Rubbish Theory The Creation And Destruction Of Value:

Rubbish Theory Michael Thompson, 1979 Castastrophe Theory a recent development with applications in the natural sciences suggests fresh ways in which we can look at society and the problems of change and stability Using examples ranging from popular art property and education to pigin New Guinea t he author shows how we might look afresh at society s changing assessments of valu **Rubbish Theory** Michael Thompson, 2017 New edition of this classic work which asks How do objects that are of little worth or worth nothing become valuable Rubbish Theory Michael Thompson, 2017-06-20 Rubbish is something we ignore By definition we discard it from our lives and our minds and it remains outside the concerns of conventional economics However this book explores the dynamics through which rubbish can re enter circulation as a prized commodity in many cases far exceeding its original value Antiques vintage cars and period homes after being discarded as valueless can even after many years become priceless First published in 1979 Rubbish Theory has become foundational in its field Today it is as relevant as ever This edition includes a new afterword revealing how the consequences of our compulsion to discard are far from inevitable and going on to explore how we can transform our troublesome wastes into valuable resources Residual Media Charles R. Acland, 2007 In a society that awaits the new in every medium what happens to last year s new From player pianos to vinyl records and from the typewriter to the telephone Residual Media is an innovative approach to the aging of culture and reveals that ultimately new cultural phenomena rely on encounters with the old **Visible Signs (Second Edition)** David Crow, 2010 Visible Signs explains semiotic terms and theories in relation to visual communication with illustrative examples taken from contemporary art and design This edition features new and revised content and includes 200 visuals created to illustrate the ideas discussed within the book

Culture and Waste Gay Hawkins, Stephen Muecke, 2003 Waste is a key category for understanding cultural value It is not just the bad stuff we dispose of it is material we constantly struggle to redeem Cultures seem to spend as much energy reclassifying negativity as they do on establishing the negative itself The huge tertiary sector devoted to waste management converts garbage into money while ecological movements continue to stress human values and the natural But the problems waste poses are never simply economic or environmental The international contributors to this collection ask us to pause and consider the complex ways in which value is created and destroyed Their diverse approaches of ethics philosophy cultural studies and politics are at the forefront of a new field of ecohumanites Indispensable Eyesores Mélanie van der Hoorn, 2009 The author presents a rich variety of undesired edifices in Germany Hungary Austria and Bosnia Herzegovina and investigates the different methods used of dispose of them This analysis continues with a reflection on the afterlife of unwanted buildings and concludes with a discussion on the life expectancy of buildings their multi sensory materiality and thing ly agency From back cover *Of Hoarding and Housekeeping* Sasha Newell, 2023-10-13 Hoarding has largely been approached from a psychological and universal perspective and decluttering from an aesthetic and ecological one while little

work has been done to think about the cultural and global economic aspects of these phenomena Of Hoarding and Housekeeping provides an anthropological global and comparative angle to the understanding of hoarding and decluttering using cases from a variety of countries including US Japan India Cameroon and Argentina Focusing on the house with careful attention to material flows in and out this book examines practices of accumulation storage decluttering and waste as practices of kinship and the objects themselves as material kin **Beckett's Art of Salvage** Julie Bates,2017-04-19 Introduction Miscellaneous Rubbish Relics Heirlooms Props Treasure Conclusion **The Routledge International Handbook of Valuation and Society** Anne Krüger,Thorsten Peetz,Hilmar Schaefer,2024-10-15 The Routledge International Handbook of Valuation and Society builds on the growing research interest in practices of valuation throughout contemporary society providing an up to date overview of the different facets of research in the sociology of valuation The handbook is divided into five major sections with attention to the treatment of valuation in major areas of sociological theory as well as its key concepts discourses and approaches Part I Theoretical perspectives Part II Central valuation practices in societal spheres Part III Cross cutting valuation practices Part IV Valuation and societal change Part V Reflections Together the chapters in this book characterize distinctive practices of valuation across different societal spheres such as education and science arts and culture economic life the environment or digital culture and social media They also examine the role of valuation in contemporary society and consider the ways it effects social change This seminal handbook aims at taking stock of the development of the study of valuation with a selection of topics that are important for understanding core perspectives and developments as well as anticipating its future orientation It will appeal to scholars across the social sciences with interest in the ubiquity of the valuation practices and its effects on social life **Encyclopedia of Consumption and Waste** Carl A. Zimring,William L. Rathje, Consulting Editor,2012-02-27 Archaeologists and anthropologists have long studied artifacts of refuse from the distant past as a portal into ancient civilizations but examining what we throw away today tells a story in real time and becomes an important and useful tool for academic study Trash is studied by behavioral scientists who use data com piled from the exploration of dumpsters to better understand our modern society and culture Why does the average American household send 470 pounds of uneaten food to the garbage can on an annual basis How do different societies around the world cope with their garbage in these troubled environmental times How does our trash give insight into our attitudes about gender class religion and art The Encyclopedia of Consumption and Waste explores the topic across multiple disciplines within the social sciences and ranges further to include business consumerism environmentalism and marketing to comprise an outstanding reference for academic and public libraries [Waste Paper in Early Modern England](#) Anna Reynolds,2024 Waste Paper in Early Modern England argues that rhetorical commonplaces referring to waste paper are indicative of everyday material experience of an author s reader s housewife s or city dweller s immersion in an environment brimming with repurposed scraps and sheets **Cleaning Up Renaissance Italy** Jane L. Stevens

