Looking After Children With Difficult:

Caring for Children with Complex Needs in the Community Jean Teare, 2009-01-22 Caring for the Child with Complex Needs in Community Settings provides a valuable overview of the key factors relating to caring for children with complex and continuing care needs. Despite its frequent and increasing use, complex care needs is a term without an agreed definition. This shortfall of knowledge is addressed in this book through critical discussion of evidence-based research and current health, social, and education policy. It brings together the latest knowledge into one text, providing practitioners with the crucial information needed when working with this diverse and broad group of children. Caring for the Child with Complex Needs in Community Settings explores caring for technology-dependent children who require respiratory assistance, caring for children who require home enteral tube feeds, and caring for children with complex disabilities. It looks at multi-agency care, respite care for families, social service support, and educational support of children with complex needs. Practitioners from health, social services, and education backgrounds have contributed to the chapters using case studies, while a parent of a child with complex needs has provided a personal view of caring. This accessible and practical text provides core knowledge and vital insight required for successful delivery of community care for children with complex and continuing care needs. **A Practical Guide to Caring for Children and Teenagers with Attachment Difficulties** Chris Taylor, 2010 It explains what attachment is, what the different patterns look like in children and young people, how early attachment experiences affect their lives, and how this understanding can help childcare workers to develop therapeutic ways of caring. An essential book for professionals such as residential carers, social workers, and foster carers. **Looking After Children in Primary Care** Ruth Chambers, Kirsty License, 2018-12-14 Highly Commended in the 2005 BMA Medical Book Competition. The Children's National Service Framework sets standards for children's and young people's services, outlining what support should be available to children and their parents in managing and preventing a wide range of conditions and problems. This book is a companion to the Children's NSF, enabling those that work within the NHS, social care, and education to put the NSF into practice in primary care. Contributions throughout from key professionals who were involved in the evolution of the framework help by providing guidance and expertise from the knowledge and background material gained throughout its development. The authors expand on the vision, themes, and goals published within the NSF and make recommendations for the ways that best practice can be implemented, particularly for children's healthcare throughout the UK and anywhere in the Western world. General practitioners, child health specialists, community nurses, and anyone with an interest in or responsibility for the care of children in primary care and the interface with social care and education will find this book invaluable reading. **Understanding family and friends care: the relationship between need, support and legal status**, **Observing Children with Attachment Difficulties in Preschool Settings** Ann Frost, Jane Fain, Sian Templeton, Eleanor Durrant, Kim S.
