Subcommittee on Goat Nutrition, 1981 Each of these popular handbooks contains comprehensive information on the nutritional needs of domestic animals and includes extensive tabular data All are paperback and 8 1 2 x 11 Some books come with diskettes or Cds that allow users to predict nutrient requirements of specific animals under various conditions and at various life stages

Dairy Goats Feeding and Nutrition Antonello Cannas, Giuseppe Pulina, 2007-12-18 Examining various aspects of dairy goat feeding and nutrition this book represents a review of scientific research and techniques It discusses aspects such as the modelling and production of goat s milk as well as the estimation of nutrient requirements and food intake of goats

Nutrient Requirements of Domesticated Ruminants, Primary Industries Standing Committee, 2007-08-16 Nutrient Requirements of Domesticated Ruminants draws on the most up to date research on the energy protein mineral vitamin and water requirements of beef and dairy cattle sheep and goats It defines the responses of animals in weight change milk production and wool growth to quantitative and qualitative changes in their feed supply It has particular application to grazing animals Factors affecting the intake of feed are taken into account and recommendations are given according to the

production systems being used for instance the feed intake of a grazing animal is affected by a larger number of variables than a housed animal. Examples of the estimation of the energy and nutrients required for the different production systems are given as well as the production expected from predicted feed intakes. The interactions between the grazing animal, the pasture and any supplementary feeds are complex involving herbage availability, diet selection and substitution. To facilitate the application of these recommendations to particular grazing situations, readers are directed to decision support tools and spreadsheet programs. *Nutrient Requirements of Domesticated Ruminants* is based on the benchmark publication *Feeding Standards for Australian Livestock Ruminants* published in 1990 by CSIRO PUBLISHING on behalf of the Standing Committee on Agriculture. It provides comprehensive and useful information for graziers, livestock advisors, veterinarians, feed manufacturers and animal nutrition researchers. The recommendations described are equally applicable to animals in feedlots or drought yards.

Nutrient Requirements of Small Ruminants National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on the Nutrient Requirements of Small Ruminants, 2006-12-22. Updating two previous National Research Council publications: *Nutrient Requirements of Sheep* Sixth Revised Edition 1985 and *Nutrient Requirements of Goats* First Edition 1981. This new book provides an evaluation of the scientific literature on the nutrient requirements of small ruminants in all stages of life. In addition, effects of the environment, feed additives and metabolism modifiers on nutrient requirements are addressed. Proper formulation of diets for small ruminants depends on adequate knowledge of their nutrient requirements. These requirements depend on the breed and age of the animal and whether he or she is exercising, pregnant or lactating. *Nutrient Requirements of Small Ruminants* brings together a summary of this latest data with new and expanded information on the composition of feeds commonly consumed by small ruminants, both domestic and wild. For the first time, this authoritative reference work includes information on cervids and camelids. Primarily intended for animal nutritionists, veterinarians and other scientists, some sections will be useful to individual sheep and goat owners and managers and to those responsible for the care and management of wildlife species. As both a practical and a technical reference book, this material is written to ensure that diets of small ruminants contain adequate amounts of nutrients and that intakes of certain nutrients are not so excessive that they inhibit performance or impair health.
