In 1947 a Bedouin shepherd literally stumbled upon a cave near the Dead Sea a settlement now called Qumran to the east of Jerusalem This cave along with the others located nearby contained jars holding hundreds of scrolls and fragments of scrolls of texts both biblical and nonbiblical in Hebrew Aramaic and Greek The biblical scrolls would be the earliest evidence of the Hebrew Scriptures or Old Testament by hundreds of years and the nonbiblical texts would shed dramatic light on one of the least known periods of Jewish history the Second Temple period This find is quite simply the most important archaeological event in two thousand years of biblical studies The scrolls provide information on nearly every aspect of biblical studies including the Old Testament text criticism Second Temple Judaism the New Testament and Christian origins It took more than fifty years for the scrolls to be completely and officially published and there is no comparable brief introductory resource Core Biblical Studies fulfill the need for brief substantive yet highly accessible introductions to key subjects and themes in biblical studies In the shifting tides of biblical interpretation these books are designed to help students locate relevant meanings in conversation with the text As a first step toward substantive and subsequent learning the series draws on the best scholarship in order to provide
