**Social Movements and Their Technologies** Stefania Milan,2013-11-06 Now in paperback for the first time *Social Movements and their Technologies* explores the interplay between social movements and their liberated technologies It analyzes the rise of low power radio stations and radical internet projects emancipatory

communication practices as a political subject focusing on the sociological and cultural processes at play. It provides an overview of the relationship between social movements and technology and investigates what is behind the communication infrastructure that made possible the main protest events of the past fifteen years. In doing so, Stefania Milan illustrates how contemporary social movements organize in order to create autonomous alternatives to communication systems and networks and how they contribute to change the way people communicate in daily life as well as try to change communication policy from the grassroots. She situates these efforts in a historical context in order to show the origins of contemporary communication activism and its linkages to media reform campaigns and policy advocacy. What is Hacktivism? In *The Coming Swarm*, rising star Molly Sauter examines the history, development, theory and practice of distributed denial of service actions as a tactic of political activism. The internet is a vital arena of communication, self-expression and interpersonal organizing. When there is a message to convey, words to get out or people to unify, many will turn to the internet as a theater for that activity. As familiar and widely accepted activist tools—petitions, fundraisers, mass letter writing, call-in campaigns and others—find equivalent practices in the online space, is there also room for the tactics of disruption and civil disobedience that are equally familiar from the realm of street marches, occupations and sit-ins? With a historically grounded analysis and a focus on early deployments of activist DDOS as well as modern instances to trace its development over time, *The Coming Swarm* uses activist DDOS actions as the foundation of a larger analysis of the practice of disruptive civil disobedience on the internet.

**Urban Mobilizations and New Media in Contemporary China** Lisheng Dong, Hanspeter Kriesi, 2016-03-09. Popular protests are on the rise in China. However, since protesters rely on existing channels of participation and on patronage by elite backers, the state has been able to stymie attempts to generalize resistance, and no large-scale political movements have significantly challenged party rule. Yet the Chinese state is not monolithic. Decentralization has increased the power of local authorities, creating space for policy innovations and opening up the political opportunity structure. Popular protest in China, particularly in the urban realm, not only benefits from the political fragmentation of the state but also from the political communications revolution. The question of how and to what extent the

internet can be used for mobilizing popular resistance in China is hotly debated The government virtual social organizations and individual netizens both cooperate and compete with each other on the web New media both increases the scope of the mobilizers and the mobilized thereby creating new social capital and provides the government with new means of social control thereby limiting the political impact of the growing social capital This volume is the first of its kind to assess the ways new media influence the mobilization of popular resistance and its possible effects in China today Civic Engagement in Changing Contexts Kerry J. Kennedy, 2022-01-07 This book addresses contemporary issues on civic and citizenship education challenging not just schools but society as a whole It highlights emerging social influences on civic engagement and democracy in the third decade of the 21st century and analyzes the interaction between these influences and their impact on society It demonstrates that changes are so complex and the challenges so new that an entirely revised agenda is needed for civic and citizenship education The book takes society and the changes occurring within it as the starting point and assesses the implications of these changes for schools

**Network Journalism** Ansgard Heinrich, 2011-04-26 Drawing on current theoretical debates in journalism studies and grounded in empirical research Heinrich here analyzes the interplay between journalistic practice and processes of globalization and digitalization She argues that a new kind of journalism is emerging characterized by an increasingly global flow of news as well as a growing number of news deliverers Within this transformed news sphere the roles of journalistic outlets change They become nodes arranged in a dense net of information gatherers producers and disseminators The interactive connections among these news providers constitute what Heinrich calls the sphere of network journalism

**Social Media, Politics and the State** Daniel Trottier, Christian Fuchs, 2014-07-17 This book is the essential guide for understanding how state power and politics are contested and exercised on social media It brings together contributions by social media scholars who explore the connection of social media with revolutions uprising protests power and counter power hacktivism the state policing and surveillance It shows how collective action and state power are related and conflict as two dialectical sides of social media power and how power and counter power are distributed in this dialectic Theoretically focused and empirically rigorous research considers the two sided contradictory nature of power in relation to social media and politics Chapters cover social media in the context of phenomena such as contemporary revolutions in Egypt and other countries populism 2010 anti austerity protests the fascist movement in Greece s crisis Anonymous and police surveillance

