find useful Combining their new engine with the simplest of chassis and body to save time and costs Rover had the Land Rover ready shortly after the new P3 and its immediate world wide success took them by surprise It had plans too far too many to put into production There were gas turbine powered cars inspired by the company s wartime jet engine work there was a hybrid of Rover car and Land Rover called the Road Rover and there were ideas for expanding the existing model ranges and adding more By 1953 when the story told in this book ends Rover was ready to introduce new saloons and Land Rovers that would see it comfortably through the 1950s Not only had it survived but it was in better health than ever before
