Lying And Deception In Everyday Life:

Lying and Deception in Everyday Life Michael Lewis, Carolyn Saarni, 1993-02-05 I speak the truth not so much as I would but as much as I dare Montaigne All cruel people describe themselves as paragons of frankness Tennessee Williams Truth and deception like good and evil have long been viewed as diametrically opposed and unreconcilable Yet few people can honestly claim they never lie In fact deception is practiced habitually in day to day life from the polite compliment that doesn't accurately relay one's true feelings to self deception about one's own motivations What fuels the need for people to intricately construct lies and illusions about their own lives If deceptions are unconscious does it mean that we are not responsible for their consequences Why does self deception or the need for illusion make us feel uncomfortable Taking into account the sheer ubiquity and ordinariness of deception this interdisciplinary work moves away from the cut and dried notion of duplicity as evil and illuminates the ways in which deception can also be understood as a adaptive response to the demands of living with others The book articulates the boundaries between unethical and adaptive deception demonstrating how some lies serve socially approved goals while others provoke distrust and condemnation Throughout the volume focuses on the range of emotions from feelings of shame fear or envy to those of concern and compassion that motivate our desire to deceive ourselves and others Providing an interdisciplinary exploration of the widespread phenomenon of lying and deception this volume promotes a more fully integrated understanding of how people function in their everyday lives Case illustrations humor and wit concrete examples and even a mock television sitcom script bring the ideas to life for clinical practitioners behavioral scientists and philosophers and for students in these realms Lying and Deception in Everyday Life

Lewis/Saarni, 1993-06-23 Taking into account the sheer ubiquity and ordinariness of deception this interdisciplinary work moves away from the cut and dried notion of duplicity as evil and illuminates the ways in which deception can also be understood as a adaptive response to the demands of living with others The book articulates the boundaries between unethical and adaptive deception demonstrating how some lies serve socially approved goals while others provoke distrust and condemnation Throughout the volume focuses on the range of emotions from feelings of shame fear or envy to those of concern and compassion that motivate our desire to deceive ourselves and others *The Rise of Consciousness and the Development of Emotional Life* Michael Lewis, 2013-10-16 Synthesizing decades of influential research and theory Michael Lewis demonstrates the centrality of consciousness for emotional development At first infants competencies constitute innate reactions to particular physical events in the child's world These action patterns are not learned but are readily influenced by temperament and social interactions With the rise of consciousness these early competencies become reflected feelings giving rise to the self conscious emotions of empathy envy and embarrassment and later shame guilt and pride Focusing on typically developing children Lewis also explores problems of atypical emotional development Winner m William James Book Award Society for General Psychology APA Division 1 *The Interplay of Truth and Deception* Matthew S. Detecting Lies and Deceit Aldert Vrij,2000-05-25 Why do people lie and how can lies be detected There is now a substantial psychological literature relating to these fundamental questions and this book reviews the relevant knowledge in detail before focusing on guidelines for best practice in detecting deception Psychological research is now available on individual differences in lying behaviour gender differences age differences and personality There is also interesting research evidence of the ways in which deception is reflected both in real objective non verbal behaviour and also in the perceived non verbal cues which can help or mislead the observer in detecting deception Although the book does include a major survey of the physiological aspects of deception and the polygraph as a method of detection it also includes a thorough review of current knowledge of content analysis and validity assessment of speech and written statements The book ends by discussing how professionals can improve lie detection by focusing on key aspects of the behaviour of the liar and by awareness and control of their own behaviour Covers all three aspects of deception non verbal cues speech and written statement analysis and physiological responses Focuses on the behaviour and perceptions of the observer which can hinder the process of detection Based on the author s expert review of the research and evidence and on his practical experience and connections with several police forces Without doubt this book is the most important contribution to research and practice in lie detection to be published in years For the first time research about verbal nonverbal and physiological correlates of truth telling and deception are reviewed comprehensively in one text This book will benefit those who have to decide whether people are telling the truth or lying because it both reviews contemporary research and provides practical guidelines Frans Willem Winkel Free University of Amsterdam President EAPL European Association of Psychology and Law This book is aimed at students academics and professionals in psychology criminology policing and law **The Varnished Truth** David Nyberg,1993-06 Everyone says that lying is wrong But when we say that lying is bad and hurtful and that we would never intentionally tell a lie are we really deceiving anyone In this wise and insightful book David Nyberg exposes the tacit truth underneath our collective pretense and reveals that an occasional lie can be helpful healthy creative and in some situations even downright moral Through familiar and often entertaining examples Nyberg explores the purposes deception serves from the social kindness of the white lie to the political ends of diplomacy to the avoidance of pain or unpleasantness He looks at the lies we tell ourselves as well and contrary to the scolding of psychologists demonstrates that self deception is a necessary
