experimentation and innovation ecological restoration Veteran investigative reporter Paddy Woodworth has spent years traveling the globe and talking with people scientists politicians and ordinary citizens who are working on the front lines of the battle against environmental degradation At sites ranging from Mexico to New Zealand and Chicago to Cape Town Woodworth shows us the striking successes and a few humbling failures of groups that are attempting to use cutting edge science to restore blighted polluted and otherwise troubled landscapes to states of ecological health and in some of the most controversial cases to particular moments in historical time before widespread human intervention His firsthand field reports and interviews with participants reveal the promise power and limitations of restoration Ecological restoration alone won't solve the myriad problems facing our environment But Our Once and Future Planet demonstrates the role it can play and the hope inspiration and new knowledge that can come from saving even one small patch of earth **Forest and Rangeland**
