Lecturing the Atlantic Tom F. Wright, 2017-04-06 In the early nineteenth century the public lecture emerged as one of the Anglo American world's most important cultural forms On both sides of the Atlantic audiences and performers transformed a cultural practice with origins in the medieval cloister into an unexpected flashpoint medium of public life In the United States as part of the lyceum movement lecturing became crucial to literary and political life multiple social reform movements and the rise of public intellectualism offering speakers from across the cultural spectrum a platform from which to promote their ideas and explain contemporary life Lecturing the Atlantic argues for a new interpretation of this neglected institution It reorients our understanding of the lyceum by seeing it as an international and cross media phenomenon patterned by cultural investment in an Anglo American commons Tom F Wright shows how some of the mid century North Atlantic world's most enduring cultural figures such as Frederick Douglass William Makepeace

Thackeray and Ralph Waldo Emerson as well as fascinating marginal voices such as Lola Montez and John B Gough used lecture hall discussions of a transatlantic imaginary to offer powerful commentaries on slavery progress comedy order tradition and reform Crucially this world was a matter as much of print as performance since as the book reveals a remarkable culture of newspaper commentary allowed oratory to resonate far beyond the realm of the lecture hall Through a series of inventive readings of Anglo American relations as understood through performance and print re mediation Wright connects the transatlantic turn in cultural studies to important recent debates in media theory and public sphere scholarship Lecturing the Atlantic speaks to those interested in the literature and history of Victorian Britain and the early US to students of performance communication and rhetoric and all those seeking a deeper understanding of nineteenth century public culture Ralph Waldo Emerson Ralph Waldo Emerson, 2015-06-09 Ronald A Bosco and Joel Myerson have gathered Emerson's most memorable prose published under his direct supervision enhanced by additional writings Ralph Waldo Emerson The Major Prose is the only single volume anthology that presents the full range of Emerson's written and spoken prose sermons lectures addresses and essays Emerson's English Traits and the Natural History of Metaphor David LaRocca, 2013-09-26 Metaphors are ubiquitous and yet or for that very reason go largely unseen We are all variously susceptible to a blindness or blurry vision of metaphors yet even when they are seen clearly we are left to situate the ambiguities conflations and contradictions they regularly present logically aesthetically and morally David LaRocca's book serves as a set of reminders of certain features of the natural history of our language especially the tropes that permeate and define it As part of his investigation LaRocca turns to Ralph Waldo Emerson's only book on a single topic English Traits 1856 which teems with genealogical and generative metaphors blood birth plants parents family names and race In the first book length study of English Traits in over half a century LaRocca considers the presence of metaphors in Emerson's fertile text a unique work in his expansive corpus and one that is regularly overlooked As metaphors are encountered in Emerson s book and drawn from a long history of usage in work by others a reader may realize or remember what is inherent and encoded in our language but rarely seen how metaphors circulate in speech and through texts to become the lifeblood of thought

The Oxford Handbook of Transcendentalism Joel Myerson, Sandra Harbert Petrulionis, Laura Dassow Walls, 2010-04-16
This volume includes fifty original essays from a group of renowned scholars as well as a compact chronology and specialized bibliographies It offers a rich authoritative interdisciplinary account providing scholars with the definitive resource on this seminal movement in American culture From the dust jacket **Experience and Experimental Writing** Paul Grimstad, 2013-06-26 American pragmatism is premised on the notion that to find out what something means look to fruits rather than roots But as Paul Grimstad shows the thought of the classical pragmatists is itself the fruit of earlier experiments in American literature Ralph Waldo Emerson Edgar Allan Poe Herman Melville and contemporaneously with the flowering of pragmatism Henry James each in their different ways prefigure at the level of literary form what emerge as the guiding ideas

