Representative Institutions In Renaissan:

Representative Institutions in Renaissance France, 1421-1559 James Russell Major, 1960 *The Monarchy, the Estates and the Aristocracy in Renaissance France* J. Russell Major, 2024-10-28 Professor Major's aim in these articles has been to stimulate new assessments of the political constitutional and social history of France in the 15th 17th centuries The first group examines the nature of the Renaissance monarchy its strengths and its weaknesses and lack of effective controls The next group explores the issue of why the Estates General and some of the provincial estates failed to develop in France in marked contrast to the triumph of representative government in England Finally the author turns to the question of how the nobles succeeded in remaining the dominant social class On the one hand he traces the evolution of a patron client relationship which compensated for the decay of the feudal ties of the Middle Ages on the other he challenges assumptions made of a decline in nobles incomes and contends that so long as they held on to their lands and could escape the depredations of war for most of the period they actually benefited from a marked increase in real income
