Trump, White Evangelical Christians, and American Politics Anand Edward Sokhey, Paul A. Djupe, 2024-03-05 In *Trump White Evangelical Christians and American Politics* political scientists Anand Edward Sokhey and Paul A Djupe bring together a wide range of scholars and writers to examine the relationship between former President Donald Trump and white American evangelical Christians They argue that while this relationship which saw evangelicals supporting a famously unfaithful materialistic and irreligious candidate despite self defining in opposition to these characteristics prompted many to wonder if Trump himself transformed American evangelical religion in politics this alliance reflected both change and the outcome of dynamics that were in place or building for decades Contributors contextualize the Trump presidency within the story of religious demographic change the growth of politicized religion nationalistic religious expression and the ways religion and politics in the United States are enmeshed in the politics of race These investigations find that the idea of religious transformation is not accurate Instead the years 2015 to 2022 saw mainly minor changes to the ways religion appeared in public life but these changes ultimately complemented and advanced an existing white evangelical strategy to increase political and social power as they became a demographic minority in the United States Taken together this collection reveals new insights for readers seeking to understand the religious dimensions of Trump s rise the reasons evangelicals become political activists and the multifaceted alliances between secular politicians and conservative religious subcultures Contributors Abraham Barranca Ruth Braunstein Ryan P Burge David E Campbell Jeremiah J Castle Paul A Djupe John C Green Sarah Heise Geoffrey C Layman Andrew R Lewis Gerardo Mart Eric L McDaniel Napp Nazworth Shayla F Olson Enrique Quezada Llanes Kaylynn Sims Anand Edward Sokhey Hilde L vdal Stephens Kyla K Stepp Allan Tellis

Johnston,Sheldon Zhang,2022-02-24 Although contemporary China is a repressive state protests and demonstrations have increased almost tenfold between 2005 and 2015 This is an astounding statistic when one considers that Marxist Leninist regimes of the past tolerated little or no public dissent How can protests become so common in an autocratic state What are the trends of repression and mobilization This collection helps to answer these compelling questions through in depth analyses of several Chinese protest movements and state responses The chapters examine the opportunities and constraints for protest mobilization and explains their importance for understanding contemporary Chinese society Theories of Political Protest and Social Movements Karl-Dieter Opp,2009-04-08

Political protest and social movements are ubiquitous phenomena This book focuses on the current theoretical approaches that aim at explaining them the theory of collective action the resource mobilization perspective political opportunity structure theory the identity approach the framing perspective and the dynamics of contention approach The book has three objectives 1 Many basic concepts like political opportunities or identity are not clearly defined It is further often a matter of interpretation what factors are supposed to affect which phenomena The first aim is therefore to provide a detailed introduction to and a clear restatement of the

theories Only then is it possible to assess and improve them 2 For each theory the major strengths and weaknesses are discussed and various modifications and extensions are suggested 3 Building on these analyses it is shown how the theories can be integrated into a single theoretical paradigm the structural cognitive model

The Politics of Police Reform Erica Marat, 2018-03-01 There is a Russian saying that police mirror society The gist of this is that every society is policed to the extent that it allows itself to be policed Centralized in control but decentralized in their reach the police are remarkably similar in structure chain of command and their relationships with the political elite across post Soviet nations they also remain one of the least reformed post communist institutions As a powerful state organ the Soviet style militarized police have resisted change despite democratic transformations in the overall political context including rounds of competitive elections and growing civil society While consensus between citizens and the state about reform may be possible in democratic nations it is considerably more difficult to achieve in authoritarian states Across post Soviet countries such discussions most often occur between political elites and powerful non state actors such as criminal syndicates and nationalistic ethnic groups rather than the wider citizenry Even in countries where one or more rounds of democratic elections have taken place since 1991 empowered citizens and politicians have not renegotiated the way states police and coerce society On the contrary in many post Soviet countries police functions have expanded to serve the interests of the ruling political elites What does it take to reform a post Soviet police force This book explores the conditions in which a meaningful transformation of the police is likely to succeed and when it will fail Departing from the conventional interpretation of the police as merely an institution of coercion this book defines it as a medium for state society consensus on the limits of the state's legitimate use of violence It thus considers policing not as a way to measure the state's capacity to coerce society but rather as a reflection of a complex society bound together by a web of casual interactions and political structures The book compares reform efforts in Ukraine Georgia Kyrgyzstan Kazakhstan and Tajikistan finding that bottom up public mobilization is likely to emerge in the aftermath of transformative violence an incident when the usual patterns of policing are interrupted with unprecedented brutality against vulnerable individuals Ultimately The Politics of Police Reform examines the various pathways to transforming how the state relates to society through policing