of classical pragmatism Specifically this occurs in the way an experimental approach to composition informs the classical pragmatists central idea that experience is not a matter of correspondence but of an ongoing attunement to process The link between experience and experiment is thus for Grimstad a way of gauging the deeper intellectual history by which literary experiments Emerson's Essays Poe's invention of the detective story in The Murders in the Rue Morgue Melville's Pierre and Henry James s late style find their philosophical expression in classical pragmatism Charles Peirce s notion of the abductive inference William James s radical empiricism and John Dewey s naturalist account of experience inform the book s readings Experience and Experimental Writing also frames its set of claims in relation to more contemporary debates within literary criticism and philosophy that have so far not been taken up in this context putting Richard Poirier's account of the relation of pragmatism to literature into dialogue with Stanley Cavell's inheritance of Emerson as someone decidedly not a pragmatist to differences between classical pragmatists like William James and John Dewey and more recent post linguistic turn thinkers like Richard Rorty and Robert Brandom **Apropos of Something** Elisa Tamarkin, 2022-07-27 A history of the idea of relevance since the nineteenth century in art criticism philosophy logic and social thought Before 1800 nothing was irrelevant So argues Elisa Tamarkin's sweeping meditation on a key shift in consciousness the arrival of relevance as the means to grasp how something that was once disregarded unvalued or lost to us becomes interesting and important When so much makes claims to our attention every day how do we decide what is most valuable right now Relevance Tamarkin shows was an Anglo American concept derived from a word meaning to raise or to lift up again and also to give relief It engaged major intellectual figures including Ralph Waldo Emerson and pragmatists and philosophers William James Alain Locke John Dewey and Alfred North Whitehead as well as a range of critics phenomenologists linguists and sociologists Relevance is a struggle for recognition especially in the worlds of literature art and criticism Poems and paintings in the nineteenth century could now be seen as pragmatic works that make relevance and make interest that reveal versions of events that feel apropos of our lives the moment we turn to them Vividly illustrated with paintings by Winslow Homer Henry Ossawa Tanner and others Apropos of Something is a searching philosophical and poetic study of relevance a concept calling for shifts in both attention and perceptions of importance with enormous social stakes It remains an invitation for the humanities and for all of us who feel tasked every day with finding the point The Voice of Science Diarmid A. Finnegan, 2021-10-12 For many in the nineteenth century the spoken word had a vivacity and power that exceeded other modes of communication This conviction helped to sustain a diverse and dynamic lecture culture that provided a crucial vehicle for shaping and contesting cultural norms and beliefs As science increasingly became part of public culture and debate its spokespersons recognized the need to harness the presumed power of public speech to recommend the moral relevance of scientific ideas and attitudes With this wider context in mind The Voice of Science explores the efforts of five celebrity British scientists John Tyndall Thomas Henry Huxley Richard Proctor Alfred Russel Wallace and Henry Drummond to articulate and embody a moral vision

of the scientific life on American lecture platforms These evangelists for science negotiated the fraught but intimate relationship between platform and newsprint culture and faced the demands of audiences searching for meaningful and memorable lecture performances As Diarmid Finnegan reveals all five attracted unrivaled attention provoking responses in the press from church pulpits and on other platforms Their lectures became potent cultural catalysts provoking far reaching debate on the consequences and relevance of scientific thought for reconstructing cultural meaning and moral purpose

**Not So Fast** Doug Hill,2016 There's a well known story about an older fish who swims by two younger fish and asks How s the water The younger fish are puzzled What's water they ask Many of us today might ask a similar question What's technology Technology defines the world we live in yet we re so immersed in it so encompassed by it that we mostly take it for granted Seldom if ever do we stop to ask what technology is Failing to ask that guestion we fail to perceive all the ways it might be shaping us Usually when we hear the word technology we automatically think of digital de vices and their myriad applications As revolutionary as smartphones online shop ping and social networks may seem however they t into long standing deeply entrenched patterns of technological thought as well as practice Generations of skeptics have questioned how well served we are by those patterns of thought and practice even as generations of enthusiasts have promised that the latest innovations will deliver us soon to Paradise We re not there yet but the cyber utopians of Silicon Valley keep telling us it's right around the corner What is technology and how is it shaping us In search of answers to those crucial questions Not So Fast draws on the insights of dozens of scholars and artists who have thought deeply about the meanings of machines The book explores such dynamics as technological drift technological momentum technological disequilibrium and technological autonomy to help us understand the interconnected inter woven and interdependent phenomena of our technological world In the course of that exploration Doug Hill poses penetrating questions of his own among them Do we have as much control over our machines as we think And who can we rely on to guide the technological forces that will determine the future of the **Invisible Sovereign** Mark G. Schmeller, 2016-01-12 This history of early American political thought examines the planet emergence evolution and manipulation of public opinion In the early American republic the concept of public opinion was a recent and ambiguous invention While appearing to promise a new style of democratic politics the concept was also invoked to limit self rule cement traditional prejudices stall deliberation and marginalize dissent As Americans contested the meaning of this essentially contestable idea they expanded and contracted the horizons of political possibility and renegotiated the terms of political legitimacy Tracing the concept from its late eighteenth century origins to the Gilded Age Mark G Schmeller s Invisible Sovereign argues that public opinion is a central catalyst in the history of American political thought Schmeller treats it as a contagious idea that infected a broad range of discourses and practices in powerful occasionally ironic and increasingly contentious ways Ranging across a wide variety of historical fields Invisible Sovereign traces a shift over time from early political constitutional concepts which wrapped pubic opinion in the language of constitutionalism to more

