creating opportunities based on lived experiences for re imagining the transformative potential of the nexus between feminism and policymaking Interdisciplinary in scope and bringing to the fore the voices of both academics and practitioners this book is the product of an international collaboration forging links and dialogue that are increasingly necessary to question some of the exclusionary militaristic and hierarchical assumptions of policymaking which is labelled as feminist Feminist Policymaking in Turbulent Times will be of interest to all scholars students and practitioners interested in the role of gender in policymaking and concerned with contestations around gender focused projects

Varieties of Alternative Economic Systems Richard Westra, Robert Albritton, Seongjin Jeong, 2017-07-14 In this age of overlapping and mutually reinforcing deep global crises financial convulsions global warming mass migrations militarism inequality selfish nation states etc there needs to be more realistic dialogue about radical alternatives to the status quo Most literature produced heretofore has focused on the surface causes of these crises without much attention given to the sorts of major societal changes needed in order to deal with the crises we face This book moves the debate beyond the critiques and the false or not fully realised alternatives to focus on what can be termed practical utopias The contributors to this book outline a range of practical proposals for constructing pathways out of the global economic ecological and social crisis Varieties of Alternative Economic Systems eschews a single blueprint but insists on dealing directly with the deep structural problems and contradictions of contemporary global capitalism It provides a diverse array of complementary proposals and perspectives that can inform both theoretical thinking and practical action This volume will be of interest to academics and students who study political science ecological economics international politics and socialism

Mathematical Demoeconomy Yuri S. Popkov, 2014-04-02 This monograph aspires to lay the foundations of a new scientific discipline demoeconomics representing the synthesis of demography and spatial economics

This synthesis is performed in terms of interaction between population and its economic activity. The monograph appears a unique research work having no analogs in scientific literature. Demoeconomic systems are studied involving the macrosystems approach which combines the generalized entropy maximization principle and the local equilibria principle. Demoeconomic systems operate in an uncertain environment, thus, and so the monograph develops the methodology and technique of probabilistic modeling and forecasting of their evolution.
