CYCLE TRADER, JULY 1990 Causey Enterprises, LLC, The Ascent of GIM, the Global Intelligent Machine Teun

Koetsier,2018-11-20 In the concluding chapters of this book the author introduces GIM the Global Intelligent Machine GIM is a huge global hybrid machine a combination of production machinery information machinery and mechanized networks In the future it may very well encompass all machinery on the globe The author discusses the development of machines from the Stone Age until the present and pays particular attention to the rise of the science of machines and the development of the relationship between science and technology The first production and information tools were invented in the Stone Age In the Agricultural empires tools and machinery became more complex During and after the Industrial Revolution the pace of innovation accelerated In the 20th century the mechanization of production information processing and networks became increasingly sophisticated GIM is the culmination of this development GIM is no science fiction GIM exists and is growing and getting smarter and smarter Individuals and institutions are trying to control parts of this giant global robot By looking at its history and by putting GIM in the context of the current developments this book seeks to reach a fuller understanding of this phenomenon **Metaphor** Simon Unwin,2019-03-28 Each of these Analysing Architecture Notebooks is devoted to a

particular theme in understanding the rich and varied workings of architecture They can be thought of as addenda to the foundation volume Analysing Architecture which first appeared in 1997 and has subsequently been enlarged in three further editions Examining these extra themes as a series of Notebooks rather than as additional chapters in future editions allows greater space for more detailed exploration of a wider variety of examples whilst avoiding the risk of the original book becoming unwieldy Metaphor is the most powerful component of the poetry of architecture It has been a significant factor in architecture since the earliest periods of human history when people were finding ways to give order and meaning to the world in which we live It is arguable that architecture began with the realisation of metaphor in physical form and that subsequent movements from Greek to Gothic Renaissance to Modern Victorian to Vernacular have all been driven by the emergence or rediscovery of different metaphors by which architecture might be generated Aeronautics ,1911