modern social psychological concepts which defined public opinion as a product of social action and mass communication **Elements and Relations** Martin Zwick, 2023-07-03 This book develops the core proposition that systems theory is an attempt to construct an exact and scientific metaphysics a system of general ideas central to science that can be expressed mathematically Collectively these ideas would constitute a nonreductionist theory of everything unlike what is being sought in physics Inherently transdisciplinary systems theory offers ideas and methods that are relevant to all of the sciences and also to professional fields such as systems engineering public policy business and social work To demonstrate the generality and importance of the systems project the book structures its content in three parts Essay Notes and Commentary The Essay section is a short distillation of systems ideas that illuminate the problems that many types of systems face Commentary explains systems thinking its value and its relation to mainstream scientific knowledge It shows how systems ideas revise our understanding of science and how they impact our views on religion politics and history Finally Notes contains all the mathematics in the book as well as scientific philosophical and poetic content that is accessible to readers without a strong mathematical background Elements and Relations is intended for researchers and students in the systems complexity field as well as related fields of social science modeling systems biology and ecology and cognitive science It can be used as a textbook in systems courses at the undergraduate or graduate level and for STEM education As much of the book does not require a background in mathematics it is also suitable for general readers in the natural and social sciences as well as in the humanities especially philosophy Selected Essays, Lectures, and Poems of Ralph Waldo Emerson Ralph Waldo Emerson, 1965 A collection of writings by Ralph Waldo Emerson including sermons poems and journal excerpts as well as a portion of his contributions to Memoirs of Margaret Fuller Ossoli with critical interpretations and essays that examine the context in which Emerson wrote and his critical reception With the World at Heart Thomas A. Carlson.2019-05-01 What is the role of love in opening and sustaining the temporal worlds we inhabit One of the leading scholars in philosophy and the history of religious thought Thomas A Carlson here traces this guestion through Christian theology twentieth century phenomenological and deconstructive philosophy and nineteenth century individualism Revising Augustine's insight that when we love a place we dwell there in the heart Carlson also pointedly resists lines of thought that seek to transcend loss and its grief by loving all things within the realm of the eternal Through masterful readings of Heidegger Derrida Marion Nancy Emerson and Nietzsche Carlson shows that the fragility and sorrow of mortal existence in its transience do not in fact contradict love but instead empower love to create a world The Conservative Aesthetic Stephen J. Mexal, 2021-05-20 The Conservative Aesthetic Theodore Roosevelt Popular Darwinism and the American Literary West offers an alternative origin story for American conservatism tracing it to a circle of writers artists and thinkers in the late nineteenth century who yoked popular understandings of Darwin to western literary aesthetics That circle included writer Owen Wister artist Frederic Remington entertainer William Buffalo Bill Cody historian Frederick Jackson Turner and a young Theodore Roosevelt The

book explores how their lives and their writing intertwined with their conservative sensibilities. For them going west was akin to time travel a retrogression into an earlier and hardier age. It was through those retrogressions into the American state of nature they imagined that society could discover its finest and fittest citizens. Such a society would be the modern realization of Thomas Jefferson's century old dream of a natural aristocracy. Theirs was a new conservatism rooted not in a history of European monarchy but rather in stories about American individualism and the frontier west updated for the age of Darwin

In the Face of Adversity Thomas Nolden, 2023-02-20 In the Face of Adversity explores the dynamics of translating texts that articulate particular notions of adverse circumstances The chapters illustrate how literary records of often painful experiences and dissenting voices are at risk of being stripped of their authenticity when not carefully handled by the translator how cultural moments in which the translation of a text that would have otherwise fallen into oblivion instead gave rise to a translator who enabled its preservation while ultimately coming into their own as an author as a result and how the difficulties the translator faces in intercultural or transnational constellations in which prejudice plays a role endangers projects meant to facilitate mutual understanding The authors address translation as a project of making available and preserving a corpus of texts that would otherwise be in danger of becoming censored misperceived or ignored They look at translation and adaptation as a project of curating textual models of personal communal or collective perseverance and they offer insights into the dynamics of cultural inclusion and exclusion through a series of theoretical frameworks as well as through a set of concrete case studies drawn from different cultural and historical contexts. The collection also explores some of the venues that artists have pursued by transferring artistic expressions from one medium into another in order to preserve and disseminate important experiences in different cultural settings media and arts Ahab's Rolling Sea Richard J. King, 2019-11-11 In this invigorating study a maritime historian delves into the environmental and scientific concerns beneath the surface of Melville's epic tale Nature One of the most profound and enduring works of American fiction Herman Melville's Moby Dick is also a landmark of nature writing In conversation with the works of Emerson and Thoreau this epic of the sea draws on Melville's own travels to the Pacific The author spent more than three years at sea before writing his masterpiece in 1851 Ahab's Rolling Sea is a chronological journey through the natural history of Melville's novel From white whales to whale intelligence giant squids barnacles albatross and sharks Richard J King examines what Melville knew from his own experiences and the sources available to a reader in the mid 1800s exploring how and why Melville might have twisted what was known to serve his fiction King then climbs to the crow's nest setting Melville in the context of the American perception of the ocean in 1851 at the very start of the Industrial Revolution and just before the publication of On the Origin of Species King compares Ahab s and Ishmael s worldviews to how we see the ocean today an expanse still immortal and sublime but also in crisis Featuring a coffer of illustrations and an array of interviews with contemporary scientists fishers and whale watch operators Ahab's Rolling Sea offers new insight into a cherished masterwork its
