Business Cycles: Theory and Empirical Methods Willi Semmler,2012-12-06 In

macrodynamics and business cycle analysis we find nowadays a variety of approaches elaborating frameworks for studying the fluctuations in economic and financial data These approaches are viewed from Keynesian monetarist and rational expectations standpoints There are now also numerous empirical methods for the testing of nonlinear data generating mechanisms This volume brings together a selection of contributions on theories of the business cycle and new empirical methods and synthesizes the new results The volume i gives an overview of current models and modern concepts and tools for analyzing the business cycle ii demonstrates where possible the relation of those models to the history of business cycle analysis and iii presents current work surveys and original work on new empirical methods of studying cycle generating mechanisms *Cycles, Growth, and Inflation* Brian L. Scarfe,1977 Macrodynamics: Fluctuations and Growth Pierre-Yves

Hénin,2013-04-15 Building from the micro foundations of economic behaviour to a full survey of macroeconomics the book examines growth theory and equilibrium and disequilibrium approaches to provide a comprehensive survey of all the rival theoretical approaches that underlie central policy debates A survey of pre Keynesian theories of growth fluctuations and the various short and long cycles and crises is followed by an exposition of Keynesian theory and its subsequent development and of the neo classical revival Topics covered include Non clearing markets Involuntary unemployment Persistent inflation As well as full coverage of the English language literature Macrodynamics covers important contributions from the new school of French macroeconomists including Malinvaud Benassy and Grandmont *Profits, Wages and Productivity in the Business Cycle* Mitsuhiro Iyoda,2012-12-06 The purpose of this book is to explain the changes in specific macroeconomic variables such as the relative share of labour the profit rate and the real wage rate in advanced capitalist economies in relation to the influence of the business cycle in income distribution To explain these changes the author examines three types of theory Kaldorian theory the Real Business Cycle theory and the new Keynesian theory with a specific focus on Kaldor's approach

The Macrodynamics of Capitalism Peter Flaschel,2008-12-11 This book provides an introduction to advanced

macrodynamics viewed as a disequilibrium theory of fluctuating growth It builds on an earlier attempt to reformulate the foundations of macroeconomics from the perspective of real markets disequilibrium and the conflict over income distribution between capital and labor It does so not because it wants to support the view that this class conflict is inevitable but with the perspective that an understanding of this conflict may help to formulate socio economic principles and policies that can help to overcome class conflict at least in its cruder forms or that can even lead to rationally understandable procedures and rules that turn this conflict into a consensus driven interaction between capitalists or their representatives and the employable workforce The book starts from established theories of temporary equilibrium positions the forces of real growth

and the conflict over income distribution represented by basic modeling approaches which it considers in detail in its Part I in order to prepare the ground for their integration in Part II of the book In this way we inspect what types of models of disequilibrium income distribution and real growth we have at our disposal as models that have proved to be of real interest and sound from a rigorous modeling perspective

Monetary Macrodynamics Toichiro Asada, Carl Chiarella, Peter Flaschel, Reiner Franke, 2012-11-12 This book investigates the interaction of effective goods demand with the wage price spiral and the impact of monetary policy on financial and the real markets from a Keynesian perspective Endogenous business fluctuations are studied in the context of long run distributive cycles in an advanced rigorously formulated and quantitative setup The material is developed by way of self contained chapters on three levels of generality an advanced textbook level a research oriented applied level and on a third level that shows how the interaction of real with financial markets has to be modelled from a truly integrative Keynesian perspective Monetary Macrodynamics shows that the balanced growth path of a capitalist economy is unlikely to be attracting and that the cumulative forces that surround it are controlled in the large by changes in the behavioural factors that drive the wage price spiral and the financial markets Such behavioural changes can in fact be observed in actual economies in the interaction of demand driven business fluctuations with supply driven wage and price dynamics as they originate from the conflict over income distribution between capital and labour The book is a detailed critique of US mainstream macroeconomics and uses rigorous dynamic macro models of a descriptive and applicable nature It will be of particular relevance to postgraduate students and researchers interested in disequilibrium processes real wage feedback channels financial markets and portfolio choice financial accelerator mechanisms and monetary policy

Business Cycle Theory, Part II Volume 8 Mauro Boianovsky, 2024-10-28 In the mid nineteenth century the business cycle was increasingly recognised as a recurrent phenomenon This edition contains key texts from the range of literature in the field

Capitalist Macrodynamics D. Laibman, 1997-07-14 The Marxist theory of capitalist growth and transformation has often been shrouded in obscurity either by endless recapitulation of Marx's texts or by excessive use of mathematical formalism This short book presents an integrated and rigorous view of capitalist development technical change class relations trends in the profit rate and share cyclical and long term crisis in a form that is accessible to serious readers with or without prior training in economics or familiarity with Marxist thought
