Securing E-Business Systems Timothy Braithwaite,2002-10-15 The essential guide to e business security for managers and ITprofessionals Securing E Business Systems provides business managers andexecutives with an overview of the components of an effectivee business infrastructure the areas of greatest risk and bestpractices safeguards It outlines a security strategy that allowsthe identification of new vulnerabilities assists in rapidsafeguard deployment and provides for continuous safeguardevaluation and modification The book thoroughly outlines aproactive and evolving security strategy and provides a methodologyfor ensuring that applications are designed with security in mind It discusses emerging liabilities issues and includes security bestpractices guidelines and sample policies This is the bible ofe business security Timothy Braithwaite Columbus MD is Deputy Director ofInformation Assurance Programs for Titan Corporation He hasmanaged data centers software projects systems planning andbudgeting organizations and has extensive experience in projectand acquisition management He is also the author of Y2K LessonsLearned Wiley 0 471 37308 7 *Impact of E-Business Technologies on Public and Private Organizations: Industry Comparisons and Perspectives* Bak, Ozlem,Stair, Nola,2011-03-31 This book assesses the impact of e business technologies on different organizations which include higher education institutions multinational automotive corporations and health providers Provided by publisher **Building Trustworthy Semantic Webs** Bhavani Thuraisingham,2007-12-05 Semantic Webs promise to revolutionize the way computers find and integrate data over the internet They will allow Web agents to share and reuse data across applications enterprises and community boundaries However this improved accessibility poses a greater threat of unauthorized access which could lead to the malicious corruption of informa *Intelligent Non-hierarchical Manufacturing Networks* Raul Poler,Luis Maia Carneiro,Thomas Jasinski,Marc Zolghadri,Paolo Pedrazzoli,2013-02-05 This book provides the latest models methods and guidelines for networked enterprises to enhance their competitiveness and move towards innovative high performance and agile industrial systems In the new global market competitiveness and economic growth rely greatly on the move toward innovative high performance industrial systems and agile networked enterprises through the creation and consolidation of

non hierarchical manufacturing networks of multi national SMEs as opposed to networks based on powerful large scale companies Network performance can be significantly improved through more harmonious and equitable peer to peer inter enterprise relationships conforming decentralized and collaborative decision making models Traditional hierarchical manufacturing networks are based on centralized models where some of the actors involved must adapt themselves to the constraints defined by those who are most dominant Real world experiences of such models have revealed some major problems due to the centralized vision of the supply chain and the sub optimal performance of centralized decision making For the current highly dynamic markets this generates major inefficiencies in operation throughout the supply chain This book collects the latest research regarding non hierarchical manufacturing networks and provides enterprises with valuable models methods and guidelines to improve their competitiveness

Towards the E-Society Beat Schmid,Katarina Stanoevska,Volker Tschammer,2008-11-16 I3E 2001 is the first in a series of conferences on e commerce e business and government organised by the three IFIP committees TC6 TC8 and TC11 It provides a forum where users engineers and scientists from academia industry and government can present their latest findings in e commerce e business and government applications and the underlying technology to support those applications The conference comprises a main track and mini tracks dedicated to special topics The papers presented in the main track were rigorously refereed and selected by the International Programme Committee of the conference Thematically they were grouped in the following sessions Sessions on security and trust comprising nine papers referring to both trust and security in general as well as presenting specific concepts for enhancing trust in the digital society Session on inter organisational transactions covering papers related to auditing of inter organizational trade procedures cross organizational workflow and transactions in Business to Business platforms Session on virtual enterprises encompassing papers describing innovative approaches for creating virtual enterprises as well as describing examples of virtual enterprises in specific industries Session on online communities containing three papers which provide case studies of specific online communities and various concepts on how companies can build and harness the potential of online communities Sessions on strategies and business models with papers describing specific business models as well as general overviews of specific approaches for E Strategy formulation
