Nutrition in General Practice Nicola Seabrook, 1997 Women's health and health education are key responsibilities of community nurses yet there is a little relevant help available to the busy practitioner. This book therefore presents a companionable practical and comprehensive source of information on the key nutritional issues that relate to women. Written by a dietician with community experience it focuses on most of the common conditions which practice nurses, health visitors, midwives, dietitians and general practitioners may encounter or about which questions are asked by patients. *Women's Health in General Practice* Danielle Mazza, 2011-01-31 The book is designed to be a clear accessible guide to women's health. The aims of the book are as follows: To examine women's health issues as they present in general practice; To provide GPs with information relevant to their practice that extends upon that provided in undergraduate texts; To provide evidence based information regarding women's health to GPs; To give GPs tips and examples of useful approaches when undertaking histories, examining and managing women's health problems; To examine current controversies in women's health; Addresses common issues seen by GPs in their practice and addresses the questions and quandaries they face on a day to day basis; Gives practical information and advice to GPs that where possible is based on up to date guidelines or research evidence; Tips and example of useful approaches when undertaking histories, examining and managing women's health problems; Discussion of current controversies in women's health.
