**Social Stratification in an Aging Society with Low Fertility** Sawako Shirahase,2022-08-31 This edited book empirically discusses stratification in contemporary Japanese society It is unique for its examination of social inequality in relation to declining fertility and an aging population Japan is the most aged society in the world according to the Statistics

Bureau of Japan people who are aged 65 and above comprised 29.1% of the country's total population in 2021. Meanwhile, the fertility rate has continuously declined since the mid 1970s. Japan experienced a dramatic change in its demographic structure in a short period of time. Such fast change could be a major factor that generated social stratification. In her industrialization, Japan was thought to share a pattern of social stratification similar to that of developed European and North American countries but with a low degree of socio-economic inequality and a high degree of homogeneity. There is no clear support for this description of Japan although the country does share a pattern and degree of social stratification similar to that observed in Europe and North America. The social stratification theory has been developed in close relationship to the labor market; however, it is necessary to further examine the social stratification of very aged societies in which a substantial number of the population, namely retired persons, no longer have any ties to the labor market. In this book, the contributors explore the pattern of social stratification at three life stages: young, middle-aged, and elderly. Included are discussions of various aspects of stratification such as education, work, wealth, marriage, family, gender, generation, and social attitudes.

*IBSS: Political Science: 2002 Vol.51* Compiled by the British Library of Political and Economic Science, 2004-03-01. First published in 1952, the International Bibliography of the Social Sciences (anthropology, economics, political science, and sociology) is well established as a major bibliographic reference for students, researchers, and librarians in the social sciences worldwide. Key features: Authority: rigorous standards are applied to make the IBSS the most authoritative selective bibliography ever produced. Articles and books are selected on merit by some of the world's most expert librarians and academics. Breadth: today the IBSS covers over 2000 journals, more than any other comparable resource. The latest monograph publications are also included. International Coverage: the IBSS reviews scholarship published in over 30 languages, including publications from Eastern Europe and the developing world. User-friendly organization: all non-English titles are in word sections. Extensive author, subject, and place name indexes are provided in both English and French. **Education, Inequality and Social Class** Ron Thompson, 2019-02-25. *Education, Inequality and Social Class* provides a comprehensive discussion of the empirical evidence for persistent inequality in educational attainment. It explores the most important theoretical perspectives that have been developed to understand class-based inequality and frame further research. With clear explanations of essential concepts, this book draws on empirical data from the UK and other countries to illustrate the nature and scale of inequalities according to social background, discussing the interactions of class-based inequalities with those according to race and gender. The book relates aspects of inequality to the features of educational systems, showing how policy choices impact on the life chances of children from different class backgrounds. The relationship between

education and social mobility is also explored using the concepts of social closure positionality and social congestion The book also provides detailed discussions of the work of Pierre Bourdieu and Basil Bernstein two important theorists whose contributions have generated thriving research traditions much used in contemporary educational research Education Inequality and Social Class will be essential reading for postgraduate and advanced undergraduate students engaged in the study of education childhood studies and sociology It will also be of great interest to academics researchers and teachers in training
