## **Matter Of Time Inscribed:**

*Matters of Inscription* Christina A. León, 2024-08-13 A compelling exploration of materiality and semiotics in Latinx inscriptions Writers and artists from Cuba Puerto Rico and Latinx New York operate under the pressures of inscription the material and semiotic entanglement of making a mark as a marked artist By employing layered material tropes and figures such as stone dust viscera and animality their works do not represent a singular Latinx experience and instead must be read at the margin of language and matter *Matters of Inscription* explores feminist and queer inscriptions of Latinidad encompassing the intersections of materiality and semiotics in art performance poetry plays and fiction By delving into these figural matters Christina A León highlights how writers and artists such as Zilia Sánchez Ana Mendieta Manuel Ramos Otero Mar a Irene Forn s Justin Torres and Roque Salas Rivera forge material inscriptions that transcend individual lives and call for a broader analytical perspective unmoored from biographical anchors The book urges readers to reevaluate the notion of difference which has momentarily sought solace in identitarian terminology León engages in rhetorical analysis that reassesses how the terms of Latinx studies have been challenged and how they are failing Rather than categorizing texts based on predetermined taxonomic terms or individual subjects lives the book tracks figures situated at the edges of materiality and semiosis This approach addresses the continuous marginalization and dispossession that shape the phenomenon of Latinx identity latinidad by recentering conceptual questions of origin diaspora pedagogy and belonging The book contends that losses and deprivations should be rendered incommensurate to avoid collapsing the richness of different experiences or scales of ontological debasement By focusing on the interplay of materiality and semiotics *Matters of Inscription* challenges conventional approaches that seek to homogenize and anticipate what Latinx might mean and instead calls for a more capacious and nuanced analysis that goes beyond individual biographies

*A Laboratory of Her Own* Victoria L. Ketz, Dawn Smith-Sherwood, Debra Faszler-McMahon, 2021-01-15 *A Laboratory of Her Own* gathers diverse voices to address women s interaction with STEM fields in the context of Spanish cultural production This volume focuses on the many ways the arts and humanities provide avenues for deepening the conversation about how women have been involved in excluded from and represented within the scientific realm While women s historic exclusion from STEM fields has been receiving increased scrutiny worldwide women within the Spanish context have been perhaps even more peripheral given the complex sociocultural structures emanating from gender norms and political ideologies dominant in nineteenth and twentieth century Spain Nonetheless Spanish female cultural producers have long been engaged with science and technology as expressed in literature art film and other genres Spanish arts and letters offer diverse representations of the relationships between women gender sexuality race and STEM fields *A Laboratory of Her Own* studies representations of a diverse range of Spanish women and scientific cultural products from the late nineteenth through the twenty first centuries STEM topics include the environment biodiversity temporal and spatial theories medicine and reproductive rights neuroscience robotics

artificial intelligence and quantum physics These scientific themes and other issues are analyzed in narratives paintings poetry photographs science fiction medical literature translation newswriting film and other forms

**Life in the Cosmos** Manasvi Lingam, Avi Loeb, 2021-06-29 Are we alone in the universe It is a captivating question but one that historically eluded proper scientific investigation The new discipline of astrobiology changes the game introducing rigor to the quest for extraterrestrial life Life in the Cosmos surveys the field showing how cutting edge research is closing in on the answers out there

*The Alien Communication Handbook* Brian S. McConnell, 2021-10-18 Scientists have been searching for signals from extraterrestrial civilizations since Frank Drake's first radio survey in 1960 But what would actually happen if SETI's search succeeds Is there any way we could even make sense of the signal we receive Written by an expert in communication systems and translation technology this book explores the science of interstellar communication It explains how this process may unfold how an ET communication link would work the types of information it could convey and how professionals amateurs and ordinary people like you would participate in the effort to understand what another civilization has to say Along the way the book introduces readers to many aspects of modern day communication systems and computing Featured as well are dozens of illustrations photos and real world examples rounding out this compelling foray into the mechanics of interstellar communication Scientists policy makers and all interested in the likely future discovery of alien life will want to read this book

