Lying Stones Of Marrakech:

The Lying Stones of Marrakech Stephen Jay Gould, 2000 Essays cover a wide range of topics including the nature of fossils evolution and biodiversity

The Lying Stones of Marrakech Stephen Jay Gould, 2000 I have struggled harder and more explicitly than for anything else in my life as a writer to develop a distinctive and personal form of essay to treat great scientific issues in the context of biography and to do so not by the factual chronology of a life s sorrows and accomplishments a noble task requiring the amplitude of a full book but rather by the intellectual synergy between a person and the controlling idea of his life From the Preface Stephen Jay Gould s writing remains the modern standard by which popular science writing is judged Ever since the late 1970 s his monthly essay in NATURAL HISTORY and his full length books have bridged the yawning gap between science and wider culture In this fascinating new collection of essays Gould has once again applied biographical perspectives to the illumination of key scientific concepts and their history ranging from the origins of palaeontology to modern eugenics and generic engineering As always these essays brilliantly display his gift for colloquial and vivid explanation and include fascinating oddities from the natural world and the printed world

Stephen Jay Gould Warren D. Allmon, Patricia Kelley, Robert Ross, 2009 Considered by many during his lifetime as the most well known scientist in the world Stephen Jay Gould left an enormous and influential body of work A Harvard professor of paleontology evolutionary biology and the history of science Gould provided major insights into our understanding of the history of life He helped to reinvigorate paleontology launch macroevolution on a new course and provide a context in which the biological developmental stages of an organism s embryonic growth could be integrated into an understanding of evolution This book is a set of reflections on the many areas of Gould s intellectual life by the people who knew and understood him best former students and prominent close collaborators Mostly a critical assessment of his legacy the chapters are not technical contributions but rather offer a combination of intellectual bibliography personal memoir and reflection on Gould s diverse scientific achievements The work includes the most complete bibliography of his writings to date and offers a multi dimensional view of Gould s life work not to be found in any other volume

[The Richness of Life](#) Stephen Jay Gould, 2007 This spotlight on an extraordinary mind collects the most entertaining and enlightening writings by the beloved paleontologist evolutionary biologist and celebrant of the wonder of life 20 illustrations

Genuine Fakes Lydia Pyne, 2019-08-08 Does an authentic Andy Warhol painting need to be painted by Andy Warhol Why do audiences feel outraged when they find out that scenes from their beloved blockbuster documentaries are staged Can people move past assuming that a diamond grown in a lab is a fake What happens when a forged painting or manuscript becomes more valuable than its original This is a book about genuine fakes the curious and complex objects that provoke these very sorts of questions Genuine fakes fall into the space between things that are real and things that are not whether or not we think that those things are authentic is a matter of perspective Unsurprisingly the world is full of genuine fakes full of things that defy

simple categorisation From stories of audacious forgeries to feats of technological innovation historian Lydia Pyne explores how the authenticity of eight genuine fakes depends on their unique combinations of history science and culture The stories of art forgeries fake fossils nature documentaries synthetic flavours museum exhibits Maya codices and Palaeolithic replicas show that genuine fakes are both complicated and change over time Drawing from historical archives interviews museum exhibits and science fiction as well as her own research Pyne brings each genuine fake to life through unexpected and often outrageous stories Genuine Fakes will make readers think about all the unreal things they encounter in their daily lives and why they invoke the reactions surprise wonder understanding or annoyance that they do LabOratory Sandra

Kaji-O'Grady,Chris L. Smith,2024-02-06 An illustrated examination of laboratory architecture and the work that it does to engage the public recruit scientists and attract funding The laboratory building is as significant to the twenty first century as the cathedral was to the thirteenth and fourteenth centuries The contemporary science laboratory is built at the grand scales of cathedrals and constitutes as significant an architectural statement The laboratory is a serious investment in architectural expression in an attempt to persuade us of the value of the science that goes on inside In this lavishly illustrated book Sandra Kaji O Grady and Chris L Smith explore the architecture of modern life science laboratories and the work that it does to engage the public recruit scientists and attract funding Looking at the varied designs of eleven important laboratories in North America Europe and Australia all built between 2005 and 2019 Kaji O Grady and Smith examine the relationship between the design of contemporary laboratory buildings and the ideas and ideologies of science Observing that every laboratory architect and client declares the same three aspirations to eliminate boundaries to communicate the benefits of its research programs and to foster collaboration Kaji O Grady and Smith organize their account according to the themes of boundaries expression and socialization For instance they point to the South Australian Health and Medical Institute s translucent envelope as the material equivalent of institutional accountability the insistent animal imagery of the NavarraBioMed laboratory in Spain and the Hillside Research Campus s mimicry of the picturesque fishing village that once occupied its site Through these and their other examples Kaji O Grady and Smith show how the architecture of the laboratory shapes the science that takes place within it **A History of Ambition in 50 Hoaxes** Gale Eaton,2016-09-06 What do the

