Rousseaus Counter Enlightenment A Republ:

Rousseau's Counter-Enlightenment Graeme Garrard, 2012-02-01 Arguing that the question of Jean Jacques Rousseau's relationship to the Enlightenment has been eclipsed and seriously distorted by his association with the French Revolution Graeme Garrard presents the first book length case that shows Rousseau as the pivotal figure in the emergence of Counter Enlightenment thought Viewed in the context in which he actually lived and wrote from the middle of the eighteenth century to his death in 1778 it is apparent that Rousseau categorically rejected the Enlightenment republic of letters in favor of his own republic of virtue The philosophes placing faith in reason and natural human sociability and subjecting religion to systematic criticism and doubt naively minimized the deep tensions and complexities of collective life and the power disintegrative forces posed to social order Rousseau believed that the ever precarious social order could only be achieved artificially by manufacturing sentiments of sociability reshaping individuals to identify with common interests instead of their own selfish interests

Rousseau's Counter-Enlightenment Graeme Garrard, 2003-01-09 Sees Rousseau as the father of Counter Enlightenment thought *Rousseau's Republicanism* Megan K. Dyer, 2023-09-12 Reading Rousseau as a republican thinker might seem almost too obvious a proposition All the same the Genevan is often struck from accounts of modern republicanism given by those associated with the revival of republican thought At the root of this omission is perhaps the greatest puzzle of Rousseau's republicanism is that it demands his readers untangle the omission In bringing the republic's sovereign power into the Enlightenment Rousseau pairs it both with the premise of natural liberty and equality and also with an account of man singularly unsuited to realizing the rightful consequences of this shared nature Looking to both major works and lesser known writings this book demonstrates that in the face of human finitude and the formidable demands of right Rousseau crafts a robust yet judicious account of the republic Through comparison with various republican lineages its chapters explore Rousseau's engagement with leading moral and political problems that have defined and redefined republicanism attaining virtue preserving liberty sustaining the social order orienting persons toward the common good and having the law rule over men The goods of civil association are always precarious yet Rousseau nonetheless recognizes in human community an answer to the great problems of his thought those of inequality unhappiness and unfreedom

Machiavelli on Liberty and Conflict David Johnston, Nadia Urbinati, Camila Vergara (Political scientist), 2017-03-15 Papers from a conference held 6-7 December 2013 at the Italian Academy for Advanced Studies at Columbia University to mark the five hundredth anniversary of the publication of *The Prince* **The Free Animal** Lee MacLean, 2013-10-28 Free will is a key but contested concept in the work of Jean Jacques Rousseau while the famed philosopher is known to have asserted that free will distinguishes human beings from animals several interpreters have argued that he merely pretends to have this belief for the sake of healthy politics and to avoid persecution by religious authorities Through careful readings of key texts and letters *The Free Animal* offers a new and original exploration of Rousseau's views on free will Lee MacLean

shows that Rousseau needs and uses the idea of human consciousness of free will to explain the development of morality convention and vice MacLean bases her argument on a broad range of texts from canonical works to Rousseau's untranslated letters and drafts Featuring careful analyses and an extensive engagement with the secondary literature *The Free Animal* offers a novel interpretation of the changing nature and complexity of Rousseau's intention **Experience Embodied** Anik Waldow, 2020-01-02 By investigating conceptions of experience from Descartes to Kant this book shows that one of the central questions of the early modern period was how humans can instantiate in their actions the principles of rational moral agency while at the same time responding with their bodies to the causal play of nature Through the analysis of this question the book draws attention to the bodily underpinnings of the ability to experience thoughts and feelings It thus challenges overly subjectivist interpretations that concentrate on the inner realm of the experiencing mind and because of this fail to account for the worldly dimension of being experientially responsive to the affections of the body *Nietzsche and the Politics of Reaction* Matthew McManus, 2023-01-01 This book is intended as a major interdisciplinary contribution to the study of Nietzsche's thought in particular and the political right more generally Historically the assessment of Nietzsche's politics has ranged from denouncing him as a forerunner to Nazism to claiming he effectively did not have articulated political convictions During the latter half of the 20th century he surprisingly became a major theoretical influence on a variety of post structuralist radical critics who saw in his perspectivism and genealogy of power useful tools to critique existent structures of domination This collection of essays reframes the debate by looking at Nietzsche's constructive political project defending aristocratic values from the levelling influence of the herd and its liberal socialist and democratic spokesmen The essays will also explore how this defense of aristocratic values continues to have an influence on the political right inspiring moderates like Jordan Peterson and far right authors and activists like Aleksandr Dugin and Steve Bannon