**Democracy, Participation and Contestation** Emmanuelle Avril, Johann N Neem, 2014-08-07 The establishment of democracy on both sides of the Atlantic has not been a smooth evolution towards an idealized presumed endpoint Far from it democratization has been marked by setbacks and victories a process often referred to as contested democracy In view of recent mobilizations such as the Arab Spring and the Occupy movement in which new technologies have played a key role there is a need for a renewed analysis of the long term evolution of US and UK political systems Using new areas of research this book argues that the ideals and the practices of Anglo American democracy can be

best understood by studying diverse forms of participation which go beyond classical expressions of contestation and dissent such as voting. The authors analyze political parties, social movements, communications, and social media governance, cultural diversity, identity politics, public-private actors, and social cohesion to illustrate how the structure and context of popular participation play a significant role in whether and when citizens' efforts have any meaningful impact on those who exercise political power. In doing so, the authors take crucial steps towards understanding how a vigorous public sphere and popular sovereignty can be made to work in today's global environment. This book will be of interest to students and scholars of political science, British and US history, democracy, political participation, governance, social movements, and politics.

**Digital Humanities in Latin America** Héctor Fernández L'Hoeste, Juan Carlos Rodríguez, 2023-05-02. A hemispheric view of the practice of digital humanities in the Spanish and Portuguese speaking Americas. As digital media and technologies transform the study of the humanities around the world, this volume provides the first hemispheric view of the practice of digital humanities in the Spanish and Portuguese speaking Americas. These essays examine how participation and research in new media have helped configure identities and collectivities in the region. Featuring case studies from throughout Latin America, including the United States, Latinx community contributors analyze documentary films, television series, and social media to show how digital technologies create hybrid virtual spaces and facilitate connections across borders. They investigate how Latinx bloggers and online activists navigate governmental restrictions in order to connect with the global online community. These essays also incorporate perspectives of race, gender, and class that challenge the assumption that technology is a democratizing force. *Digital Humanities in Latin America* illuminates the cultural, political, and social implications of the ways Latinx communities engage with new technologies. In doing so, it connects digital humanities research taking place in Latin America with that of the Anglophone world. Contributors: Paul Alonso, Morgan Ames, Eduard Arriaga, Anita Say Chan, Ricardo Dominguez, Orlando Luis Pardo Lazo, Héctor Fernández L'Hoeste, Jennifer M. Lozano, Ana L. G. **Transgression as a Mode of Resistance** Christina R. Foust, 2010-06-22. Since industrialization, two major theoretical perspectives have accompanied the vibrant practice of social change. The first, hegemony, emerged as a less deterministic route to revolution from Marxist theory and forms the common sense of social movement today. Within hegemonic resistance rhetoric, links, issues, ideas, and identities form a recognizable collective agent whose aim is to transform the status quo into its vision of the world. The second major mode of resistance, transgression, grows from anarchist and autonomous resistance to capitalism. Transgression attempts to free individuals' uniqueness and creative power by deconstructing authority and explicating the body in resistance. *Transgression as a Mode of Resistance: Rethinking Social Movement in an Era of Corporate Globalization* provides the conceptual mapping for scholars, students, and

practitioners to participate in the growing debate between these rich and powerful forces of social change Through a broad perspective on philosophy and history Christina R Foust demonstrates that hegemony and transgression are sometimes conflicting oftentimes inter related practices She responds to critics who believe that without a social change agent resistance appears baseless and na ve without a representational economy to cohere and express common interests social movement is impossible Through alternative social relationships and political performances transgressive resisters may reinvent daily life

