Macmurtreys Wall:

The Race for God Brian Herbert, 2016-08-05 Who needs Heaven God it turns out lives on the planet Tananious Ofo in the distant galaxy 722C12009 And now after countless millennia He s invited us to come visit Him Not everybody mind you Just an odd assortment of heathens heretics pantheists perverts and true believers of every sect and creed all crammed into a single white spaceship piloted by a slightly crazed biocomputer Each pilgrim is determined to be the first to reach God and learn His secrets If they don t all kill each other on the way there

Complications in Cardiothoracic Surgery Alex Little, 2008-04-15 It is the practical experience gained in the operating room and on the wards dealing with complications and deviations from the typical or average scenario that matures and fully develops a surgeon The typical textbook demonstrates the right or standard way to do things and the implicit assumption is that if these guidelines are followed then the patient and the surgeon will be complication free Good results come from experience and experience is gained by making mistakes The goal of this book is to minimize the frequency of surgical complications and maximize the outcome when they do occur by allowing the reader to learn from the operative and clinical experience of those who have gone before so that each generation can collectively stand on the shoulders of the preceding generation without the need to learn from one s own complications This book is therefore designed less to address indications for operations than how to carry them out and provide postoperative care without complications While the authors of the various chapters address the correct or right way to perform operations and care for patients after surgery they have also been tasked to address and emphasize specific dos and don ts for both intraoperative techniques and postoperative care that will reduce the incidence of complications As some complications alas are inevitable also addressed are the issues of timely recognition and appropriate treatment of complications when they do occur despite best efforts
