 Stredney,2006-12-15 MMVR offers solutions for problems in clinical care through the phenomenally expanding potential of
 computer technology Computer based tools promise to improve healthcare while reducing cost a vital requirement in today s
 economic environment This seventh annual MMVR focuses on the healthcare needs of women Women every where demand
 more attention to breast cancer cervical cancer ageing related conditions Electronic tools provide the means to revolutionise
 diagnosis treatment and education The book demonstrates what new tools can improve the care of their female patients As
 minimally invasive procedures are mainstreamed advanced imaging and robotics tools become indispensable The internet
 and other networks establish new venues for communication and research Medical education as well as clinical care is
 enhanced by systems allowing instruction and professional interaction in ways never before possible and with efficiency
 never before achieved Telemedicine networks now permit providers to meet patients needs where previously impossible
 MMVR strengthens the link between healthcare providers and their patients The volume contains selected papers authored