**Theorizing Surveillance** David Lyon, 2006-08-01 This book is about explaining surveillance processes and practises in contemporary society Surveillance studies is a relatively new multi disciplinary enterprise the aims to understand who watches who how the watched participate in and sometimes question their surveillance why surveillance occurs and with what effects This book brings together some of the world s leading surveillance scholars to discuss the why question The field has been dominated since the groundbreaking work of Michel Foucault by the idea of panopticon and this book explores why this metaphor has been central in discussions of surveillance what is fruitful in the panoptic approach and what are the possible approaches can throw better light on the phenomena in question Since the advent of networked computer databases and especially since 9 11 questions of surveillance have come increasingly to the forefront of democratic political and policy debates in the global north and to an extent in the global South Civil liberties democratic participation and privacy are some of the issues that are raised by these developments But little progress can be made in responding to these issues without an adequate understanding of how how well and whether or not surveillance works This book explores the theoretical questions in a way that is grounded in and attuned to empirical realities

**Complexity and Social Movements** Graeme Chesters, Ian Welsh, 2006-11-22 Making use of complexity theory concepts from the natural and social sciences this informative book provides a framework for understanding mobilization identity formation and information flows in global social movements

**The Empire of Mind** Michael Strangelove, 2005-12-15 Where many critics see the Internet as an instrument of corporate hegemony Michael Strangelove sees something else an alternative space inhabited by communities dedicated to anarchic freedom culture jamming alternative journalism and resistance to authoritarian forms of consumer capitalism and globalization In The Empire of Mind Dr Strangelove the scholar Canadian Business referred to as the acknowledged dean of Internet entrepreneurs and Wired called the Canadian guru of Internet advertising presents the compelling argument that the Internet and new digital communication technology actually undermine the power of capital producing an alternative symbolic economy Strangelove contends that the Internet breaks with the capitalist logic of commodification and that while television produces a passive consumer audience Internet audiences are more active creative and subversive Writers activists and artists on the Internet undermine commercial media and its management of consumer behaviour a behaviour that is challenged by the Web s tendency toward the disintegration of intellectual property rights Case studies describe the invention of new meaning given to cultural and consumer icons like Barbie and McDonald s and explore

how novel modes of online news production alter the representation of the world as it is produced by the mainstream corporate press In the course of exploring new media The Empire of Mind also makes apparent that digital piracy will not be eliminated The Internet community effectively converts private property into public thereby presenting serious obstacles for the management of consumer behaviour and significantly eroding brand value Much to the dismay of the corporate sector online communities are disinterested in the ethics of private property In fact the entire philosophical framework on which capitalism is based is threatened by these alternative means of cultural production      **Citizens' Media Against Armed Conflict** Clemencia Rodríguez, Citizens media countering armed conflict and rebuilding community in Colombia

**Constituent Imagination** Stevphen Shukaitis, David Graeber, Erika Biddle, 2007 From the ivory tower to the barricades Radical intellectuals explore the relationship between research and resistance      **Cultural Studies and Environment, Revisited** Phaedra. C Pezzullo, 2013-10-31 The environment is perhaps most misunderstood as a static place somewhere out there separated from the practices of our everyday lives Given this assumption environmental movements and concerns have remained mostly marginalized or denigrated in cultural studies publications conferences and presentations Recent global developments have made changing this oversight and at times direct resistance to engaging environmental concerns a new priority This edited collection illustrates an appreciation of the dynamic palpable and significant ways the environment permeates culture and vice versa as well as a collective commitment to the ways that cultural studies has more to offer and to learn from taking environmental matters to heart Like foundational categories of identity economics and historical context this collection reminds us why the environment is and should be considered relevant to any work done in the name of cultural studies Including research from four continents and across media the authors offer insights on timely topics such as food tourism human animal relations forests queer theory indigenous rights and water This book was published as a special issue of Cultural Studies      Organising for Change Silke Roth, Clare Saunders, 2025-02-11 Based on decades of research this book explores global social change processes through the concepts of social change organisations SCOs and social change makers SCMs the individuals working within and alongside SCOs The book delves into a vast array of compelling social justice issues from tackling inequality to championing human rights bridging the realms of social movement and third sector research Inspiring and empowering this is essential reading for scholars students NGOs and activists alike
