffman Queen Latifah and Emma Thompson *Stranger Than Fiction* is a heartfelt film perhaps a comedy perhaps a tragedy about love and literature and death and taxes *Bakhtin's Adventure* Benjamin Paloff, 2025-05-15 A bold rereading of Mikhail Bakhtin's groundbreaking theories A century after Mikhail Bakhtin first began formulating his now canonical reflections on freedom and literary representation we often seem as confused as ever about the relationship between narrative form and what it means to live ethically Focusing on the throughline of adventure in Bakhtin's thought we find a peculiar yet no less ethically urgent challenge not to imagine the literary hero as if they were a real person but to recognize how we are always imagining real people as if they were literary characters This is a provocation with far reaching consequences for how we understand ourselves each other and our situatedness in space and time In Bakhtin's *Adventure An Essay on Life without Meaning* Benjamin Paloff argues that the major aesthetic ethical and sociological threads of Bakhtin's thought intersect in his concept of adventure Reading across a wide variety of media from classic literature to contemporary film Paloff demonstrates how for Bakhtin and his interlocutors the test of human freedom is whether narrative means nothing beyond its own adventure Reframed in this light Bakhtin's most influential ideas eventness chronotope heteroglossia polyphony carnival form a cohesive model for how to maintain ethical relations in a world where we can never really know each other the way we know ourselves The Freudian Robot Lydia H. Liu, 2011-05-23 The identity and role of writing has evolved in the age of digital media But how did writing itself make digital media possible in the first place Lydia H Liu offers here the first rigorous study of the political history of digital writing and its fateful entanglement with the Freudian unconscious Liu's innovative analysis brings the work of theorists and writers back into conversation with one another to document significant meetings of minds and disciplines She shows how the earlier avant garde literary experiments with alphabetical writing and the word association games of psychoanalysis contributed to the mathematical making of digital media Such intellectual convergence she argues completed the transformation of alphabetical writing into the postphonetic ideographic system of digital media which not only altered the threshold of sense and nonsense in communication processes but also compelled a new understanding of human machine interplay at the level of the unconscious Ranging across information theory cybernetics modernism literary theory neurotic machines and psychoanalysis *The Freudian Robot* rewrites the history of digital media and the literary theory of the twentieth century **Texts** Peter Childs, 2006-09-27 Being able to analyse different types of text is an essential skill for students of literature *Texts* is a new kind of book which shows students how to use literary theory to approach a wide range of literary cultural and media texts of the kind studied on today's courses These texts range from

short stories autobiographies political speeches websites and lyrics to films such as The Matrix and Harry Potter and from television s Big Brother to shopping malls celebrities and rock videos Each chapter combines an introduction to the text and aspects of its critical reception with an analysis using one of sixteen key approaches from established angles like feminism postcolonial studies and deconstruction to newer areas such as ecocriticism trauma theory and ethical criticism Each chapter also indicates alternative ways of reading the text by drawing on other critical approaches

Teaching Religion and Film Gregory J Watkins, 2008-08-22 In a culture increasingly focused on visual media students have learned not only to embrace multimedia presentations in the classroom but to expect them Such expectations are perhaps more prevalent in a field as dynamic and cross disciplinary as religious studies but the practice nevertheless poses some difficult educational issues the use of movies in academic coursework has far outpaced the scholarship on teaching religion and film What does it mean to utilize film in religious studies and what are the best ways to do it In Teaching Religion and Film an interdisciplinary team of scholars thinks about the theoretical and pedagogical concerns involved with the intersection of film and religion in the classroom They examine the use of film to teach specific religious traditions religious theories and perspectives on fundamental human values Some instructors already teach some version of a film and religion course and many have integrated film as an ancillary to achieving central course goals This collection of essays helps them understand the field better and draws the sharp distinction between merely watching movies in the classroom and comprehending film in an informed and critical way

