Recent Reference Books in Religion William M. Johnston, 2014-01-27 Recent Reference Books in Religion provides incisive summaries and evaluations of more than 350 contemporary reference works on religious traditions ancient and modern that have been published in English, French, and German. For maximum usefulness to readers, Professor Johnston has broadly defined religion to include not just the world religion of Christianity, Judaism, Islam, Hinduism, and Buddhism, but also such alternative approaches as mythology, folklore, and the philosophy of ethics. Each entry analyzing a particular work includes full bibliographic details as well as commentary. Outstanding articles and contributors are highlighted; strengths and weaknesses are carefully noted and weighed. Readers are directed to volumes whose strengths and weaknesses are carefully noted and weighed. Readers are directed to volumes whose strengths complement the weaknesses of others. An indispensable guide in any religious studies collection.

Recent Reference Books in Religion 2nd Edition includes works published through the end of 1997. It also includes a Glossary that describes types and functions of reference books and five indexes: Titles, Authors, Topics, Persons, and Places.

Manufacturing Religion Russell T. McCutcheon, 1997-06-19 In this new book, author Russell McCutcheon offers a powerful critique of traditional scholarship on religion, focusing on multiple interrelated targets. Most prominent among these are the History of Religions as a discipline, Mircea Eliade, one of the founders of the modern discipline, recent scholarship on Eliade's life and politics, contemporary textbooks on world religions, and the oft-repeated bromide that religion is a *sui generis* phenomenon. McCutcheon skillfully analyzes the ideological basis for and service of the *sui generis* argument, demonstrating that it has been used to constitute the field's object of study in a form that is ahistorical, apolitical, fetishized, and sacrosanct. As such, he charges, it has helped to create departments, jobs, and publication outlets for those who are comfortable with such a suspect construction while establishing a disciplinary ethos of astounding theoretical naivete and a body of scholarship to match. Surveying the textbooks available for introductory courses in comparative religion, the author finds that they uniformly adopt the *sui generis* line and all that comes with it. As a result, he argues, they are not just uncritical, which helps keep them popular among the audiences for which they are intended, but badly disserve, but actively inhibit the emergence of critical perspectives and capacities. And on the geopolitical scale, he contends, the study of religion as an ahistorical category participates in a larger system of political domination and economic and cultural imperialism.

The Literature of Theology David R. Stewart, 2003-01-01 This updated reference guide directs students to over five hundred significant theological resources across a wide area of theological research. It details bibliographic sources for encyclopedias, dictionaries, and electronic resources in biblical studies, historical studies, theology, and practical theology.