A Casebook Edition of The Diabolic Tragedy Brian Russell Graham, 2025-01-27 This casebook edition comprises critical essays about and an English translation of *La Diabolique Tragédie* Each essay is an example of what Peter Barry has called Crisis Critique the commentaries ranging from the psychoanalytical to the feminist the historicist and the religious A poem in prose dating from the start of the nineteenth century *La Diabolique Tragédie* was first published in 2011 It was the work of a forger whose unrealized endgame was for the text to be presented to the public of the day as an authentic work of Jean Jacques Rousseau The critical essays represent a series of impressions of different types of literary critics which the author hopes will prove a good match for the forger's mock Rousseau **The Poetics of Shadows: The Double in Literature and Philosophy** Andrew Hock Soon Ng, 2012-02-24 The essays in this collection attest to the richness of the double motif in literature and philosophy Veering away from predominantly psychoanalytical readings of narratives which foreground the double or doppelgänger which have formed the basis of much scholarly discussions of this motif the contributions in this volume privilege divergent philosophical leanings ranging from Rousseau to Kierkegaard from Christian philosophy to

Eastern mysticism to elicit the layered nuances and signifiers of this elusive motif Narratives interrogated in this collection include the works of Dickens Blanchot Edmund Jab s Orhan Pamuk Chuck Palahniuk and Don Delillo among others **The Cultures of Entanglement** Suzanne Anker,Sabine Flach,2024-03-04 The symbolic meaning of plants their relevance to religion and the metaphorical provocations in the order of knowledge culture and political power underline the role of plants as something more than passive objects Current theoretical and artistic discourses have been seeking access to the world independently of man by focusing on the nonhuman other The contributors to this volume examine the historical philosophical and scientific findings that generate this idea In what way are such perspectives manifest in contemporary art Do artists develop a particular approach that enables nonhuman life forms like plants insects or animals to have an impact

Vital Matters Mary Terrall,Helen Deutsch,2012-01-01 Published in association with the UCLA Center for Seventeenth and Eighteenth Century Studies and the William Andrews Clark Memorial Library The French Revolution and the Creation of Benthamism C. Blamires,2008-07-10 The first study of how Genevan Etienne Dumont and his traumatic experience of the French Revolution shaped the reception and presentation of Benthamism and masked the true face of Jeremy Bentham one of the architects of modern society who visualised a new world based on the values of transparency accountability and economy

The Enlightenment that Failed Jonathan I. Israel,2019-11-28 The Enlightenment that Failed explores the growing rift between those Enlightenment trends and initiatives that appealed exclusively to elites and those aspiring to enlighten all of society by raising mankind s awareness freedoms and educational level generally Jonathan I Israel explains why the democratic and radical secularizing tendency of the Western Enlightenment after gaining some notable successes during the revolutionary era 1775 1820 in numerous countries especially in Europe North America and Spanish America ultimately failed He argues that a populist Robespierrieste tendency sharply at odds with democratic values and freedom of expression gained an ideological advantage in France and that the negative reaction this generally provoked caused a more general anti Enlightenment reaction a surging anti intellectualism combined with forms of religious revival that largely undermined the longings of the deprived underprivileged and disadvantaged and ended by helping albeit often unwittingly conservative anti Enlightenment ideologies to dominate the scene The Enlightenment that Failed relates both the American and the French revolutions to the Enlightenment in a markedly different fashion from how this is usually done showing how both great revolutions were fundamentally split between bitterly opposed and utterly incompatible ideological tendencies Radical Enlightenment which had been an effective ideological challenge to the prevailing monarchical aristocratic status quo was weakened then almost entirely derailed and displaced from the Western consciousness in the 1830s and 1840s by the rise of Marxism and other forms of socialism **New Perspectives on People and Forests** Eva Ritter,Dainis Dauksta,2011-04-29 The aim of this book is to elucidate the role of forests as part of a landscape in the life of people Most landscapes today are cultural landscapes that are influenced by human activity and that in turn have a profound effect on our understanding of

and identification with a place The book proposes that a better understanding of the bond between people and forests as integrated part of a landscape may be helpful in landscape planning and may contribute to the discussion of changes in forest cover which has been motivated by land use changes rural development and the global climate debate To this end people s perception of forest landscapes the reasons for different perceptions and future perspectives are discussed Given the wide range of forest landscapes and cultural perspectives which exist across the world the book focuses on Europe as a test case to explore the various relationships between society culture forests and landscapes It looks at historical evidence of the impacts of people on forests and vice versa explores the current factors affecting people s physical and emotional comfort in forest landscapes and looks ahead to how changes in forest cover may alter the present relationships of people to forests Drawing together a diverse literature and combining the expertise of natural and social scientists this book will form a valuable reference for students and researchers working in the fields of landscape ecology and landscape architecture geography social science environmental psychology environmental history It will also be of interest to researchers government agencies and practitioners with an interest in issues such as sustainable forest management sustainable tourism reserve management urban planning and environmental interpretation