Baudrillard and the Media William Merrin, 2005 Baudrillard and the Media is the first in depth critical study of Jean Baudrillard s media theory Rejecting the common positioning of Baudrillard within the discipline as a postmodernist it argues instead for the necessity of a fuller reading of his ideas and critical project Merrin offers an

overview and evaluation of his key arguments and themes focusing especially upon the organising principle of his work his theory of symbolic exchange and critique of the semiotic and of simulation Upon this basis the book also resituates Baudrillard within media theory developing an original critical re reading of his relationship with McLuhanism and arguing for the significance instead of hitherto neglected influences such as Boorstin Emphasizing his critical value and contemporary relevance Baudrillard and the Media also provides the most detailed exploration yet of Baudrillard s theory of the non event considering its applicability through case studies of his controversial analyses of the Gulf War of 9 11 and the Afghan and Iraq Wars and of his own appearance in the film The Matrix Considering also Baudrillard s discussion of cinema his theory and personal practice of photography and his critique of new media the book concludes with an evaluation of his place within media and communication studies and an argument for his importance for this field Students and scholars of the media and media theory in particular will welcome this clear and comprehensive study

Racial Stigma on the Hollywood Screen from World War II to the Present Brian Locke, 2009-11-23 Racial Stigma on the Hollywood Screen from WWII to the Present charts how the dominant white and black binary of American racial discourse influences Hollywood s representation of the Asian The Orientalist buddy film draws a scenario in which two buddies one white and one black transcend an initial hatred for one another by joining forces against a foreign Asian menace Alongside an analysis of multiple genres of film Brian Locke argues that this triangulated rendering of race ameliorates the longstanding historical contradiction between U S democratic ideals and white America s persistent domination over blacks

Gibson , Feminist Time Against Nation Time Victoria Hesford,Lisa Diedrich,2009-12-01 Feminist Time Against Nation Time offers a series of essays that explore the complex and oftentimes contradictory relationship between feminism and nationalism through a problematization of temporality Although there has been much recent discussion in the U S of the wars in Afghanistan and Iraq and the War on Terror as signaling a new period of permanent war feminist voices have not been at all prominent in this discussion This collection considers not only the ways in which public spaces for dissent are limited but also the ways in which the time for such dissent is cut short Feminist Time Against Nation Time combines philosophical examinations of Women s Time by Julia Kristeva and The Time of Thought by Elizabeth Grosz with essays offering case studies of particular events including Kelly Oliver s essay on the media coverage of the U S wars on terror and in Afghanistan and Iraq and Betty Joseph s on the anti colonial uses of women s time in the creation of nineteenth century Indian

nationalism Feminist Time Against Nation Time juxtaposes feminist time against nation time in order to consider temporalities that are at once contrary to but also drawing toward each other Yet Hesford and Diedrich also argue that because as an untimely project feminism necessarily operates in a different temporality from that of the nation againstness is also used to provoke a rupture a momentary opening up of a disjuncture between the two that will allow us to explore the possibilities of creating a space and time for feminists to think against the current of the present moment

Transhumanism David Livingstone, 2015-09-02 Transhumanism is a recent movement that extols man's right to shape his own evolution by maximizing the use of scientific technologies to enhance human physical and intellectual potential While the name is new the idea has long been a popular theme of science fiction featured in such films as 2001 A Space Odyssey Blade Runner the Terminator series and more recently The Matrix Limitless Her and Transcendence However as its adherents hint at in their own publications transhumanism is an occult project rooted in Rosicrucianism and Freemasonry and derived from the Kabbalah which asserts that humanity is evolving intellectually towards a point in time when man will become God Modeled on the medieval legend of the Golem and Frankenstein they believe man will be able to create life itself in the form of living machines or artificial intelligence Spearheaded by the Cybernetics Group the project resulted in both the development of the modern computer and MK Ultra the CIA's mind control program MK Ultra promoted the mind expanding potential of psychedelic drugs to shape the counterculture of the 1960s based on the notion that the shamans of ancient times used psychoactive substances equated with the apple of the Tree of Knowledge And as revealed in the movie Lucy through the use of smart drugs and what transhumanists call mind uploading man will be able to merge with the Internet which is envisioned as the end point of Kabbalistic evolution the formation of a collective consciousness or Global Brain That awaited moment is what Ray Kurzweil a director of engineering at Google refers to as The Singularity By accumulating the total of human knowledge and providing access to every aspect of human activity the Internet will supposedly achieve omniscience becoming the God of occultism or the Masonic All Seeing Eye of the reverse side of the American dollar bill
