Rubia Continuity And Change:

Medieval Pharmacotherapy, Continuity and Change Helena M. Paavilainen, 2009 The development of medical drug therapy in medieval times can be seen as an interplay between tradition and innovation This book follows the changes in the therapy from the Arabic medicine of Ibn S n Avicenna to Latin medical scholasticism aiming to trace both the continuity and the development in the theory and practice of medieval drug therapy In this delicate balance between change and continuity a crucial role was played by the scientific community through critical rejection or acceptance of new ideas The drug choices were in most cases rational also from the point of view of contemporary medical theory The method used in the book for studying these choices could promote the development of a novel methodology for historical ethnopharmacology *The Oxford Handbook of Autism and Co-Occurring Psychiatric Conditions* Susan W. Bussmann, Mostafa Elachouri, Zaal Kikvidze, 2024-11-15 Research in recent years has increasingly shifted away from purely academic research and into applied aspects of the discipline including climate change research conservation and sustainable development It has by now widely been recognized that traditional knowledge is always in flux and adapting to a quickly changing environment Trends of globalization especially the globalization of plant markets have greatly influenced how plant resources are managed nowadays While ethnobotanical studies are now available from many regions of the world no comprehensive encyclopedic series focusing on the worlds mountain regions is available in the market Scholars in plant sciences worldwide will be interested in this dynamic content The field and thus the market of ethnobotany and ethnopharmacology has grown considerably in recent years Student interest is on the rise attendance at professional

conferences has grown steadily and the number of professionals calling themselves ethnobotanists has increased significantly. Various societies of such professionals include the Society for Economic Botany, the International Society of Ethnopharmacology, the Society of Ethnobiology, the International Society for Ethnobiology, and many regional and national societies in the field that currently have thousands of members. Growth has been most robust in BRIC countries. The objective of this new MRW on Ethnobotany of Mountain Regions is to take advantage of the increasing international interest and scholarship in the field of mountain research. We anticipate including the best and latest research on a full range of descriptive, methodological, theoretical, and applied research on the most important plants for each region. Each contribution will be scientifically rigorous and contribute to the overall field of study.

Ethnobotany of the Mountain Regions of Eastern Europe Rainer W. Bussmann, Narel Y. Paniagua-Zambrana, Zaal Kikvidze, 2025-04-23. Natural resources and associated biological diversity provide the basis of livelihood for humans, particularly in the rural areas and mountain regions around the world. Over centuries, indigenous peoples, traditional societies, and local communities have developed their own specific knowledge regarding plant use, management, and conservation. The history of plant use by humans as food and to treat diverse ailments dates back to ancient civilizations. Even though the advent of allopathic medicine has somehow minimized the role of medicinal plants in favor of synthetic drugs, a number of modern drug discoveries have been based on medicinal plants used by indigenous peoples. Ethnobiology is the burgeoning interdisciplinary scientific field which covers all types of interactions between plants and people, and Eastern Europe is recognized as a plant diversity hot spot. This new Major Reference Work on the Ethnobotany of Mountain Regions of Eastern Europe, Carpathians, covers in detail the mountains and valleys of this region, which are known to be rich in unique medicinal and food plant species. Local communities residing in the mountain regions of Eastern Europe possess unique knowledge of surrounding resources, which is the result of many years of interaction with and selection of the most desirable and pervasive plant species present. In this context, this major reference work provides comprehensive information on cross-cultural variation in the traditional uses of plants as food, medicine, and for cultural purposes among these diverse communities residing in Eastern Europe. The key areas of focus include plant diversity in the Carpathians, cross-cultural variation in traditional uses of plant species by these communities, high-value medicinal and food plant species, and threats and conservation status of plant species and traditional knowledge.