Europe and the British Geographical Imagination, 1760-1830 Paul Stock, 2019 Europe and the British Geographical Imagination 1760 1830 explores what literate Britons of the period understood about Europe focussing on key themes which shaped ideas about the continent including religion the natural environment race the state borders commerce empire and ideas about the past progress and historical change

Bioethics and Biopolitics in Israel Hagai Boas, Yael Hashiloni-Dolev, Nadav Davidovitch, Dani Filc, Shai J. Lavi, 2018-01-11 Although the Israeli case of bioethics has been well documented this book offers a novel understanding of Israeli bioethics that is a milestone in the comparative literature of bioethics Bringing together a range of experts the book s interdisciplinary structure employs a contemporary sociopolitical oriented approach to bioethics issues with an emphasis on empirical analysis that will appeal not only to scholars of bioethics but also to students of law medicine humanities and social sciences around the world Its focus on the development of bioethics in Israel makes it especially relevant to scholars of Israeli society both in and out of Israel as well as medical practitioners and health policymakers in Israel

[The New Age in the Modern West](#) Nicholas Campion, 2015-11-19 New Age culture is generally regarded as a modern manifestation of Western millenarianism a concept built around the expectation of an imminent historical crisis followed by the inauguration of a golden age which occupies a key place in the history of Western ideas The New Age in the Modern West argues that New Age culture is part of a family of ideas including utopianism which construct alternative futures and drive revolutionary change Nicholas Campion traces New Age ideas back to ancient cosmology and questions the concepts of the Enlightenment and the theory of progress He considers the contributions of the key figures of the 18th century the legacy of the astronomer Isaac Newton and the Swedish visionary Emanuel Swedenborg as well as the theosophist H P Blavatsky the psychologist C G

Jung and the writer and artist Jose Arguelles He also pays particular attention to the beat writers of the 1950s the counterculture of the 1960s concepts of the Aquarian Age and prophecies of the end of the Maya Calendar in 2012 Lastly he examines neoconservatism as both a reaction against the 1960s and as a utopian phenomenon The New Age in the Modern West is an important book for anyone interested in countercultural and revolutionary ideas in the modern West *The Study of Religions in Szeged* Porció, Tibor, 2010 **Fat** Christopher E. Forth, 2019-06-15 Fat such a little word evokes big responses While fat describes the size and shape of bodies our negative reactions to corpulent bodies also depend on something tangible and tactile as this book argues there is more to fat than meets the eye Fat A Cultural History of the Stuff of Life offers a historical reflection on how fat has been perceived and imagined in the West since antiquity Featuring fascinating historical accounts philosophical religious and cultural arguments including discussions of status gender and race the book digs deep into the past for the roots of our current notions and prejudices Three central themes emerge how we have perceived and imagined obesity over the centuries how fat as a substance has elicited disgust and how it evokes perceptions of animality but also how it has been associated with vitality and fertility By exploring the complex ways in which fat fatness and fattening have been perceived over time this book provides rich insights into the stuff our stereotypes are made of **Sublime Dreams of Living Machines** Minsoo Kang, 2011-02-14 From the dawn of European civilization to the twentieth century the automaton better known today as the robot has captured the Western imagination and provided a vital lens into the nature of humanity Historian Minsoo Kang argues that to properly understand the human as machine and the human as fundamentally different from machine we must trace the origins of these ideas and examine how they were transformed by intellectual cultural and artistic appearances of the automaton throughout the history of the West Kang tracks the first appearance of the automaton in ancient myths through the medieval and Renaissance periods marks the proliferation of the automaton as a central intellectual concept in the Scientific Revolution and the subsequent backlash during the Enlightenment and details appearances in Romantic literature and the introduction of the living machine in the Industrial Age He concludes with a reflection on the destructive confrontation between humanity and machinery in the modern era and the reverberations of the humanity machinery theme today Sublime Dreams of Living Machines is an ambitious historical exploration and at heart an attempt to fully elucidate the rich and varied ways we have utilized our most uncanny creations to explore essential questions about ourselves