Crawshaw,2023 *Cleaning Up Renaissance Italy* takes us to the streets bridges and waterways of Renaissance Genoa and Venice exploring how environmental management street cleaning water provision waste disposal and reuse relates to cultural ideals individual and collective behaviour political reputations and social identities *Waste-Site Stories* Brian Neville,Johanne Villeneuve,2012-02-01 Ours is a wasteful society consumed with care for its remains according to the contributors of *Waste Site Stories* Here scholars from around the world probe current notions of waste and the ways in which remains of different kinds recover value in the act of recollection and recycling In the wake of destructive experiences that continue to trouble memory there is something compelling about today s theoretical and artistic interest in waste and recycling The two terms provide a purchase on changing conditions of cultural memory on technological development and its sometimes toxic ecological and social fallout and on the legacy of personal and historical trauma They suggest new resources for the stories of our engagement with the things of the past and the sites where traces of history survive *Writing Chinese* L. Chen,2006-04-29 This is a comparative study of the politics of Chinese cultural identity facing China Taiwan Hong Kong the US Chinese and the Chinese diaspora in the West The author challenges current discussions of hybridity and nationalism by contrasting the experiences of Taiwan Hong Kong and US Chinese with those of China and the Chinese diaspora *The Literature of Waste* S. Morrison,2015-06-03 Tracing material and metaphoric waste through the Western canon ranging from Beowulf to Samuel Beckett Susan Signe Morrison disrupts traditional perceptions of waste to better understand how we theorize manage and are implicated in what is discarded and seen as garbage Engaging a wide range of disciplines Morrison addresses how the materiality of waste has been sedimented into a variety of toxic metaphors If scholars can read waste as possessing dynamic agency how might that change the ethics of refuse ing and ostracizing wasted humans A major contribution to the growing field of Waste Studies this comparative and theoretically innovative book confronts the reader with the ethical urgency present in waste literature itself *Spoil Island* Charlie Hailey,2013-08-01 Is there an allure of spoiled places Spoil islands are overlooked places that combine dirt with paradise waste land with brave new world and wildness with human intervention Although they are mundane products of dredging these islands form an uninvestigated archipelago that demonstrates the potential value and contested re valuation of landscapes of waste To explore these islands *Spoil Island Reading the Makeshift Archipelago* navigates a course along the U S east coast moving from New York City to Florida Along the way a general populace squats picnics and reflects on the islands while other forces are also at work New York City parks commissioner Robert Moses first deplores then adopts Hoffman and Swinburne Islands UN Secretary General U Thant meditates on the East River s Belmont Island businessman John D MacArthur rejects the purchase of Peanut Island artist Christo surrounds Miami s spoil islands Key Westers debate the futures of two spoil islands that mark their sunset view and artist Robert Smithson augments this archipelago materially and conceptually Historical and contemporary stories highlight each island s often contradictory ecologies that pair nature with infrastructure public concerns with private

development rationalized urbanism with artistic impulse and order with disorder Spoil islands put you in places you normally wouldn't and perhaps shouldn't be To examine these marginalized topographies is to understand emergent concerns of twenty first century place making public space and natural and artificial infrastructure Today spoil islands constitute an unprecedented public commons where human agency and nature are inextricably linked Spoil Island will be of interest to anyone working in the areas of architecture cultural history cultural geography environmental studies or environmental philosophy Linking the islands with their environmental aesthetics Charlie Hailey provides a lively and critical topography of places that play a part in current events and local situations with global implications Values and Revaluations Hans Peter Hahn, Anja Klöckner, Dirk Wicke, 2022-03-24 Why are some things valuable while others are not How much effort does it take to produce valuable objects How can one explain the different appraisal of certain things in different temporal horizons and in different cultures Cultural processes on how value is attached to things and how value is re-established are still little understood The case studies in this volume originating from anthropology and archaeology provide innovative and differentiated answers to these questions However for all contributions there are some common basic assumptions One of these concerns the understanding that it is rarely the value of the material itself that matters for high valuation but rather the appreciation of the assumed or constructed origin of certain objects or their connection with certain social structures A second of these shared insights addresses the ubiquity of phenomena of value in things There is no society without valued objects As a rule valuation is something negotiated or even disputed Value arises through social action whereby it is always necessary to ask anew which actors are interested in the value of certain objects or in their appreciation This also works the other way round Who are those actors who question corresponding objective values and why *The Re-Use of Urban Ruins* Hanna Katharina Göbel, 2014-12-05 How do urban ruins provoke their cultural revaluation This book offers a unique sociological analysis about the social agencies of material culture and atmospheric knowledge of buildings in the making It draws on ethnographic research in Berlin along the former Palace of the Republic the E Werk and the Caf Moskau in order to make visible an interdisciplinary regime of design experts who have developed a professional sensorium turning the built memory of the city into an object of aesthetic inquiry **Who Plans the Planning?** Lucius Burckhardt, 2019-11-18 From the 1950s Lucius Burckhardt 1925-2003 focused on planning design and construction in a democracy His astute observations and critical analysis have had a fundamental effect on the design of our environment on teaching in the architectural planning professions and on our understanding of what city means His research which between mighty commercial interests and conflicting political aspirations focuses on the benefit for the entire population is indispensable when and wherever buildings are planned designed built and inhabited With a new selection of texts this book ploughs a furrow through Lucius Burckhardt's theory of planning