Gringolandia Stephen D. Morris, 2005. Mexico's views of the United States have been characterized as stridently anti-American, but recent policy changes in Mexico, culminating with the North American Free Trade Agreement (NAFTA), mark a fundamental transformation in the relationship. This thoughtful and original work answers questions about the impact of these policy shifts on Mexican nationalism and perceptions of the United States. Have popular and elite views changed? Has the government's anti-American rhetoric become anachronistic? What has been the effect on Mexican national identity? As the only developing country to have entered into a free trade agreement with a developed country, Mexico offers a

unique and invaluable case study of the impact of globalization on a nation and its national identity Exploring Mexico's experience also allows us to consider how other countries perceive the United States especially in the post 9 11 climate Analyzing the diversity of Mexican views of the United States Gringolandia contributes a rich and nuanced dimension to our understanding of contemporary Mexico and Mexicans feelings about the vital cross border relationship **Gaze-Following** Ross Flom,Kang Lee,Darwin Muir,2017-09-25 What does a child's ability to look where another is looking tell us about his or her early cognitive development What does this ability or lack thereof tell us about a child's language development understanding of other's intentions and the emergence of autism This volume assembles several years of research on the processing of gaze information and its relationship to early social cognitive development in infants spanning many age groups Gaze Following examines how humans and non human primates use another individual's direction of gaze to learn about the world around them The chapters throughout this volume address development in areas including joint attention early non verbal social interactions language development and theory of mind understanding Offering novel insights regarding the significance of gaze following the editors present research from a neurological and a behavioral perspective and compare children with and without pervasive developmental disorders Scholars in the areas of cognitive development specifically and developmental science more broadly as well as clinical psychologists will be interested in the intriguing research presented in this volume *Cumulated Index Medicus* ,1993 *Cuba en la encrucijada / Cuba on the Verge: 12 Writers on Continuity and Change in Havana and Across the* Leila Guerriero,2018-03-06 Un libro de crónicas cubanas de la mano de doce de los más prestigiosos periodistas y escritores de nuestro tiempo que abarca política y arte música y béisbol presente y pasado y nos ofrecen una excepcional instantánea de la particular encrucijada en la que se encuentra la sociedad cubana De todas las preguntas que debe hacerse el periodismo solo hay una que si hablamos de Cuba puede responderse fácilmente dónde Todo el mundo sabe más o menos dónde queda Cuba Para las demás ¿quién es Cuba quiénes son los cubanos cómo es Cuba cuándo comenzó Cuba a ser lo que es por qué Cuba es como es y diversas variaciones y combinaciones de lo mismo no solo no hay respuestas fáciles sino que cada quien parece tener las suyas Los doce textos que componen este libro procuran alejarse de los reduccionismos más típicos y contar el país desde el territorio más peligroso y por lo mismo más interesante de la duda y la contradicción Contar Cuba como contar el desembarco en Normandía o la caída del Muro de Berlín es contar la Historia en mayúsculas una tarea ambiciosa Pero en el tartamudeo ametrallado de los tiempos presentes estos son algunos intentos Leila Guerriero **ENGLISH DESCRIPTION** Spanning politics and art music and baseball *Cuba on the Verge* is a timely look at a society's profound transformation from inside and out Change looms in Cuba Just ninety miles from United States shores yet inaccessible to most Americans until recently Cuba fascinates as much as it confounds Images of the Buena Vista Social Club wild nights at the Tropicana classic cars and bearded rebels clinching cigars only scrape the surface of Cuba's complex history and legacy As the US and Cuba move toward the normalization of diplomatic relations after an epic fifty six

, Child and Adolescent Depression, An Issue of Child and Adolescent Psychiatric Clinics of North America

Stuart J. Goldman, Frances J Wren, 2012-06-08 Recent work on emotional regulation gives a powerful new lens through which to view the evolution across childhood and adolescence of the lived experience and clinical presentation of depression We have a richer picture of the depressed child and the child at risk for depression in interaction with family and wider world We know more about the development and the developmental psychopathology of coping strategies These advances give provocative clues to the actual processes whereby well established risk and protective factors might interact to produce sustain or curtail a depressive syndrome This in turn opens the door to treatment and prevention approaches that are truly developmentally informed This is the philosophy behind this completely updated and comprehensive analysis of childhood depression

