Research Teams and Partnerships National Research Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Chemical Sciences Roundtable, 2000-02-03 The third workshop of the Chemical Sciences Roundtable Research Teams and Partnerships was held in Irvine California on May 2 3 1999 The presentations and discussions at the workshop considered the current status of research partnerships in the chemical sciences and methods to improve the ability to form and maximize such collaborations This volume presents the results of that workshop **Research Collaboration and Team Science** Barry Bozeman, Craig Boardman, 2014-05-16

Today in most scientific and technical fields more than 90% of research studies and publications are collaborative often resulting in high impact research and development of commercial applications as reflected in patents Nowadays in many areas of science collaboration is not a preference but literally a work prerequisite The purpose of this book is to review and critique the burgeoning scholarship on research collaboration The authors seek to identify gaps in theory and research and identify the ways in which existing research can be used to improve public policy for collaboration and to improve project level management of collaborations using Scientific and Technical Human Capital STHC theory as a framework Broadly speaking STHC is the sum of scientific and technical and social knowledge skills and resources embodied in a particular individual It is both human capital endowments such as formal education and training and social relations and network ties that bind scientists and the users of science together STHC includes the human capital which is the unique set of resources the individual brings to his or her own work and to collaborative efforts Generally human capital models have developed separately from social capital models but in the practice of science and the career growth of scientists the two are not easily disentangled Using a multi factor model the book explores various factors affecting collaboration outcomes with particular attention on institutional factors such as industry university relations and the rise of large scale university research centers

Energy Research at DOE National Research Council, Division on Engineering and Physical Sciences, Board on Energy and Environmental Systems, Committee on Benefits of DOE R&D on Energy Efficiency and Fossil Energy, 2001-12-12 In legislation appropriating funds for DOE s fiscal year FY 2000 energy R D budget the House Interior Appropriations Subcommittee directed an evaluation of the benefits that have accrued to the nation from the R D conducted since 1978 in DOE s energy efficiency and fossil energy programs In response to the congressional charge the National Research Council formed the Committee on Benefits of DOE R D on Energy Efficiency and Fossil Energy From its inception DOE s energy R D program has been the subject of many outside evaluations The present evaluation asks whether the benefits of the program have justified the considerable expenditure of public funds since DOE s formation in 1977 and unlike earlier evaluations it takes a comprehensive look at the actual outcomes of DOE s research over two decades Comparative Approach to Drivers, Trends, and Challenges in Online Higher Education: Pre- and Post-COVID-19 Amemado, Dodzi

Jean-Antoine, 2025-04-11 Online higher education has seen significant transformations in recent years particularly in the wake of the COVID 19 pandemic A comparative approach to understanding the drivers trends and challenges in online learning reveals a shift from pre pandemic to post pandemic periods Before COVID 19 online education was seen as a supplementary option for non traditional students driven by technological advancements and demands for flexibility However the pandemic created a fast adoption of online platforms making digital learning a central feature of higher education This shift has shown greater academic accessibility and global reach but reveals pressing challenges related to digital equity quality of education and student engagement Examining these issues may highlight the evolving nature of online higher education and provides a framework for understanding its future trajectory Comparative Approach to Drivers Trends and Challenges in Online Higher Education Pre and Post COVID 19 explores new strategies and challenges in global online higher education It offers insights into the motivations behind technological adoption in universities the obstacles faced and emerging trends across various regions This book covers topics such as data science digital technology and blended learning and is a useful resource for educators computer engineers academicians researchers and scientists **Beyond the**

