Jacques, 2006 Selenium in ruminant nutrition and health Peter Surai, 2024-05-21 Selenium Se is an essential dietary trace element participating in the regulation of various physiological functions in humans and farm animals through its incorporation into a range of selenoproteins Low Se content in main feed ingredients is a common problem worldwide and dietary Se supplementation is a current practice in ruminant nutrition Recent research clearly proved that sodium selenite used for the last 50 years as a feed supplement is not an optimal form of Se However use of organic selenium in dairy and beef diets can help meet Se requirement and maintain health high immunocompetence productive and reproductive performance The goal of this book is to provide up to date information about the roles of Se in ruminant nutrition and health A special emphasis is given to the role of selenium as an essential part of the integrated antioxidant system The concept of using organic Se in ruminant nutrition is described in detail with emphasis on selenomethionine as a storage form of Se in the body Also specific Se deficiency related disorders in ruminants are described and the importance of Se in growth development immunity and reproduction is demonstrated Molecular mechanisms of protective effects of Se under stressful conditions of commercial milk and meat production are characterized This book will be of practical importance to dairy and beef producers to nutritionists and vets as well as for animal scientists students of agricultural colleges and universities It will also be of interest for researchers in areas related to environmental sciences food sciences physiology etc

Optimum Vitamin Nutrition for More Sustainable Swine Farming Edgar Oviedo-Rondon,Clemente López-Bote,Gilberto Litta,José-María Hernandez,2023-08-31 Food production particularly animal protein production is changing While productivity efficiency and food quality continue to be of vital importance there is increasing pressure on producers to prioritize sustainability and animal health and welfare as well minimize food waste Optimizing vitamin nutrition can help make animal production more sustainable by optimizing animal health and welfare and animal performance and food quality while reducing food waste Optimum Vitamin Nutrition for More Sustainable Swine Farming contains concise up to date information on vitamin nutrition for swine This book which follows the authoritative Optimum Vitamin Nutrition in the Production of Quality Animal Foods 5m Books 2013 is a reference for research and extension specialists who need the most current research based information on vitamins in swine This book is part of a series covering Optimum Vitamin Nutrition in poultry ruminants and aquaculture **Current advances in selenium research and applications** Peter F. Surai,Jules A. Taylor-Pickard,2023-08-28 Selenium Se is an essential dietary trace element participating in the regulation of various physiological functions in both animals and humans through its incorporation into selenoproteins as the amino acid selenocysteine Among many minerals Se has a special place being the most controversial trace element with a narrow gap between essentiality and toxicity Indeed there are important environmental issues considering selenium as a pollutant from the one hand and global selenium deficiency on the other In fact Se deficiency is considered as a risk factor for the development of various diseases in human and animals Decreased Se availability from soils as a result of low soil pH and usage of synthetic fertilizers is the major concern in European countries causing inadequate Se levels in food and feeds Furthermore it seems likely that sodium selenite used for the last 30 years as a feed supplement is not an optimal form of Se and the usage of organic selenium in animal diets could help to maintain optimal Se status as well as high immunocompetence productive and reproductive performance The aim of the present volume is to provide updated information on several important Se related subjects including Se status in Europe and ways of its improvement advances in Se analysis and speciation in biological material roles of selenium in poultry pig and ruminant nutrition Production of functional Se enriched food the relationship between selenium and mycotoxins polyunsaturated fatty acids as well as reoviruses are also addressed This collection of articles will provide nutritionists veterinarians human doctors researchers and any other readers with new insights into the exciting world of the goddess of the moon SELENIUM Trace elements in animal production systems P. Schlegel,S. Durosoy,A.W. Jongbloed,2023-08-28 This book deals with trace elements such as cobalt copper iron manganese selenium and zinc which are essential to modern animal nutrition but are increasingly

detrimental to soil and water quality in today's globalized production. The goal in finding a sustainable balance between trace element use in animal nutrition and its impact on the environment is addressed by focussing on the following questions: What is the trace element flow on farm, regional or national scale and which tools are available to influence the flow? What are today's and future soil and water quality in regards to trace minerals? What are the trace mineral loading limits in soil and water from a health and legal standpoint? Which technologies exist to modify slurry trace element contents? What is today's knowledge on quantitative and qualitative trace element requirements and recommended supplementation for ruminants, swine, poultry, fish and crustaceans? What is trace element bioavailability and how can it be determined? To which extent are trace minerals related to immune response? What are the future issues to be addressed in trace element nutrition? This book contains the peer reviewed papers of the first International Symposium on Trace Elements in Animal Production Systems. It is a valuable resource for researchers and professionals in the life sciences of animal nutrition, soil and water quality, for actors in the feed industry and policy making.