Trojan Horse Piltdown Man Keely Motor Company and Ponzi Scheme have in common They were all famous hoaxes carefully designed and bolstered with false evidence The con artists in this book pursued a variety of ambitions making money winning wars mocking authority finding fame trading an ordinary life for a glamorous one but they all chose the lowest fastest road to get there Every hoax is a curtain and behind it is a deceiver operating levers and smoke machines to make us see what is not there and miss what is As P T Barnum knew you can short circuit critical thinking in any century by telling people what they want to hear Most scams operate on a personal scale but some have shaped the balance of world power inspired explorers to sail uncharted seas derailed scientific progress or caused terrible massacres **A HISTORY OF AMBITION IN 50 HOAXES**

guides us through a rogue's gallery of hustlers liars swindlers imposters scammers pretenders and cheats In Gale Eaton's wide ranging synthesis the history of deception is a colorful tour with surprising insights behind every curtain Fountas Pinnell Level Z *Stephen Jay Gould and the Politics of Evolution* David F. Prindle, **Forensic Speaker Identification** Phil Rose, 2002-07-01 A voice is much more than just a string of words Voices unlike fingerprints are inherently complex They signal a great deal of information in addition to the intended message the speaker's sex for example or their emotional state or age Although evidence from DNA analysis grabs the headlines DNA can't talk It can't be recorded planning

ProGenesis: 95 Theses Against Evolution Dr. jur. Dieter Aebi, Dr. med. Markus Bourquin, Prof. a.D. Dr. Ing. Werner Gitt, Roland Schwab, Dipl. Ing. Hansruedi Stutz, lic. theol. Marcel Wildi, 2015-04-30 In the natural sciences today research and teaching are often carried out on the assumption of evolution The evolution theory is at present one of the main basic concepts of the scientific community However there are at least 75 scientific arguments that invalidate the evolution theory 95 Theses Against Evolution makes it clear that alternative concepts are necessary such as ID intelligent design This book shows that ID is much more credible than evolution Though unresolved questions of detail are included the model of the theory of evolution primeval soup and the Big Bang is not called into question as a basic principle This paradigm contains fundamental non provable extrapolations into the distant past as well as philosophical assumptions that are elevated to scientific dogmas The assumption of evolution is so deeply rooted in science that only a massive change in thinking can lead to freer handling of questions of origin and development The 95 Theses described here are intended to contribute to this discussion Today's situation is similar to that in the 16th century when Dr Martin Luther with his 95 Theses invited debate on church practices of the time Hopefully this publication will have a similar effect Human Adaptability, Student Economy Edition Emilio Moran, 2018-10-03 This book focuses on mechanisms of human adaptability It integrates findings from ecology physiology social anthropology and geography around a set of problems or constraints posed by human habitats **Lost Causes** Jason B. Jones, 2006 What if we didn't always historicize when we read Victorian fiction Lost Causes shows that Victorian writers frequently appear to have a more supple and interesting understanding of the relationship between history causality and narrative than the one typically offered by readers who are burdened by the new historicism As a return to these writers emphasizes the press of modern historicism deforms Victorian novels encouraging us to read deviations from strict historical accuracy as ideological bad faith By contrast Jason B Jones argues through readings of works ranging from The French Revolution to Middlemarch that literature's engagement with history has to be read otherwise Perhaps perversely Lost Causes suggests simultaneously that psychoanalysis speaks pressingly to the vexed relationship between history and narrative and that the theory is neither a nor anti historical Through his readings of Victorian fiction addressing the recent past Jones finds in psychoanalysis not a set of truths but rather a method for rhetorical reading ultimately revealing how its troubled account of psychic causality can help us follow literary language's representation of the real

Victorian narratives of the recent past and psychoanalytic interpretation share a fascination with effects that persist despite baffling inexplicable or absent causes In chapters focusing on Thomas Carlyle Charles Dickens Charlotte Bront and George Eliot *Lost Causes* demonstrates that history can carry an ontological as well as an epistemological charge one that suggests a condition of being in the world as well as a way of knowing the world as it really is From this point of view Victorian fiction that addresses the recent past is not a failed realism as it is so frequently claimed but rather an exploration of possibility in history

The Ecological Rift John Bellamy Foster, Richard York, Brett Clark, 2010-11-01 Humanity in the twenty first century is facing what might be described as its ultimate environmental catastrophe the destruction of the climate that has nurtured human civilization and with it the basis of life on earth as we know it All ecosystems on the planet are now in decline Enormous rifts have been driven through the delicate fabric of the biosphere The economy and the earth are headed for a fateful collision if we don't alter course In *The Ecological Rift* Capitalism's War on the Earth environmental sociologists John Bellamy Foster Brett Clark and Richard York offer a radical assessment of both the problem and the solution They argue that the source of our ecological crisis lies in the paradox of wealth in capitalist society which expands individual riches at the expense of public wealth including the wealth of nature In the process a huge ecological rift is driven between human beings and nature undermining the conditions of sustainable existence a rift in the metabolic relation between humanity and nature that is irreparable within capitalist society since integral to its very laws of motion Critically examining the sanguine arguments of mainstream economists and technologists Foster Clark and York insist instead that fundamental changes in social relations must occur if the ecological and social problems presently facing us are to be transcended Their analysis relies on the development of a deep dialectical naturalism concerned with issues of ecology and evolution and their interaction with the economy Importantly they offer reasons for revolutionary hope in moving beyond the regime of capital and toward a society of sustainable human development