**Memory, Metaphors, and Meaning** Nicolae Babuts, 2017-07-05 Literature explores the human condition the mystery of the world life and death as well as our relations with others and our desires and dreams It differs from science in its aims and methods but Babuts shows in other respects that literature has much common ground with science Both aim for an authentic version of truth To this end literature employs metaphors and it does so in a manner similar to that of scientific inquiry The cognitive view does not imply that there is a one to one correlation between the world and text that meaning belongs to the author or that literature is equivalent to perception What it does maintain is that meaning is crucially dependent on mnemonic initiatives and that without memory the world remains meaningless Nicolae Babuts claims that at the interface with the printed page readers process texts in a manner similar to the way they explain the visible world in segments or units of meaning or dynamic patterns Babuts argues that humans achieve recognition by integrating stimulus sequences with corresponding patterns that recognize and interpret each segment of a text Memory produces meaning from these patterns In harmony with its goals memory may adopt specific strategies to deal with different stimuli Dynamic patterns link the unit of processing with the unit of meaning In sum Babuts proposes that meaning is achieved through metaphors and narrative and that both are ways to

reach cognitive goals This original study offers perspectives that will interest cognitive psychologists as well as those simply interested in the process through which literature stirs the human imagination Account of the Discovery of Inscribed Tablets J. Gass,1877 *Writing Matters* Irene Berti,Katharina Bolle,Fanny Opdenhoff,Fabian Stroth,2017-08-21 This edited volume includes a compilation of new approaches to the investigation of inscriptions from different cultural contexts Innovative research questions about material text cultures are examined with reference to Classical Athens late ancient and Byzantine churches and urban spaces Hellenistic and Roman cities and medieval buildings Storied Deserts Celina Osuna,Aidan Tynan,2024-06-28 Storied Deserts makes a crucial and critical intervention in the field of environmental humanities by showcasing an emerging body of research on desert places from around the world Deserts despite dominant stereotypes of wasteland and barrenness are culturally and ecologically abundant places This edited volume sets out to reimagine the world s desert places and the very concept of the desert itself taking a boldly interdisciplinary and multicultural approach Authors engage in literary ecocriticism and ecopoetics film and visual studies critical theory personal and transdisciplinary reflection creative practices and historical scholarship Through their diverse range of perspectives contributors show how arid lands have been and can be understood as sites of narrative production places where signs and imaginaries are born from the materialities of space and entanglement In this way this volume highlights how the storied matter of the Earth s deserts informs lived realities environmental histories cinematic and literary imaginaries political conflicts and even intellectual categories such as the human and the elemental Ultimately this book shows that reimagining desert places can help us to grapple with the epochal challenges of the Anthropocene It is an important and engaging collection for scholars and students across disciplines that helps establish the value of desert humanities **Everybody's Guide To Money Matters** William Cotton, F.S.A,2021-01-01 THE Author emboldened by a Banking experience of over forty years offers this little work to the public in the hope that elementary though it be it may prove acceptable to many persons of both genders **The Ogam inscribed monuments of the Gaedhill in the British islands; with a dissertation on the Ogam character by Richard Rolt Brash.  science is dominated by textbook oriented approaches to teaching and learning Some surveys reveal that students have to  
 read depending on academic level between ten and thirty six pages per week from their textbook One therefore has to ask To  
 what degree do textbooks introduce students to the literary practices of their domain Few studies have addressed the quality  
 of science curriculum materials particularly textbooks from a critical perspective In this light we are concerned in this book  
 with better understanding the reading and interpretation practices related to visual materials here referred to as inscriptions  
 that accompany texts Our overarching questions included What practices are required for reading inscriptions and Do  
 textbooks allow students to develop levels of graphicacy required to critically read scientific texts Some of the more specific  
 questions included What are the practices of relating inscriptions captions and main text and What practices are required to  
 read inscriptions in school textbooks That is we are interested not only in understanding what it takes to interpret read and  
 understand visual materials i e inscriptions but also in understanding what it takes to engage inscriptions in a critical way It  
 is only when citizens can critically engage with language texts speech and inscriptions that they become knowledgeable  
 users of television newspapers and magazines who can choose or leave aside particular expressions as part of the particular  
 politics that they participate in     *Cmd* ,1955     *The Insurance Times* ,1876
