Social Indicators Tony Atkinson,Bea Cantillon,Eric Marlier,Brian Nolan,2002-03-07 Social indicators are an important tool for evaluating a country s level of social development and for assessing the impact of policy Such indicators are already in use in investigating poverty and social exclusion in several European countries and have begun to play a significant role in advancing the social dimension of the European Union as a whole The purpose of this book is to make a scientific contribution to the development of social indicators for the purposes of European policy making It considers the principles underlying the construction of policy relevant indicators the definition of indicators and the issues that arise in their implementation including that of the statistical data required It seeks to bring together theoretical and methodological methods in the measurement of poverty social exclusion with the empirical practice of social policy The experience of Member States is reviewed including an assessment of the National Action Plans on Social Inclusion submitted for the first time in June 2001 by the fifteen EU governments The key areas covered by the book are poverty including its intensity and persistence income inequality non monetary deprivation low educational attainment unemployment joblessness poor health poor housing and homelessness functional illiteracy and innumeracy and restricted social participation In each case the book assesses the strengths and weaknesses of different indicators relevant to social inclusion in the European Union and makes recommendations for the indicators to be employed Indicators for Social Inclusion in the European Union is being published at a critical stage in the evolution of the social agenda of the European Union It is hoped that the report will

play a role in widening public debate about the social dimension of Europe and that it will be of value to the social partners to non governmental and grass roots organizations and to those living in poverty and social exclusion It seeks to provide both a constructive background document at a crucial juncture in the evolution of the social dimension of the European Union and a reference work of continuing value

Contesting Nordicness Jani Marjanen, Johan Strang, Mary Hilson, 2021-12-20 The terms Nordic and Scandinavian are widely used to refer to the politics society and culture of Denmark Finland Iceland Norway and Sweden But why have people felt the need to frame things as Nordic and why has the adjective Nordic become so prominent This book adopts a rhetorical approach analysing the speech acts which have shaped the meanings of the term What do the different terms Nordic and Scandinavian have in common and how have the uses of these terms changed in different historical periods What accounts for the apparent upsurge in uses of the rhetoric of Nordicness in the 2010s Drawing on eight case studies of the uses of Nordic and Scandinavian from the nineteenth century to the present day the book explores the appeal and the flexibility of the rhetoric of Nordicness in relation to race openness gender equality food crime fiction Nordic co operation and the Nordic model Arguing that Nordic and Scandinavian are flexible and contested concepts that have been used in different often contradictory and inherently political ways the book suggests that the usage of the term has evolved from a means of creating a cultural community to forging political co operation and further to marketing models in politics and popular culture The rhetorical approach also shows how many of the hallmarks of Nordic political culture such as the Nordic model Nordic gender equality or Nordic openness are more recent conceptualisations than usually assumed As such the book argues for the need to turn attention away from analysing the different components of Nordicness into studying how when and for what purpose different features were made Nordic

Happiness Across Cultures Helaine Selin, Gareth Davey, 2012-02-29 Different cultures experience happiness differently Traditionally the West is considered materialistic and happiness is said to come from achievement and acquisition The East is said to be more people oriented where happiness is a result of deep personal interactions Thus poor people can be happier in the East than the West because they are not so concerned with possession and more with society This book considers happiness and quality of life in non Western countries and cultures Its coverage is diverse and spans the breadth of the non Western world revealing unique perspectives of happiness and life quality embedded in rich cultural traditions and histories

Education, Equity, Economy: Crafting a New Intersection George W. Noblit, William T. Pink, 2015-11-17 This volume will introduce the readers to an alternative nexus of education equity and economy pointing to economies and educations that promote a less stratified and exploitive world and as the chapter authors demonstrate this view has a wide range of applications from technology mathematics to environmental catastrophes and indigenous cultures This first volume in the new book series not only introduces the series itself but also several authors whose chapters that appear here presage the in depth analysis that will be offered by their volumes in the series Education is invoked repeatedly in the class warfare that pits the population

against the elites as the investment that makes the difference in terms of both policy and individual commitment in the economy. The economy in this scenario is competitive, accumulative, exploitive, and stratifying, implying education should mirror this and prepare people to fit this economy. However, education has other historic goals of developing common cultures, national identities, and civic engagement that belie this form of economic determinism. This volume and the series will explore this new nexus of economy and education with equity. *Women, Stress, and Heart Disease* Kristina Orth-Gomer, Margaret A. Chesney, Nanette K. Wenger, 1998-03. This volume explores women's risk factors for cardiovascular disease as well as how social and physical strains contribute to the risk. For health professionals, behavioral scientists, and social psychologists alike.