Imagined Futures Max Saunders, 2019-10-22 This study provides the first substantial history and analysis of the *To Day and To Tomorrow* series of 110 books published by Kegan Paul Trench and Trubner and E P Dutton in the USA from 1923 to 1931 in which writers chose a topic described its present and predicted its future Contributors included J B S Haldane Bertrand Russell Vernon Lee Robert Graves Vera Brittain Sylvia Pankhurst Hugh MacDiarmid James Jeans J D Bernal Winifred Holtby Andr Maurois and many others The study combines a comprehensive account of its interest history and range with a discussion of its key concerns tropes and influence The argument focuses on science and technology not only as the subject of many of the volumes but also as method especially through the paradigm of the human sciences applied to other disciplines and as a source of metaphors for representing other domains It also includes chapters on war technology cultural studies and literature and the arts This book aims to reinstate the series as a vital contribution to the writing of modernity and to reappraise modernism's relation to the future establishing a body of progressive writing which moves beyond the discourses of post Darwinian degeneration and post war

disenchantment projecting human futures rather than mythic or classical pasts It also shows how as a co ordinated body of futurological writing the series is also revealing about the nature and practices of modern futurology itself

Edge of the Screen Murray Pomerance, 2024-11-14 This book is a series of seventeen meditations that revolve around the notion of the viewer s placement at the edge of the screen Every page is an opportunity to think about an aspect of film or of film viewing in new ways and to begin reconsidering deeply ingrained ways of unthinkingly characterizing and accounting for what it is that we watch when we watch a film what happens to us and how we make sense of and appreciate it This volume follows from three others by the author *Virtuoso Film Performance and the Actor s Magic* 2020 *The Film Cheat Cinematic Artifice and Viewing Pleasure* 2021 and *Uncanny Cinema Agonies of the Viewing Experience* 2022 All of these including *Edge of the Screen* meander and interrogate cinema as we watch it both connecting us to and disconnecting us from the moment of pleasure Each meditation is characterized by a deep penetration of the inquiring continually hungry authorial mind and a very extensive set of analyses of filmic moments from myriad films including 2001 A Space Odyssey Memento Zabriskie Point An American in Paris Planet of the Apes 1968 Superman 1978 Possessed The Jungle Book 1942 The Spy Who Came In from the Cold The Toll of the Sea Rope and numerous others These meditations are careful and philosophical as much as energetically ruminative yet are written in an accessible style for all interested readers who both love cinema and wonder about that love Each chapter can stand alone even though all work together to challenge perspectives on what we encounter experience think and feel when we watch films Across its chapters *Edge of the Screen* takes on a wide range of topics the ontology of film the relation between characters actors and the figures who appear onscreen film s relationships to the other arts especially painting but also novels and theatre the passage of time in film and its momentary character film criticism including deeply held values such as coherence film s relationship to mortality and more

A Brief Guide to Charles Darwin Cyril Aydon, 2013-02-07 Charles Darwin has become one of the most important men in history The quiet unsure polymath

who avoided confrontation ensconced in his family home at Down House in Kent was also a revolutionary who developed his idea of Natural Selection in isolation Cyril Aydon s short biography is considered one of the best introductions to the life and ideas of Darwin With Darwin s legacy still in contention and the forthcoming anniversary of the publication of *The Origins of Species* Aydon s book is a perfect guide to the ideas as well as the man who was recently voted one of the greatest Britons of all time and certainly one of the most influential thinkers ever

Perilous Planet Earth Trevor Palmer,2003-06-12 A readable account of the history of natural disasters throughout history

Oracles of Science Karl Giberson,Mariano Artigas,2009-02-27 *Oracles of Science* examines the popular writings of the six scientists who have been the most influential in shaping our perception of science how it works and how it relates to other fields of human endeavor especially religion Biologists Stephen Jay Gould Richard Dawkins and Edward O Wilson and physicists Carl Sagan Stephen Hawking and Steven Weinberg have become public intellectuals articulating a much larger vision for science and what role it should play in the modern worldview The scientific prestige and literary eloquence of each of these great thinkers combine to transform them into what can only be called oracles of science Their controversial often personal sometimes idiosyncratic opinions become widely known and perceived by many to be authoritative Curiously the leading oracles of science are predominantly secular in ways that don t reflect the distribution of religious beliefs within the scientific community Many of them are even hostile to religion creating a false impression that science as a whole is incompatible with religion Karl Giberson and Mariano Artigas offer an informed analysis of the views of these six scientists carefully distinguishing science from philosophy and religion in the writings of the oracles This book will be welcomed by many who are disturbed by the tone of the public discourse on the relationship between science and religion and will challenge others to reexamine their own preconceptions about this crucial topic
