Schmaltz,2013-01-31 This book is a systematic study of Descartes theory of causation and its relation to the medieval and early modern scholastic philosophy that provides its proper historical context The argument presented here is that even though Descartes offered a dualistic ontology that differs radically from what we find in scholasticism his views on causation were profoundly influenced by scholastic thought on this issue This influence is evident not only in his affirmation in the

Meditations of the abstract scholastic axioms that a cause must contain the reality of its effects and that conservation does not differ in reality from creation but also in the details of the accounts of body body interaction in his physics of mind body interaction in his psychology and of the causation that he took to be involved in free human action In contrast to those who have read Descartes as endorsing the occasionalist conclusion that God is the only real cause a central thesis of this study is that he accepted what in the context of scholastic debates regarding causation is the antipode of occasionalism namely the view that creatures rather than God are the causal source of natural change What emerges from the defense of this interpretation of Descartes is a new understanding of his contribution to modern thought on causation **The Palgrave**

Handbook of Image Studies Krešimir Purgar,2021-10-01 This handbook brings together the most current and hotly debated topics in studies about images today In the first part the book gives readers an historical overview and basic diachronical explanation of the term image including the ways it has been used in different periods throughout history In the second part the fundamental concepts that have to be mastered should one wish to enter into the emerging field of Image Studies are explained In the third part readers will find analysis of the most common subjects and topics pertaining to images In the fourth part the book explains how existing disciplines relate to Image Studies and how this new scholarly field may be constructed using both old and new approaches and insights The fifth chapter is dedicated to contemporary thinkers and is the first time that theses of the most prominent scholars of Image Studies are critically analyzed and presented in one place

Invisible Language Garth L. Hallett,2014-03-06 *Invisible Language Its Incalculable Significance for Philosophy* reveals that although the use of language is visible or audible the medium employed boasts neither of these attributes Garth L Hallett suggests that from Plato until now the intangibility of language has exercised a far more profound influence in philosophy than even Wittgenstein came close to demonstrating Indeed without that pervasive factor of language the history of philosophy would have been undeniably different Yet philosophy is and can legitimately aspire to be much more than a struggle between language and human comprehension of it Ultimately this book

suggests that philosophy's positive possibilities so often obscured by linguistically inattentive practice reach as far as human thought can reach *Squaring the Circle in Descartes' Meditations* Stephen I. Wagner, 2014-08-07 Providing an innovative reading of Descartes' Meditations this book resolves the classic problem of the Cartesian Circle *The Problem of Naturalism* Brian Lightbody, 2013-05-09 Philosophers often use the term naturalism in order to describe their work. It is commonplace to see a metaphysical, epistemological and/or ethical position self-described and described by others as one that is naturalized. But what if anything does the term naturalized add or subtract to the position being articulated? I demonstrate in *The Problem of Naturalism: Analytic and Continental Perspectives* that the term naturalism connotes such a broad meaning that it is difficult to demarcate naturalism from philosophy itself. Still, many philosophers have tried to provide non-trivial and non-vacuous definitions of the term. My book by and large argues that such attempts are unsuccessful. Instead, I argue that naturalism is an attitude and neither a methodology nor a substantive position. I then articulate the guidelines the naturalist needs to follow as well as the virtues he or she needs to practice in order for the term naturalism to do any meaningful work. Much of the book explains and then critiques the various attempts to define naturalism in the Anglo-American secondary literature. Some of the criticisms I raise seem to emanate from the internal logic of the naturalistic position being expressed. However, others have emerged from gleaning the work of such Continental thinkers as Nietzsche, Husserl, Heidegger, and Foucault. I use these thinkers in order to expose the unjustified implicit and sometimes explicit assumptions that many naturalistic philosophers presume to hold when they attempt to render a clear, distinct, and robust naturalist position.

Philosophic Classics: From Plato to Derrida Forrest Baird, 2023-09-04 *Philosophic Classics: From Plato to Derrida* includes essential writings of the most important philosophers from almost two millennia of Western philosophy. In updating this Seventh Edition, editor Forrest E. Baird has continued to follow the same criteria established by the late Walter Kaufmann when the *Philosophic Classics* series was first established: 1 to use complete works or where more appropriate complete sections of works; 2 in clear translations; 3 of texts central to each thinker's philosophy or widely accepted as part of the canon. To make the works more accessible to students, most footnotes treating textual matters, variant readings, etc. have been omitted, and important words from antiquity have been transliterated and put in angle brackets. In addition, each thinker is introduced by a brief essay composed of three sections: 1 biographical, a glimpse of the life; 2 philosophical, a résumé of the philosopher's thought; and 3 bibliographical, suggestions for further reading. A timeline places important philosophers alongside other important thinkers, world leaders, and major global events. Photos and paintings with explanatory captions illuminate the ideas, debates, and places discussed in the text. New to the Seventh Edition: New translations: Plato, *Euthyphro*, *Apology*, *Crito*, and *Phaedo*; Aristotle, *Nicomachean Ethics*; Epicurus, *Letter to Menoeceus*; and *Principal Doctrines*; Boethius, *The Consolation of Philosophy*; Anselm, *Proslogion*; Giovanni Pico della Mirandola, *Oration on the Dignity of Man*; René Descartes, *Correspondence with Princess Elizabeth*; Gottfried Leibniz, *Monadology*; Jean-Jacques Rousseau,