Molecular Frontier National Research Council, Division on Earth and Life Studies, Board on Chemical Sciences and Technology, Committee on Challenges for the Chemical Sciences in the 21st Century, 2003-03-19 Chemistry and chemical engineering have changed significantly in the last decade They have broadened their scope into biology nanotechnology materials science computation and advanced methods of process systems engineering and control so much that the programs in most chemistry and chemical engineering departments now barely resemble the classical notion of chemistry Beyond the Molecular Frontier brings together research discovery and invention across the entire spectrum of the chemical sciences from fundamental molecular level chemistry to large scale chemical processing technology This reflects the way the field has evolved the synergy at universities between research and education in chemistry and chemical engineering and the way chemists and chemical engineers work together in industry The astonishing developments in science and engineering during the 20th century have made it possible to dream of new goals that might previously have been considered unthinkable This book identifies the key opportunities and challenges for the chemical sciences from basic research to societal needs and from terrorism defense to environmental protection and it looks at the ways in which chemists and chemical engineers can work together to contribute to an improved future **Ivory Tower and Industrial Innovation** David C. Mowery, Richard R.

Nelson, Bhaven N. Sampat, Arvids A. Ziedonis, 2015-02-01 Since the early 1980s universities in the United States have greatly expanded their patenting and licensing activities The Congressional Joint Economic Committee among other authorities have argued that this surge contributed to the economic boom of the 1990s And many observers have attributed this trend to the Bayh Dole Act of 1980 Using quantitative analysis and detailed case studies this book tests that conventional wisdom and assesses the effects of the Act examining the diverse channels through which commercialization has occurred over the 20th

century and since the passage of the Act **Perspectives on partnership** Horton, D.,Prain, G.,Thiele, G.,2009-11-30 This paper reports on a wide ranging review of the literature on partnerships and other closely related forms of collaboration It aims to contribute to knowledge of the actual and potential roles of partnership in international agricultural research for development The paper summarizes conclusions and insights from four distinct professional literatures research studies professional evaluation literature practitioner oriented reviews guidelines and assessment tools and CGIARrelated reviews evaluations and policy documents It identifies and analyzes key cross cutting themes and success factors highlights gaps in current knowledge and identifies high potential areas for further study A wide range of research based publications is reviewed including studies in such fields as management and organizational development public administration economics and international development Work in these fields covers such diverse topics as the role of inter organizational collaboration in strategic management public private and cross sector partnerships North South partnerships roles of partnership in linking research with action networking and transactions costs The different literatures talk little to each other and are highly self referential Nevertheless some common patterns themes and concerns emerge related to definitions partnership drivers and dynamics trust and mutuality power asymmetries and inequities and success factors It is noteworthy that empirical studies of partnerships are rare particularly in depth case studies Theoretical pieces seldom present empirical tests of hypotheses and practical guidelines are seldom grounded in theory There is a clear need for more systematic and in depth empirical research on partnership experiences Although partnership is now considered an essential way of working in many fields several authors caution that the costs of working in partnership may often exceed the benefits Before establishing a partnership one should identify a clear value added proposition Many reports on partnership prepared for the CGIAR are available only in grey literature leading to difficulties in accessing them and risking a loss of knowledge Gaps in knowledge are identified at the level of individual partnerships the level of the organizations that participate in or manage portfolios of partnerships and the level of research or innovation domains that are characterized by networks of partnerships

Handbook of Research on Social Interaction Technologies and Collaboration Software: Concepts and Trends

Dumova, Tatyana,Fiordo, Richard,2009-07-31 This book explores the origin structure purpose and function of socially interactive technologies known as social software Provided by publisher *Measuring the Economic Value of Research* Kaye Husbands Fealing,Julia I. Lane,John L. King,Stanley R. Johnson,2017-12-28 The scientific advances that underpin economic growth and human health would not be possible without research investments Yet demonstrating the impact of research programs is a challenge especially in areas that span disciplines industrial sectors and encompass both public and private sector activity All areas of research are under pressure to demonstrate benefits from federal funding of research This exciting and innovative study demonstrates new methods and tools to trace the impact of federal research funding on the structure of research and the subsequent economic activities of funded researchers The case study is food safety research

which is critical to avoiding outbreaks of disease The authors make use of an extraordinary new data infrastructure and apply new techniques in text analysis Focusing on the impact of US federal food safety research this book develops vital data intensive methodologies that have a real world application to many other scientific fields **Classroom Research**