Development of executive function during childhood Yusuke Moriguchi, Philip D Zelazo, Nicolas Chevalier, 2016-04-01 Executive function refers to the goal oriented regulation of one's own thoughts actions and emotions Its importance is attested by its contribution to the development of other cognitive skills e.g theory of mind social abilities e.g peer interactions and academic achievement e.g mathematics and by the consequences of deficits in executive function which are observed in wide range of developmental disorders such as attention deficit hyperactivity disorder and autism Over the last decade there have been growing interest in the development of executive function and an expanding body of research has shown that executive function develops rapidly during the preschool years with adult level performance being achieved during adolescence or later This recent work together with experimental research showing the effects of interventions targeting executive function has yielded important insights into the neurocognitive processes underlying executive function Given the complexity of the construct of executive function however and the multiplicity of underlying processes there are often inconsistencies in the way that executive function is defined and studied This inconsistency has

hampered communication among researchers from various fields This Research Topic is intended to bridge this gap and provide an opportunity for researchers from different perspectives to discuss recent advances in understanding childhood executive function Researchers using various methods including behavioral experiments neuroimaging eye tracking computer simulation observational methods and questionnaires are encouraged to contribute original empirical research In addition to original empirical articles theoretical reviews and opinions perspective articles on promising future directions are welcome We hope that researchers from different areas such as developmental psychology educational psychology experimental psychology neuropsychology neuroscience psychiatry computational science etc will be represented in the Research Topic

Agrarian Change and Crisis in Europe, 1200-1500 Harilaos Kitsikopoulos, 2012-03-15 Agrarian Change and Crisis in Europe 1200 1500 addresses one of the classic subjects on economic history the process of aggregate economic growth and the crisis that engulfed the European continent during the late Middle Ages This was not an ordinary crisis During the period 1200 1500 Europe witnessed endemic episodes of famine and a wave of plague epidemics that amounted to one of its worst health crises rivaled only by the Justinian plague in the sixth century These challenges called into question the production of goods and services and the distribution of wealth opening the possibility of fundamental systemic change This book offers an empirical synthesis on a host of economic demographic and technological developments which characterized the period 1200 1500 It covers virtually the entire continent and places equal emphasis both on providing a solid factual framework and comparing and contrasting various theoretical interpretations The broad geographical and conceptual scope of the book renders it indispensable not only for undergraduate students who take courses relating to the economic and social life of the Middle Ages but also to more advanced scholars who often specialize in only one country or region

Integration in Multicultural England Jörg Friedrichs, 2025-07-24 Positive relations between Muslims and non Muslims are important for the future in Britain and beyond By studying community relations this book takes an innovative approach that moves beyond mapping British Muslims or British Islam Instead Jörg Friedrichs discusses the actual ways Muslims and non Muslims relate or fail to relate where it matters most namely in diverse inner cities Is Britain a multicultural country is it moving towards greater integration or is

this a false dichotomy Given their unique everyday experience inner city residents prove to be experts when it comes to community relations To give them a voice and learn from their experience the book takes us on a tour of diverse English inner cities Reassuringly the grassroots perspective of residents is consistent with a vision of integration in multicultural England Residents are concerned not so much about hot button issues like extremism or terrorism Instead their minds are set on practical matters how to coexist peacefully in stressful urban environments and how to find love and raise families when norms diverge Caught between grievance and aspiration inner city residents from any background express disappointment at Muslim and non Muslim parents sending their children to different schools They also discuss whether governance should be community blind or community based and if Britain is ready for a Muslim Prime Minister In all of this Muslim and non Muslim residents acknowledge that we live in a multicultural society For most however it does not follow that we should adopt multiculturalism as an ideology Instead most people crave and support a move towards greater integration
