Reproducing The State:

Reproducing the State Jacqueline Stevens, 1999-08 People are said to acquire their affiliations of ethnicity race and sex at birth Hence these affiliations have long been understood to be natural independent of the ability of political societies to define who we are Reproducing the State vigorously challenges the conventional view as well as post structuralist scholarship that minimizes state power Jacqueline Stevens examines birth based theories of membership and group affiliations in political societies ranging from the Athenian polis to tribes of Australia to the French republic to the contemporary United States The book details how political societies determine the kinship rules that are used to reproduce political societies Stevens analyzes the ways that ancestral and territorial birth rules for membership in political societies pattern other intergenerational affiliations She shows how the notion of ethnicity depends on the implicit or explicit invocation of a past present or future political society She also shows how geography is used to represent political regions including continents as the seemingly natural underpinning for racial taxonomies perpetuated through miscegenation laws and birth certificates And Stevens argues that sex differences are also constituted through membership practices of political societies In its chronological and disciplinary range Reproducing the State will reward the interest of scholars in many fields including anthropology history political science sociology women s studies race studies and ethnic studies **The State,**

Specially the American State, Psychologically Treated Denton Jaques Snider, 1902 [The Rules of Programming](#) Chris Zimmerman, 2022-12-09 This philosophy of programming guide presents a unique and entertaining take on how to think about programming A collection of 21 pragmatic rules each presented in a standalone chapter captures the essential wisdom that every freshly minted programmer needs to know and provides thought provoking insights for more seasoned programmers Author Chris Zimmerman cofounder of the video game studio Sucker Punch Productions teaches basic truths of programming by wrapping them in memorable aphorisms and driving them home with examples drawn from real code This practical guide also helps managers looking for ways to train new team members The rules in this book include As simple as possible but no simpler Let your code tell its own story Localize complexity Generalization takes three examples Work backward from your result not forward from your code The first lesson of optimization is don t optimize A good name is the best documentation Bugs are contagious Eliminate failure cases Code that isn t running doesn t work Sometimes you just need to hammer the nails **State and Statehood in the Global South** Miriam Fahimi, Elmar Flatschart, Wolfram

Schaffar, 2022-04-19 This book focuses on critical approaches to the state and state theory in the Global South In light of the reemergence of the post colonial and peripheral state as a crucial institution and actor in the 21st century s capitalist world system the book examines the nature functions and development dynamics of the state in the periphery as well as its constituting interests and struggles Drawing on the works of Poulantzas and Gramsci dependency and world systems theory as well as the regulation school and the German Ableitungsdebatte stategraphy and critical realism it analyzes the

development of different theoretical perspectives on the state elaborates on their theoretical ontological and epistemological presuppositions and illustrates their methodological practical and ethical implications The book is divided into three parts the first of which provides an overview of recent global capitalist developments and challenges for state theory and lays the theoretical ontological and hermeneutic foundation for studies of the state and statehood in the Global South In turn the second part introduces readers to different schools of state theory including critical theory and materialism as well as approaches derived from postcolonial anthropological and feminist thought Lastly the third part presents various empirical studies highlighting concrete methodological and practical experiences of conducting critical state theory

Statistical Approaches for Hidden Variables in Ecology Nathalie Peyrard,Olivier Gimenez,2022-03-08 The study of ecological systems is often impeded by components that escape perfect observation such as the trajectories of moving animals or the status of plant seed banks These hidden components can be efficiently handled with statistical modeling by using hidden variables which are often called latent variables Notably the hidden variables framework enables us to model an underlying interaction structure between variables including random effects in regression models and perform data clustering which are useful tools in the analysis of ecological data This book provides an introduction to hidden variables in ecology through recent works on statistical modeling as well as on estimation in models with latent variables All models are illustrated with ecological examples involving different types of latent variables at different scales of organization from individuals to ecosystems Readers have access to the data and R codes to facilitate understanding of the model and to adapt inference tools to their own data

Indian Foreign Policy Priya Chacko, 2013-06-17 The rise of India as a major power has generated new interest in understanding the drivers of its foreign policy This book argues that analysing India's foreign and security policies as representational practices which produce India's identity as a postcolonial nation state helps to illuminate the conditions of possibility in which foreign policy is made Spanning the period between 1947 and 2004 the book focuses on key moments of crisis such as the India China war in 1962 and the nuclear tests of 1972 and 1998 and the approach to international affairs of significant leaders like Jawaharlal Nehru The analysis sheds new light on these key events and figures and develops a strong analytical narrative around India's foreign policy behaviour based on an understanding of its postcolonial identity It is argued that a prominent facet of India's identity is a perception that it is a civilizational state which brings to international affairs a tradition of morality and ethical conduct derived from its civilizational heritage and the experience of its anti colonial struggle This notion of civilizational exceptionalism as well as other narratives of India's civilizational past such as its vulnerability to invasion and conquest have shaped the foreign policies of governments of various political hues and continue to influence a rising India

People - States - Territories Rhys Jones, 2011-07-26

People States Territories examines the role of state personnel in shaping and being shaped by state organizations and territories and demonstrates how agents have actively contributed to the reproduction and transformation of the British state over the long term A valuable corrective to recent characterizations of territory as a static and given geographical concept

An explication of the political geographies of state reproduction and transformation through its focus on state territoriality and the variegated character of state power Considerable empirical insight into the consolidation of the British state over the long term **State of New York Supreme Court Appellate Division First Department Case On Appeal , *State of New York Supreme Court ,***
